Seeing Red:

Seeing Red Kirsten Karchmer, 2019-11-12 A world renowned women's health expert reveals a bold practical and data driven handbook for menstrual periods that provides an easy to navigate roadmap for improving your reproductive health and your everyday quality of life We've been lied to about periods PMS cramping bloating migraines irritability and anxiety may be extremely common but contrary to popular belief they aren't normal And they certainly aren't just part of being a woman despite the fact that this is what we've been told time and time again by friends family and even doctors After dedicating her entire clinical career to deconstructing the menstrual cycle women's health expert Kirsten Karchmer knows better During her more than twenty years of research and treating thousands of patients Karchmer found that most period problems women experience even the most painful ones are totally correctable and more surprisingly reflective of overall health and fertility In this forthright spirited and all encompassing guide Karchmer draws on her decades worth of experience as a women's health expert to break down the myths so many women have been led to believe about their periods For the more than 82 million women in the world who suffer from menstrual conditions Seeing Red explains the importance of a healthy menstrual cycle and how to achieve it and why it is important to the women's movement Menstrual cycles are not a curse but an instrument providing women with one of the most valuable regularly occurring and free diagnostic tools they have giving them access to unprecedented health and power

Seeing Red Cars Laura Goodrich, 2011-02-07 Surely you've experienced something like this you buy a red car and suddenly red cars appear everywhere Why Because you're focusing on red cars and you get more of whatever you focus on But much of the time consciously and unconsciously we dwell on what we don't want and that's what we get Drawing on the latest scientific research Laura Goodrich shows you how to stop fixating on negatives and rewire your brain to focus on positive outcomes Unique and practical exercises including a free online toolkit and dozens of enlightening real life stories help you identify what you truly want so that it drives everything you do And Goodrich shows how Seeing Red Cars can build organizational cultures in which employees are playing to their passions and strengths focusing on what they want and achieving breakthrough results Psychoanalysis, Scientific Method, and Philosophy

Sidney Hook, 1990-01-01 This book records one of the few times in the United States that a distinguished group of psychoanalysts met with an equally distinguished group of philosophers of science in a free critical interchange of view on the scientific status of the field

Bioluminescence Marc Zimmer, 2015-08-01 What do giant squids mantis shrimp and fireflies have in common These animals along with a wide range of creatures are able to give off light this is called bioluminescence Different species use different chemistries to bioluminesce and they produce their light for a variety of reasons including communication hunting and self defense Bioluminescence is a unique and fascinating adaptation found in the animal kingdom Surprisingly about half of all known phyla a classification for animals that share the same body type contain some bioluminescent species Scientists

don't yet understand all facets of bioluminescence but they have managed to harness the glow and use it in a myriad of ways. One of the most important applications involves using bioluminescence as a microscope in medical studies. For example, laboratory scientists can create fluorescent malaria parasites to track the path by which the disease is spread from a mosquito to the animal it bites. Bioluminescent proteins are also helping researchers learn more about cancer, HIV, and other viruses and complex neurological processes. In fact, bioluminescent proteins are so useful to twenty-first-century medicine that two groups of scientists, one in 2008 and the other in 2014, were awarded the Nobel Prize in Chemistry for their work with these proteins and related technologies. Even artists and fashion designers use bioluminescence in their work to create glowing, light-sensitive paintings and clothing lines.

Author: Marc Zimmer, a world-renowned specialist in fluorescent proteins, takes readers on a glowing journey into the frontiers of bioluminescence.

The Matter of Consciousness Torin Andrew Alter, 2023 Torin Alter makes a compelling case against the view that consciousness is a physical phenomenon. He argues that Frank Jackson's knowledge argument refutes all standard versions of physicalism and leads to Russellian monism, the view that there are intrinsic properties which both constitute consciousness and underlie properties described by physics.

David Levy's Guide to Variable Stars David H. Levy, 2005-12-15 Variable stars are fascinating objects to observe, found all over the sky. They change in brightness over time and can be seen with even the most basic of equipment. Variable star astronomy is one field in which amateur astronomers can still make significant contributions to science, and in this highly accessible book, David Levy teaches the reader how variable stars work and how to observe them. Using simple, non-technical terms, he explains how to get started with electronic or CCD observing, as well as how to observe variable stars through a small telescope or binoculars. Including a section on Southern Hemisphere stars, the book covers various types of objects that can be observed by amateur astronomers, including more exotic phenomena like gamma-ray bursts, blazars, and pulsars. This book will serve to motivate anyone with even a basic interest in astronomy to begin observing these fascinating objects.

Sticky Stingers Norm Thabit, 2005-11 All of her life, people have given Leezel strange stares. Her name is odd. Her family is odd. Her power is odd. But her life at the White Guildhall is worse. For Leezel has an enemy there: the Guild Master herself. Everyone expected her to develop a Grader's Sight, but that wasn't the gift she was endowed with. She got Empathy, and it didn't improve her life. The Masters, who should have been training her in Healing, pushed at her to learn her Empathy instead. So Leezel, Master apprentice Healer and Empath, was hopeful and even prepared for a new life if only because it would mean leaving this one. But there are some things for which you can never prepare. Leezel is suddenly mated to the most powerful man ever known, living in a tree in a valley full of HornCats. Master apprentice Leezel, the young woman that would become The Lady Leezel, will need every gift she has.

Complex Networks VIII Bruno Gonçalves, Ronaldo Menezes, Roberta Sinatra, Vinko Zlatić, 2017-03-01 This book collects the works presented at the 8th International Conference on Complex Networks, CompleNet 2017, in Dubrovnik, Croatia, on March 21-24, 2017. CompleNet aims at bringing together

researchers and practitioners working in areas related to complex networks The past two decades has witnessed an exponential increase in the number of publications within this field From biological systems to computer science from economic to social systems complex networks are becoming pervasive in many fields of science It is this interdisciplinary nature of complex networks that CompleNet aims at addressing The last decades have seen the emergence of complex networks as the language with which a wide range of complex phenomena in fields as diverse as physics computer science and medicine to name a few can be properly described and understood This book provides a view of the state of the art in this dynamic field and covers topics such as network controllability social structure online behavior recommendation systems and network structure
