Mapping Latin America Jordana Dym,Karl Offen,2011-12-01 For many a map is nothing more than a tool used to determine the location or distribution of something a country a city or a natural resource But maps reveal much more to really read a map means to examine what it shows and what it doesn t and to ask who made it why and for whom The contributors to this new volume ask these sorts of questions about maps of Latin America and in doing so illuminate the ways cartography has helped to shape this region from the Rio Grande to Patagonia In Mapping Latin America Jordana Dym and Karl Offen bring together scholars from a wide range of disciplines to examine and interpret more than five centuries of Latin American maps Individual chapters take on maps of every size and scale and from a wide variety of mapmakers from the hand drawn maps of Native Americans to those by famed explorers such as Alexander von Humboldt to those produced in today s newspapers and magazines for the general public The maps collected here and the interpretations that accompany them provide an excellent source to help readers better understand how Latin American countries regions provinces and municipalities came to be defined measured organized occupied settled disputed and understood that is how they came to have specific meanings to specific people at specific moments in time The first book to deal with the broad sweep of mapping activities across Latin America this lavishly illustrated volume will be required reading for students and scholars of geography and Latin American history and anyone interested in understanding the significance of maps in human cultures and societies

**Rhumb Lines and Map Wars** Mark Monmonier,2010-11-15 In Rhumb Lines and Map Wars Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator s legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth s roundness As Monmonier shows mariners benefited most from Mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection s popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of one of cartography s most significant innovations With informed

skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps Rhumb Lines and Map Wars is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time Handbook of Engineering Hydrology (Three-Volume Set) Saeid Eslamian,2018-10-03 While most books examine only the classical aspects of hydrology this three volume set covers multiple aspects of hydrology and includes contributions from experts from more than 30 countries It examines new approaches addresses growing concerns about hydrological and ecological connectivity and considers the worldwide impact of climate change **Technology and Critical Literacy in Early Childhood** Vivian Maria Vasquez,Bryan Woods,Carol Branigan Felderman,2022-05-05 Now in its second edition this popular text explores classrooms where technology and critical literacies are woven into childhood curricula and teaching Using real world stories it addresses what ICTs afford critical literacy with young children and how new technologies can be positioned to engage in meaningful and authentic learning Concise but comprehensive the text provides strategies theoretical frameworks demonstrations of practice and resources for teachers Updated with discussions of media literacy and new pedagogical tools the second edition features new classroom examples and experiences that highlight the ways in which critical literacy technology and media literacy come together in everyday life in the early childhood classroom The inviting examples model how to use the interests and inquiry questions of young learners as a springboard for creating a critical curriculum Each chapter includes Reflection Points pedagogical invitations and Resource Boxes to imagine new possibilities of working with students in engaging and supportive ways The inspiring stories guidance and tools this book make it a great resource for pre service teachers and students in Early Childhood Education and Literacy Education and primary teachers and educators **Practical Handbook of Thematic Cartography** Nicolas Lambert,Christine Zanin,2020-05-10 Maps are tools used to understand space discover territories communicate information and explain the results of geographical analysis This practical handbook is about thematic cartography With more than 120 colorful amazing illustrations numerous boxed texts definitions and helpful tools this step by step introduction to cartography is both the art of understanding the world and a powerful tool for explaining it Through many hands on tests the reader will learn how to produce an interesting and communicative map applied to any spatial theme Written by experienced scholars and experts in cartography this book is an excellent resource for undergraduate students and non cartographers interested in designing understanding and interpreting maps It includes practical exercises explained in the form of a game and provides a concise accessible and current address of cartographic principles allowing readers to go deeper into cartographic design It can be read from beginning to end like an essay or just by dipping into it for information as needed Mapping the End Times Dr Jason Dittmer,Dr Tristan Sturm,2012-11-28 Over

