No Miracles Here Fighting Urban Decline In Japan And The United States:

No Miracles Here Theodore J. Gilman, 2001-01-11 Compares urban revitalization efforts in two cities with failing industrial bases one in the United States and the other in Japan *No Miracles Here* Theodore J. Gilman, 2001-01-11 This probing comparison of two struggling company towns one in Japan and one in the United States offers valuable urban revitalization lessons The author compares urban revitalization efforts in Flint Michigan the declining automobile industry town and Omuta Fukuoka Prefecture home of the largest coal mine in Japan from the early 1970s through the early 1990s Striking similarities emerge both in the way redevelopment policy is made and in policy content For example both cities work to create new jobs attract tourism and diversify their economic bases Despite these similarities there are also differences that help the Japanese do a better job of managing socioeconomic decline Notably the Japanese system is better suited to effecting incremental improvements in local socioeconomic conditions while the American system often takes the big gamble that if successful dramatically improves conditions This gamble however can also result in a failure to reverse a city's economic decline *No Miracles Here* finds that although Japanese and American cities rarely achieve truly successful revitalization the Japanese have been more successful at avoiding the pitfalls of bad redevelopment policy [Urban Spaces in Japan](#) Christoph Brumann, Evelyn Schulz, 2012 *Urban Spaces in Japan* explores the workings of power money and the public interest in the planning and design of Japanese space Through a set of vivid case studies of well known Japanese cities including Tokyo Kobe and Kyoto this book examines the potential of civil society in contemporary planning debates Further it addresses the implications of Japan's biggest social problem the demographic decline for Japanese cities and demonstrates the serious challenges and exciting possibilities that result from the impending end of Japan's urban growth Presenting a synthetic approach that reflects both the physical aspects and the social significance of urban spaces this book scrutinizes the precise patterns of urban expansion and shrinkage In doing so it also summarizes current theories of public space urban space and the body in space which are relevant to both Japan and the wider international debate With detailed case studies and more general reflections from a broad range of disciplines this collection of essays demonstrates the value of cross disciplinary cooperation As such it is of interest to students and scholars of geography and urban planning as well as history anthropology and cultural studies **Governance and Leadership in Shrinking Cities** Stanisław Mazur, 2023-08-24 The aim of this publication is to look in depth at depopulation a trend that is affecting an increasing number of cities worldwide It has recently become a critical issue with a range of detrimental social economic spatial and financial consequences However attempts by central and local governments to combat depopulation have yet to yield satisfactory results Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions mobilizing resources and creating networks to address the problem has been underestimated Moreover according to the authors of this monograph there is a significant positive correlation between urban leadership and the ability to effectively

respond to and counteract the negative effects of depopulation Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation it is impossible to pursue effective public policies in this regard This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives Further the book provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists planners social geographers economists and architects

Living Cities in Japan André Sorensen, Carolin Funck, 2007 Over the last fifteen years local citizens movements have spread rapidly throughout Japan This volume examines the growth and nature of civil society participation in local urban and environmental governance

Demolition Means Progress Andrew R. Highsmith, 2015-07-06 Tracks the fall of Flint Michigan once one of the nation's greatest industrial towns now one of its poorest cities compelling and powerful Kevin Boyle National Book Award winning author of *Arc of Justice* In 1997 after General Motors shuttered a massive complex of factories in the gritty industrial city of Flint Michigan signs were placed around the empty facility reading *Demolition Means Progress* suggesting that the struggling metropolis could not move forward to greatness until the old plants met the wrecking ball Much more than a trite corporate slogan the phrase encapsulates the operating ethos of the nation's metropolitan leadership from at least the 1930s to the present Again and again the leaders of Flint and other municipalities tried to revitalize their communities by demolishing outdated and inefficient structures and institutions and overseeing numerous urban renewal campaigns many of which yielded only more impoverished and more divided metropolises After decades of these efforts the dawn of the twenty first century found Flint one of the most racially segregated and economically polarized metropolitan areas in the nation In one of the most comprehensive works yet written on the history of inequality and metropolitan development in modern America Andrew R Highsmith uses the case of Flint to explain how the perennial quest for urban renewal even more than white flight corporate abandonment and other forces contributed to mass suburbanization racial and economic division deindustrialization and political fragmentation Challenging much of the conventional wisdom about structural inequality and the roots of the nation's urban crisis *Demolition Means Progress* shows in vivid detail how public policies and programs designed to revitalize the Flint area ultimately led to the hardening of social divisions Brilliantly narrates the entire arc of 20th century American industrialization at the scale of a single city Flint Michigan and its suburbs a remarkable book Robert Self author of *American*

