Contributions from the United States National Herbarium ,2000      The Kew Record of Taxonomic Literature Relating to Vascular Plants for ... ,1994      **Tropical Rainforests and Agroforests under Global Change** Teja Tscharntke,Christoph Leuschner,Edzo Veldkamp,Heiko Faust,Edi Guhardja,Arifuddin Bidin,2010-02-04 not only for land use systems that depend on the regular supply of rain or irrigation water but also for the future development of natural rainforests as drought stress has been shown to affect tree growth and species composition in old growth forests Wright 1991 Walsh and Newbery 1999 Engelbrecht et al 2007 A drought experiment conducted in a cacao agroforestry plantation showed that this plantation was surprisingly resilient to an induced drought of more than a year Schwendenmann et al 2009 However droughts can have a strong impact on household incomes from agriculture they strongly affect the vulnerability to poverty and thus have to be analyzed as important exogenous shocks to households forcing them to adjust their behaviour and develop strategies to cope with these problems The stability of rainforest margins is a critical factor in the protection of tropical rainforests Tscharntke et al 2007 At present however rainforest margins in many parts of the tropics are far from stable both in socioeconomic and in ecological terms For example protected areas may attract rather than repel human settlement which may be due to international donor investment in national conservation programs Wittemeyer et al 2008 An alternative hypothesis is that protected areas might be compromised if leakage takes place that is if impacts that would take place inside the restricted area are displaced to a nearby undisturbed area Ewers and Rodrigues 2008      **The New Plantsman** ,1998      Tapirs Daniel M. Brooks,Richard E. Bodmer,Sharon Matola,1997 Descended from a long and ancient lineage tapirs are important tropical forest seed dispersers However today all species of tapirs are threatened to various degrees by habitat destruction and hunting This action plan was written with wildlife biologists ecologists administrators educators and local conservation officials in mind and is aimed at those countries with tapir populations It provides a brief natural history of each species and its objective is to aid in their conservation by catalyzing conservation action In addition it is hoped that the contents of the plan will stimulate further research into this fascinating group of animals
