History as a Science Jan van der Dussen,2020-05-11 Since its appearance in 1981 History as a Science by Jan van der Dussen has been welcomed as a coherent and comprehensive study of the many aspects of Collingwood s philosophy of history including its development and reception The book was the first to pay attention to Collingwood s unpublished manuscripts and to his work as an archaeologist and historian herewith opening up a new angle in Collingwood studies The republication of this volume meets an increasing demand to make the book available for future Collingwood scholars and people interested in Collingwood s philosophy The present edition of History as a Science includes updated references to the published manuscripts and an added preface Celts, Romans, Britons Francesca Kaminski-Jones,Rhys

Kaminski-Jones,2020-09-29 This interdisciplinary volume of essays examines the real and imagined role of Classical and Celtic influence in the history of British identity formation from late antiquity to the present day In so doing it makes the case for increased collaboration between the fields of Classical reception and Celtic studies and opens up new avenues of investigation into the categories Celtic and Classical which are presented as fundamentally interlinked and frequently interdependent In a series of chronologically arranged chapters beginning with the post Roman Britons and ending with the 2016 Brexit referendum it draws attention to the constructed and historically contingent nature of the Classical and the Celtic and explores how notions related to both categories have been continuously combined and contrasted with one another in relation to British identities Britishness is revealed as a site of significant Celtic Classical cross pollination and a context in which received ideas about Celts Romans and Britons can be fruitfully reconsidered subverted and reformulated Responding to important scholarly questions that are best addressed by this interdisciplinary approach and extending the existing literature on Classical reception and national identity by treating the Celtic as an equally relevant tradition the volume creates a new and exciting dialogue between subjects that all too often are treated in isolation and sets the foundations for future cross disciplinary conversations

How Ancient Europeans Saw the World Peter S. Wells,2012-08-26 A revolutionary approach to how we view Europe s prehistoric culture The peoples who inhabited Europe during the two millennia before the Roman conquests had established urban centers large scale production of goods such as pottery and iron tools a money economy and elaborate rituals and ceremonies Yet as Peter Wells argues here the visual world of these late prehistoric communities was profoundly different from those of ancient Rome s literate civilization and today s industrialized societies Drawing on startling new research in neuroscience and cognitive psychology Wells reconstructs how the peoples of pre Roman Europe saw the world and their place in it He sheds new light on how they communicated their thoughts feelings and visual perceptions through the everyday tools they shaped the pottery and metal ornaments they

decorated and the arrangements of objects they made in their ritual places and how these forms and patterns in turn shaped their experience How Ancient Europeans Saw the World offers a completely new approach to the study of Bronze Age and Iron Age Europe and represents a major challenge to existing views about prehistoric cultures The book demonstrates why we cannot interpret the structures that Europe s pre Roman inhabitants built in the landscape the ways they arranged their settlements and burial sites or the complex patterning of their art on the basis of what these things look like to us Rather we must view these objects and visual patterns as they were meant to be seen by the ancient peoples who fashioned them