Babylon Race and the Struggle for Postwar Oakland

Japanese Contemporary Politics Akio Igarashi, 2018-06-27 In the postwar period Japanese politics has evolved considerably with issues of gender representation and household economics becoming increasingly salient Meanwhile since the end of the Cold War Japan has joined other developed states in the process of decentralization and deindustrialization Yet its restructuring has come at a slower pace as the Japanese bureaucracy attempts to retain a more traditional approach This book a translated and updated version of the author s 2010 monograph *Nihon seijiron* traces these developments in Japanese politics from the end of the Asia Pacific wars to the present day Examining each of the key stages of transition it looks at four aspects of Japanese politics high politics interest centered politics life centered politics and globalization It also provides up to date analysis of contemporary themes including the Abe administration s challenge to international politics and coverage of nuclear issues Written by an experienced Japanese scholar this book ultimately demonstrates how globalization has transformed the nature of local politics as well as national security However as seen in the recent triple disaster of 2011 a chapter on which has been added Japanese politics retains traditional practices that have led to corruption scandal and political mistrust among the electorate Offering a comprehensive introduction to Japanese politics this book will be invaluable reading for students and scholars of Japanese politics and comparative and Asia politics in general

Statistical Methods for Spatial Planning and Monitoring

Silvestro Montrone,Paola Perchinunno,2012-10-23 The book aims to investigate methods and techniques for spatial statistical analysis suitable to model spatial information in support of decision systems Over the last few years there has been a considerable interest in these tools and in the role they can play in spatial planning and environmental modelling One of the earliest and most famous definition of spatial planning was a geographical expression to the economic social cultural and ecological policies of society borrowing from this point of view this text shows how an interdisciplinary approach is an effective way to an harmonious integration of national policies with regional and local analysis A wide range of spatial models and techniques is also covered spatial data mining point processes analysis nearest neighbor statistics and cluster detection Fuzzy Regression model and local indicators of spatial association all of these tools provide the policy maker with a valuable support to policy development *Many Urbanisms* Martin J. Murray,2022-02-15 Winner 2023 Choice Outstanding Academic Title Now for the first time in history the majority of the world s population lives in cities But urbanization is accelerating in some places and slowing down in others The sprawling megacities of Asia and Africa as well as many other smaller and medium sized cities throughout the Global South are expected to continue growing At the same time older industrial cities in wealthier countries are experiencing protracted socioeconomic decline Nonetheless mainstream urban studies continues to treat a handful of superstar cities in Europe and North America as the exemplars of world urbanism even though current global growth and development represent a dramatic break with past patterns Martin J Murray offers a groundbreaking guide to the multiplicity heterogeneity and complexity of contemporary global urbanism He identifies and traces four distinct

pathways that characterize cities today tourist entertainment cities with world class aspirations struggling postindustrial cities megacities experiencing hypergrowth and instant cities or master planned cities built from scratch Murray shows how these different types of cities respond to different pressures and logics rather than progressing through the stages of a predetermined linear path He highlights new spatial patterns of urbanization that have undermined conventional understandings of the city exploring the emergence of polycentric fragmented haphazard and unbounded metropolises Such cities he argues should not be seen as deviations from a norm but rather as alternatives within a constellation of urban possibility Innovative and wide ranging Many Urbanisms offers ways to understand the disparate forms of global cities today on their own terms

