cultural traditions grassroots and regional organizations and economic constraints on the expression of rights The book asks are human rights western in their inception are they universal or do they differ by region and culture The 1949 Geneva Conventions Andrew Clapham, Paola Gaeta, Marco Sassòli, 2015-10-15 The four Geneva Conventions adopted in 1949 remain the fundamental basis of contemporary international humanitarian law They protect the wounded and sick on the battlefield those wounded sick or shipwrecked at sea prisoners of war and civilians in time of war However since they were adopted warfare has changed considerably In this groundbreaking commentary over sixty international law experts investigate the application of the Geneva Conventions and explain how they should be interpreted today It places the Conventions in the light of the developing obligations imposed by international law on states armed groups and individuals most notably through international human rights law and international criminal law The context in which the Conventions are to be applied and interpreted has changed considerably since they were first written The borderline between international and non international armed conflicts is not as clear cut as was once thought and is complicated further by the use of armed force mandated by the United Nations and the complex mixed and transnational nature of certain non international armed conflicts The influence of other developing branches of international law such as human rights law and refugee law has been considerable The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions This commentary adopts a thematic approach to provide detailed analysis of each key issue dealt with by the Conventions taking into account both judicial decisions and state practice Cross cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the meaning of the Geneva Conventions in their contemporary context Prepared under the auspices of the Geneva Academy of International Humanitarian Law and Human Rights this commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts The Development of Human Rights Law by the Judges of the International Court of Justice Shiv R.S. Bedi, 2007-01-18 The jurisprudence of the International Court of Justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights Through its case law the ICJ has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force Part I of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity Furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine Hence human rights law is more a school of law than merely a normative branch of international law and the ICI s willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to In order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the ICJ Parts II and III critically examine the Court's principal contentious and advisory cases in which it has treated human rights questions The legal reasoning of the Court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights The Universal **Declaration of Human Rights** Gudmundur Alfredsson, Asbjørn Eide, 2023-06-26 This volume celebrates the 50th anniversary of the Universal Declaration of Human Rights UDHR In so doing it offers a comprehensive and systematic treatment of the rights and duties contained in the UDHR in the light of its history the intentions of its drafters ant the standard setting activities and monitoring efforts which have grown out of its existence Each article of the UDHR is treated in a separate chapter each chapter is written by different authors all scholars from or associated with the Nordic countries all active in human rights work either academically or in the field A consolidated bibliography completes the collection The subtitle of this volume is A Common Standard of Achievement a phrase drawn from the Preamble of the UDHR In many ways this collection is intended to demonstrate that this phrase has to a considerable extent come true International Organizations, Constitutional Law, and Human Rights John S. Gibson, 1991-09-30 Since World War II remarkable progress has been made toward establishing more effective international laws and organizations to reduce opportunities for confrontation and conflict and to enhance the pursuit of security and well being This book offers a detailed record of that progress as well as its meaning for our times and those ahead Taking a historical theoretical and case study approach John Gibson provides the reader with a broad understanding of how international organizations evolved to serve the interests of their member states how the constitutional charters of organizations provide a coherent statement of goals and means to goals and how these organizations are assuming increasing authority in the international system The work traces the progression of international constitutional and human rights law with an emphasis on the past 45 years In the first part Gibson discusses the historic processes of political relations and mutual reliance the evolution of these patterns through World War II the subsequent history of the United Nations the prime goals of international constitutional law and the organizations range of authority from the high state to the supra organization level Part two offers a case study of the progression of international human rights law Separate chapters trace the history of human rights in religion and philosophy and the role of the state in international law while the concluding chapter on the United Nations Commission on Human Rights demonstrates how organizations actually function This book will be a valuable resource for courses in international relations and international law as well as an important addition to academic and professional libraries
