but it also makes sense both economically and environmentally. It promotes healthy soils and plants which require less water and sequester more carbon a winning combination for both your bottom line and the planet's fight against resource depletion and global warming. Organic programs on a commercial scale have enormous potential to make a difference in the quality of our environment, our use of fuels and climate change. And as those who have already converted to organics have discovered, they also cost a lot less over the long term.

Organic Management for the Professional is the first comprehensive guide to going green in large scale landscaping. Nationally recognized organic gardening expert Howard Garrett with associates John Ferguson and Mike Amaranthus not only explains in detail how to manage projects with natural organic techniques but also presents the material in clear simple terms so that commercial and institutional property owners can understand what to ask of their landscape architects, contractors, growers and maintenance people. They give detailed proven instructions for the key components of organic landscaping: soil building, correct planting techniques, fertilizing, pest control, compost and mulch. Then they show how to apply these organic methods in large scale landscaping commercial growing such as orchards, tree farms, nurseries and greenhouse operations and recreational properties such as sports fields and parks.
