Historical Review of Aircrew Selection Robert R. Burwell,1957 *A New Beginning in Sight* Eric J Arnott,2006-11-20
Consultant eye surgeon Eric Arnott was one of the original pioneers of small incision surgery He was the first to perform modern Phaco surgery in Europe and designed lens implants that have restored the sight to millions of patients The word autobiography is simply insufficient to describe this book which is a remarkable testament to the life works and marriage of a remarkable man The book details the original invention of the lens implant by Harold Ridley who Eric worked with in his early years of medical training It goes on to follow the development of small incision Phaco surgery instigated by Charlie Kelman and the disinterest and contempt held by the peers of these ophthalmologic pioneers The author describes every advance in this field of ophthalmology in fascinating detail The importance to Eric of religion spirituality family life and helping others less fortunate than himself is reinforced in this enthralling and at times very amusing read Arnott draws you into his narrative rousing thoughts of disbelief as you are compelled to continue reading each new chapter and event in his life proving as fascinating as the last Entertaining and illuminating *A New Beginning in Sight* provides a detailed history of ophthalmology and is essential reading for ophthalmologists other specialists and non specialists alike [Military Personnel](#)

Tupolev TU-22 Sergey Burdin,2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961 It remained in service until replaced by the much modified Tu 22M Backfire which was introduced in the early 1970s and still remains in service It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role carrying either conventional or nuclear bombs The early aircraft had a range of 1 800 miles but later models had a much increased radius of action through the introduction of in flight refuelling This

book looks at the design and development of the aircraft up to the introduction of the type M Backfire Details of construction weapon systems photo reconnaissance and jamming equipment are included to cover the several variant models Operational use is explained and the text includes many first hand accounts from Russian aircrew of the period The book will be superbly illustrated by unique official photographs and manuals

Indefinite Reenlistment and Noncommissioned Officers

Laura L. Miller, 2007 In 1998 following congressional approval the U S Army shifted its senior enlisted force from a fixed contract system to indefinite reenlistment theoretically increasing the prestige of senior noncommissioned officers NCOs by recognizing them as career soldiers The Army program requires all soldiers reaching the rank of E 6 with ten years of service to reenlist indefinitely mirroring the management of officers and eliminating reenlistment paperwork The Army has been the only service to adopt this program This study analyzes past and present arguments for and against this policy made by service representatives policymakers and enlisted personnel Reservations about the program include concerns that force planning could be complicated by the unpredictability of NCO separation dates that the quality of the NCO corps could decline without reenlistment screening and that retention and morale could suffer with the loss of reenlistment bonuses and other benefits The intended program boost to NCO morale does not appear to have been realized This report concludes that neither the costs nor benefits of indefinite reenlistment are strong enough to merit a change in policy for either the Army or the other services An appendix provides an overview of indefinite reenlistment programs in other Western nations