Energy Transitions in Japan and China Tai Wei Lim, 2016-11-23 This volume focuses on the topic of energy transitions in the coal mining industries of China and Japan by adopting a Sino Japanese comparative approach in area studies to examine the experiences between the two major East Asian economies In China rapid industrialization led to dramatic growth in energy demand and much of this energy demand was fueled by affordable coal energy With growing social concerns about the environment and an increasingly vocal middle class in contemporary China the authorities and state owned enterprises are studying the use of coal fuels for its future development In Japan coal was also an affordable main source of energy for Japan s early post war heavy industrialization until it was gradually replaced by oil in the 1960s The oil shocks of the 1970s compelled Japan to look for cleaner and cheaper fuels including nuclear power In these energy transitions from coal to oil and then onto non fossil fuels the story of coal power in both countries is highlighted in this publication as a comparative study This volume is a crucial contribution to the discussion of China s energy reforms and required reading for scholars of climate change and society

Innovation and Entrepreneurship in Japan Kathryn Iwata-Arens, 2005-11-03 Japan s innovators and entrepreneurs are a real success story against the odds surviving recession in the 1990s to prosper in today s competitive business environment Innovation and Entrepreneurship in Japan explores the struggles of entrepreneurs and civic minded local leaders in fostering innovative activity and identifies key business lessons for an economy in need of dynamic change Iwata Arens offers in depth analysis of strategy in firms communities and in local government Innovation and Entrepreneurship in Japan examines detailed case studies of high technology manufacturers in Kyoto Osaka and Tokyo as well as bio tech clusters in America demonstrating far reaching innovation and competition effects in national institutions and firms embedded within local and regional institutions The book is essential reading for academics and students of business economics political economy political science and sociology It will also appeal to investors entrepreneurs and community development organisations seeking new perspectives on global competition and entrepreneurship in high technology enterprises

Industrial Heritage and Regional Identities Christian Wicke, Stefan Berger, Jana Golombek, 2018-04-09 Heritage is not what we see in front of us it is what we make of it in our heads Heritage sites have been connected to a range of identarian projects both spatial and non spatial One of the most common links with

heritage has been national identity This book stresses that heritage has developed powerful links to regional and local identities Contributors deal explicitly with regions of heavy industry in different parts of the world exploring non spatial forms of identity including class religious ethnic racial gender and cultural identities In many heritage sites non spatial forms of identity are interlinked with spatial ones Civil society action has been important in representations of regional identities and industrial heritage campaigns Region branding seems to determine the ultimate success of industrial heritage a process that is closely connected to the marketing of regions to provide a viable economic future and attract tourism to the region Selected case studies on coal and steel producing regions in this book provide the first global survey of how regions of heavy industry deal with their industrial heritage and what it means for regional identity and region branding This book draws a range of powerful conclusions about the path dependency of particular forms for post industrial regional identity in former regions of heavy industry It highlights both commonalities and differences in the strategies employed with regard to the regions industrial heritage This book will appeal to lecturers students and scholars in the fields of heritage management industrial studies and cultural geography **Forthcoming Books** Rose Arny,2000 **Urban Research Monitor** ,1998

Knowledge Creation, Diffusion, and Use in Innovation Networks and Knowledge Clusters Elias G. Carayannis,David Campbell,2006 In the 21st century intangible resources such as knowledge and social capital have become as necessary to the modern economy as coal diamonds and oil were to the past This shift from product focused to service focused economies necessitates a drastic re thinking of the ways in which we support the mission and business of economic development on a global regional and national scale In order to effect and sustain a positive change innovation and knowledge networks need to be connected to every aspect of life from the private and domestic to the corporate and the global This book integrates a wide variety of perspectives and treatises on mutually adaptive and complementary processes of knowledge generation diffusion and transfer within organizations and industry addressing both the what and how to questions of knowledge management in a conceptual as well as an applied manner It should be of strong interest to science and technology policy makers research and development managers business decision makers and students of innovation and knowledge dynamics alike The Journal of Japanese Studies ,2009 A multidisciplinary forum for communicating new information new interpretations and recent research results concerning Japan to the English reading world
