Seizure of the Gilberts and Marshalls deals with amphibious warfare as waged by American forces against the Japanese held atolls of the Central Pacific during World War II The word amphibious as here used includes the landing and supply of troops in combat as well as the air and naval support of the operations The atoll operations described in this volume were amphibious from beginning to end They were not simple seaborne hit and run raids of the Dieppe type The objective was to secure the atolls as steppingstones to the next advance The islands were relatively small permitting continual naval and air support of the ground operations Some outstanding examples of the co ordination of fire support by artillery naval gunfire and air are found in this book The advantages of simple plans and the disadvantages of the more complicated will stand out for the careful reader The story of the capture of these atolls of Micronesia offers some of the best examples of combined operations that are available in the annals of modern war Ground sea and air components were always present and the effectiveness with which they were combined and co ordinated accounts in large measure for the rapid success enjoyed in these instances by American arms Units of the U S Navy and the U S Marine Corps were active participants in the operations and the role they played is treated in this volume as fully as is considered appropriate in a series devoted to the history of the U S Army in World War II From the point of view of strategy the significance of this volume lies in the fact that it tells the story of the beginnings of the drive across the Central Pacific toward the Japanese homeland This concept of defeating Japan by pushing directly westward from Hawaii through the island bases of the mid Pacific was traditional in American strategic thinking but had never been put to test and was seriously challenged in some quarters As is shown here the test was first made in the campaigns against the Gilberts and Marshalls the outcome was successful and the experience gained was of inestimable value in planning for the subsequent conduct of the war in the Pacific **Seizure of the Gilberts and Marshalls** ,1955 *The War in the Pacific* ,1955

U.S. Naval Gunfire Support in the Pacific War Donald K. Mitchener, 2021-07-28 On November 20 1943 the U S military invaded the Tarawa Atoll of the Gilbert Islands as part of the first American offensive in the Central Pacific region during World War II This invasion marked more than one first as it was also the introductory test of a doctrine developed during the interwar years to address problems inherent in situations in which amphibious assaults required support by naval gunfire rather than land based artillery In this detailed study Donald K Mitchener documents and analyzes the prewar development of this doctrine as well as its application and evolution between the years 1943 1945 The historical consensus is that the test

at Tawara was successful and increased the efficiency with which U S forces were able to apply the doctrine in the Pacific theater for the remainder of the Second World War Mitchener challenges this view arguing that the reality was much more complex He reveals that strategic concerns often took precedence over the lessons learned in the initial engagement and that naval planners failure to stay up to date with the latest doctrinal developments and applications sometimes led them to ignore these lessons altogether U S Naval Gunfire Support in the Pacific War presents an important analysis that highlights the human cost of misinterpreting strategic and tactical realities *United States Army in WWII - the Pacific - Seizure of the Gilberts and Marshalls* Philip A. Love,1995 *Seizure of the Gilberts and Marshalls* United States Army Center of Military History,2015-02-10 A study in amphibious warfare that describes how the imperfections of American amphibious doctrine first revealed at Tarawa and Makin were corrected in the highly successful landings on Kwajalein and Roi Namur *Eagle Against the Sun* Ronald H. Spector,2020-11-03 The best book by far on the Pacific War The New York Times Book Review this classic one volume history of World War II in the Pacific draws on declassified intelligence files British American and Japanese archival material and military memoirs to provide a stunning and complete history of the conflict This superbly readable insightful gripping Washington Post Book World contribution to WWII history combines impeccable research with electrifying detail and offers provocative interpretations of this brutal forty four month struggle Author and historian Ronald H Spector reassesses US and

Japanese strategy and shows that the dual advance across the Pacific by MacArthur and Nimitz was more a pragmatic solution to bureaucratic doctrinal and public relations problems facing the Army and Navy than a strategic calculation. He also argues that Japan made its fatal error not in the Midway campaign but in abandoning its offensive strategy after that defeat and allowing itself to be drawn into a war of attrition. Spector skillfully takes us from top secret strategy meetings in Washington, London, and Tokyo to distant beaches and remote Asian jungles with battle-weary GIs. He reveals that the US had secret plans to wage unrestricted submarine warfare against Japan months before Pearl Harbor and shows that MacArthur and his commanders ignored important intercepts of Japanese messages that would have saved thousands of lives in Papua and Leyte. Throughout, Spector contends that American decisions in the Pacific War were shaped more often by the struggles between the British and the Americans and between the Army and the Navy than by strategic considerations. Spector vividly recreates the major battles, little-known campaigns, and unfamiliar events leading up to the deadliest air raid ever, adding a new dimension to our understanding of the American war in the Pacific and the people and forces that determined its outcome.

Over the Beach Donald W. Boose, 2008. Over the Beach, written by historian and retired Army Colonel Donald W. Boose Jr., is the definitive history of the extensive but little-known US Army amphibious operations during the Korean War, 1950-1953. Building on its extensive experience in World War II, the Army conducted three major landing operations during the war, including the assault at Inchon in September 1950. After the massive Chinese attacks two months later, the Army executed a series of amphibious withdrawals as it fell back to more defensible positions farther down the peninsula. Throughout the war, the Army also conducted a number of massive and complex over-the-shore logistical operations as well as several amphibious special operations along the Korean littoral. Colonel Boose's work, commissioned by DAMO ODG Operations and Technology Office, provides the historical context for any subsequent amphibious operations on the Korean peninsula. As such, this thought-provoking study may provide insights to modern planners crafting future joint or combined operations in that part of the world. Publisher's Description
