the intrusion of theological understandings has become harder to resist it offers a narrative of belief following the direction of an exemplary portent the finger Through the exploration of broad trends in culture and modern history this study informed by interactionist thought examines both the place of sociology in Christian theology and the failure of theology to connect to its surrounding culture asking how the two disciplines might meld profitably together As such it will appeal to social theorists and theologians as well as sociologists with interests in religion culture and secularisation

The New Visibility of Religion Graham Ward, Michael Hoelzl, 2008-10-09 Since the late 1980s sociologists have been drawing our attention to an international surge in the public visibility of religion This has increasingly challenged two central aspects of modern western European culture first the assumption that as we became more modern we would become more secularised and religion would disappear and secondly that religion and politics should occupy radically differentiated spheres in which private conviction did not exert itself within the public realm The new visibility of religion is not simply a matter of what Keppel famously called The Revenge of God that is the resurgence of Christian Islamic and Jewish

fundamentalism Religion is permeating western culture in many different forms from contemporary continental philosophy the arts and the media to the rhetoric of international politicians This collection of essays brings together a unique collection of voices from theology aesthetics social and political science philosophy and cultural theory in an exploration of four major aspects of this new visibility of religion the revision of the secularisation thesis the relationship between religion and violence the new re enchantment of reality and the return of metaphysics The exploration is conducted through essays by and interviews with figures at the forefront of reflecting upon this major cultural shift and its implications It is distinctively multidisciplinary examining the phenomenon of the rise of religion in Western Europe from a number of interrelated perspectives
