Handbook of Herbs and Spices K. V. Peter, 2004-03-23 This is a comprehensive handbook for food processors covering over 30 major herbs and spices. It is introduced with general information about the spices trade and quality and safety issues followed by details on individual herbs and spices. *Production, Development, Quality and Export of Seed Spices* S. K. Malhotra, 2007 Chemistry of Spices V. A. Parthasarathy, Bhageerathy Chempakam, T. John Zachariah, 2008 Spices are high value export oriented crops used extensively in food and beverage flavourings, medicines, cosmetics and perfumes. Interest is growing, however, in the theoretical and practical aspects of the biosynthetic mechanisms of active components in spices as well as the relationship between the biological activity and chemical structure of these secondary metabolites. A wide variety of phenolic substances and amides derived from spices have been found to possess potent chemopreventive, anti-mutagenic, anti-oxidant and anti-carcinogenic properties. Representing the first discussion of the chemical properties of a wide cross-section of important spices, this book covers extensively the three broad categories of plant-derived natural products: the terpenoids, the alkaloids and the phenyl propanoids and allied phenolic compounds. Spice crops such as black pepper, ginger, turmeric and coriander are covered with information on botany, composition, uses, chemistry, international specifications and the properties of a broad range of common and uncommon spices. **Handbook of Spices in India: 75 Years of Research and Development** P. N. Ravindran, K. Sivaraman, S. Devasahayam, K. Nirmal Babu, 2024-06-24 This compendium presents comprehensive information on more than 25 important spice crops commercially grown in India and traded globally, apart from over 40 spices that have the potential to be popularized. In 70 chapters, the book covers the achievements in research and development made in India for the past 75 years in various organizations including research institutes, agricultural universities and private sector laboratories. Spices are natural products of plant origin used primarily for flavouring and seasoning or for adding pungency and flavour to foods and beverages. The flavour and fragrance of Indian spices had a magic spell on human culture since very ancient days. The importance of spices in Indian life and its contribution to the economy are substantial. India, as the world's leading producer of spices, is also a significant stakeholder in spices export trade globally. Indian spices, being sources of many high-value compounds, are also gaining much importance for other diversified uses, especially for their pharmaceutical and nutraceutical properties. A wide variety of 52 spices are grown in India, including

black pepper chillies cardamom ginger turmeric cinnamon nutmeg garlic onion cumin coriander saffron and vanilla This book compiles a comprehensive holistic review on the subject written by the best experts in the field in India representing diverse agencies This book is a single point reference book for all those involved in the research study teaching and use of spices in India and abroad

Organic Spices Parthasarathy, V.A,2008-01-05 The global changes warranted fastness in food production system and fast foods In tune with demand crop production also oriented accordingly However the proverb Health is a Wealth is reminded us to keep vigil on system and method of food production and food safety The ill effect of conventional chemical based farming well documented and public realized the importance organically produced food and efforts are being made to popularize the organic production India is a Land of Spices each state or union territory in India cultivates one or other spice Since spices form a part of many medicines the demand for organically produced spices is increasing considerably Assuming a market growth of 10% in Europe USA and Japan for organic spice products the world demand for organic spices may grow to 57000 tonnes in the next 10 yeaLarge scale use of high analysis fertilizers and pesticides result environmental hazards and imbalances in soil nutrients Since spices are high valued and export oriented in nature it is imperative to keep the levels of pesticide residues below tolerance limits in view of the standards set by the importing countries Hence the book on Organic Spices is timely and covers all aspects of organic spice production The topic includes historical spice trade and importance of spices in food chain Brief account on organic agriculture movement in the world and its present status and opportunity for organic spices in the world market are given The chemistry and different methods of composting are included in the organic manures chapter will be informative Microbes play a greater role in agriculture a separate chapter devoted on microbes and plant growth promoting rhizobacteria would definitely enrich the readNot only that the topics on biological control of insect pests nematodes fungus and bacteria of spices highlighted in separate chapters would be of interest in organic production system The importance composition uses botany and varieties organic way of production of spices like black pepper cardamom ginger turmeric chillies and paprika nutmeg vanilla seed spices like cumin fennel fenugreek coriander and their harvest and post harvest processing are enumerated The chapters on good agricultural practices GAP and organic certification procedures outlined for adoption This would serve as a reference book for researchers teachers and students besides farmers traders and consumers