the last quarter century evangelicalism has become an important social and political force in modern America Here new voices in the field are brought together with leading scholars such as William E Connolly Michael Barkun Simon Dalby and Paul Boyer to produce a timely examination of the spatial dimensions of the movement offering useful and compelling insights on the intersection between politics and religion This comprehensive study discusses evangelicalism in its different forms from the moderates to the would be theocrats who in anticipation of the Rapture seek to impose their interpretations of the Bible upon American foreign policy The result is a unique appraisal of the movement and its geopolitical visions and the wider impact of these on America and the world at large      *Mapping the Cold War* Timothy Barney,2015-04-13 In this fascinating history of Cold War cartography Timothy Barney considers maps as central to the articulation of ideological tensions between American national interests and international aspirations Barney argues that the borders scales projections and other conventions of maps prescribed and constrained the means by which foreign policy elites popular audiences and social activists navigated conflicts between North and South East and West Maps also influenced how identities were formed in a world both shrunk by advancing technologies and marked by expanding and shifting geopolitical alliances and fissures Pointing to the necessity of how politics and values were spatialized in recent U S history Barney argues that Cold War era maps themselves had rhetorical lives that began with their conception and production and played out in their circulation within foreign policy circles and popular media Reflecting on the ramifications of spatial power during the period Mapping the Cold War ultimately demonstrates that even in the twenty first century American visions of the world and the maps that account for them are inescapably rooted in the anxieties of that earlier era      *Globalization, Language, and Culture* Richard Lee,2006 Globalization is a complex phenomenon that has deep ties in the past movement of people and ideas around the world While many people voice the fear that the power of Western culture and in particular American culture will overwhelm or even obliterate indigenous cultures and languages this author argues that the impact of culture is never a one way street The interconnectedness of the modern world allows input from the United States to the rest of the world and at the same time allows the movement of ideas and people from faraway countries to our shores Book jacket      *CULTURAL GEOGRAPHY IN PRACTICE* Miles Ogborn,Alison Blunt,Pyr Gruffudd,David Pinder,2014-04-23 Cultural Geography in Practice provides an innovative and accessible approach to the sources theories and methods of cultural geography Written by an international team of prominent cultural geographers all of whom are experienced researchers this book is a fully illustrated guide to methodological approaches in cultural geography In order to demonstrate the practice of cultural geography each chapter combines the following features Practical instruction in using one of the main methods of cultural geography e g interviewing interpreting texts and visual images participatory methods An overview of a key area of concern in cultural geography e g the body national identity empire marginality A nuts and bolts description of the actual application of the theories and methods within a piece of research With the addition of boxed definitions of key concepts and

descriptions of research projects by students who devised and undertook them Cultural Geography in Practice is an essential manual of research practice for both undergraduate and graduate geography students *Rethinking Globalization* Bill Bigelow, Bob Peterson, 2002 *Rethinking Globalization* offers an extensive collection of readings and source material on critical global issues **Producing the Pacific** Mercedes Maroto Camino, 2005 This volume offers the reader an interdisciplinary reading of the maps narratives and rituals related to the three Spanish voyages to the South Pacific that took place between 1567 and 1606 These journeys were led by Alvaro de Mendana Pedro Fernandez de Quiros and Isabel Barreto the first woman ever to become admiral of and command a fleet Mercedes Maroto Camino presents a cultural analysis of these journeys and takes issue with some established notions about the value of the past and the way it is always rewritten from the perspective of the present She highlights the social political and cultural environment in which maps and narratives circulate suggesting that their significance is always subject to negotiation and transformation *The Telling Image* Lois Farfel Stark, 2018-02-06 Next Generation Indie Book Awards Best Non Fiction 2019 National Indie Excellence Award Winner Nautilus Book Awards Gold 1 Amazon Best Seller in Architecture History Periods Amazon Best Seller in Art Subjects Themes *Seeing the World Through Shape* How do humans make sense of the world In answer to this timeless question award winning documentary filmmaker Lois Farfel Stark takes the reader on a remarkable journey from tribal ceremonies in Liberia and the pyramids in Egypt to the gravity defying architecture of modern China Drawing on her experience as a global explorer Stark unveils a crucial hidden key to understanding the universe *Shape itself The Telling Image* is a stunning synthesis of civilization s changing mindsets a brilliantly original perspective urging you to re envision history not as a story of kings and wars but through the lens of shape In this sweeping tour through time Stark takes us from migratory humans who imitated a web in round thatched huts and stone circles to the urban ladder of pyramids and skyscrapers organized by hierarchy and measurements to today s world of interconnected networks In *The Telling Image* Stark reveals how buildings behaviors and beliefs reflect humans search for pattern and meaning We can read the past and glimpse the future by watching when shapes shift Stark s beautifully illustrated book asks of all its readers See what you think
