 Adults and youth who are engaged in social and ecological justice in community and educational work will find this book a critical overview of the role played by adults in the joint endeavours of adults and youth. Through various case studies, the book offers a glimpse into the work being undertaken by a wide range of international educators and community development workers where common themes emerge across the different sites. The book explores the development of and the internal and external constraints upon adult and youth emancipatory practices, as well as the effective adult and youth beliefs and actions that facilitate collaborative leadership in issues of social and ecological justice. The authors offer a critical examination of the degree to which youth are able to participate in decision-making processes or to the extent to which they were given space and power to truly explore democratic and dialogic partnerships. With an emphasis on the power dynamics inherent in adult-youth relationships and the potential of these relationships to engage in democratic transformation, the book examines the patterns, benefits, and limitations of the youth-adult connections.

Expanding Curriculum Theory William M. Reynolds, Julie A. Webber, 2016-04-28  
 Expanding Curriculum Theory Second Edition carries through the major focus of the original volume to reflect on the influence of Deleuze and Guattari's concept of lines of flight and its application to curriculum theorizing. What is different is that the lines of flight have since shifted and produced expanded understandings of this concept for curriculum theory and for education in general. This edition reflects the impact of events that have contributed to this shift, in particular the il logic of school policy changes and reforms in the past decade and the continued explosion of social media and its effect on the collective understanding of how both knowledge and education work as forms of repression. The introduction updates the text and puts it into current debates in the field and in the larger socio-economic milieu. New positions are presented that explore central questions circulating within and outside curriculum studies. Exciting scholarship on a range of topics includes notions of desire and commodities, youth culture and violence, new directions in curriculum theory, Eco-Ethical consciousness, new Deleuzian views of normality, the diffusion of technology, and lines of flight in transnational curriculum inquiry.
