"Did I Not Bring Israel Out of Egypt?" James K. Hoffmeier,Alan R. Millard,Gary A. Rendsburg,2016-05-19 The Hebrew Scriptures consider the exodus from Egypt to be Israel s formative and foundational event Indeed the Bible offers no other explanation for Israel s origin as a people It is also true that no contemporary record regarding a man named Moses or the Israelites generally either living in or leaving Egypt has been found Hence many biblical scholars and archaeologists take a skeptical attitude dismissing the exodus from the realm of history However the contributors to this volume are convinced that there is an alternative more positive approach Using textual and archaeological materials from the ancient Near East in a comparative way in conjunction with the Torah s narratives and with other biblical texts the contributors to this volume specialists in ancient Egypt ancient Near Eastern culture and history and biblical studies maintain that the reports in the Hebrew Bible should not be cavalierly dismissed for ideological reasons but rather should be deemed to contain authentic memories Arch Of Society Thomas Levy,1995-01-01 This volume marks a departure from earlier descriptive archaeological summaries of the Holy Land Taking an anthropological and socio economic perspective many of the leading archaeologists who work in Israel and Jordan today present timely and concise summaries of the archaeology of this region Chronologically organized each chapter outlines the major cultural transitions which occurred in a given archaeological

period To explain the processes which were responsible for culture change a review is made of the most recent research concerning settlement patterns innovations and technology religion and ideology and social organization The material culture of every period of human history in the Holy Land is explored from the earliest prehistoric hominids through the Biblical and historical periods and up to modern 20th century times Each chapter is accompanied by settlement pattern maps and a plate highlighting the major artifacts which archaeologists use to identify the material culture of the period In addition windows are presented which focus on major social issues and controversies such as The Agricultural Revolution the Israelite Conquest of Canaan and Ancient Metal Working and Social Change This volume should provide students and the general reader with a useful reference volume concerning the archaeology of societies which lived and live in the Holy Land The Oxford Handbook of Islamic Archaeology Bethany Walker, Timothy Insoll, Corisande Fenwick, 2020-10-27 Born from the fields of Islamic art and architectural history the archaeological study of the Islamic societies is a relatively young discipline With its roots in the colonial periods of the late 19th and early 20th centuries its rapid development since the 1980s warrants a reevaluation of where the field stands today This Handbook represents for the first time a survey of Islamic archaeology on a global scale describing its disciplinary development and offering candid critiques of the state of the field today in the Central Islamic Lands the Islamic West Sub Saharan Africa and Asia The international contributors to the volume address such themes as the timing and process of Islamization the problems of periodization and regionalism in material culture cities and countryside cultural hybridity cultural and religious diversity natural resource management international trade in the later historical periods and migration Critical assessments of the ways in which archaeologists today engage with Islamic cultural heritage and local communities closes the volume highlighting the ethical issues related to studying living cultures and religions Richly illustrated with extensive citations it is the reference work on the debates that drive the field today **The Levant in Transition: No. 4** P.J. [Handbook of Ancient Afro-Eurasian Economies](#) Sitta von Reden, 2023-10-24 The *Handbook of Ancient Afro-Eurasian Economies* offers in three volumes the first comprehensive discussion of economic development in the empires of the Afro-Eurasian world region to elucidate the conditions under which large quantities of goods and people moved across continents and between empires. Volume 3, *Frontier Zone Processes and Transimperial Exchange*, analyzes frontier zones as particular landscapes of encounter, economic development, and transimperial network formation. The chapters offer problematizing approaches to frontier zone processes as part of and in between empires, with the goal of better understanding how and why goods and resources moved across the Afro-Eurasian region. Key frontiers in mountains and steppes, along coasts, rivers, and deserts, are investigated in depth, demonstrating how local landscapes, politics, and pathways explain network practices and participation in long-distance trade. The chapters seek to retrieve local knowledge ignored in popular Silk Road models and to show the potential of frontier zone research for understanding the Afro-Eurasian region as a connected space.
