One Road Down From The Wilderness Poems:

One Road Down from the Wilderness Julia Bates,1989-01-01 **New England Nature** David K. Leff,Eric D.

Lehman,2020-12-01 Since its founding four hundred years ago New England has been a vital source of nature writing Maybe it s the diversity of landscapes huddled so close together or the marriage of nature and culture in a relatively small six state region Maybe it s the regenerative powers of the ecosystem in a place of repeated exploitations Or maybe we have simply been thinking about our relationship with the natural world longer than everyone If all successive nature writing is a footnote to Henry David Thoreau then New England has a strong claim to being the birthplace of the genre But there are as the sixty entries in this anthology demonstrate many other regional voices that extol the wonders and beauty of the outdoors explore local ecology and call for environmental sustainability Between these covers Noah Webster calls for our stewardship of nature and Lydia Sigourney finds sublime pleasure in it Jonathan Edwards and Helen Keller both find miracles while Samuel Peters and Mark Twain find humor Author Nathaniel Hawthorne discovers a place to hide his metaphors while the enslaved James Mars discovers an actual hiding place Through it all is the apprehension of a profound and lasting splendor the glory of physical nature as W E B Dubois calls it something beyond our everyday concerns and yet tied so closely to our daily lives that we cannot escape it Nature writing cultivates our sense of beauty inflaming curiosity and the passion to explore It opens us to deep primal experiences that enrich life Anyone wanting to understand our relationship with the world must start here

Robert Frost: Sixteen Poems to Learn by Heart Robert Frost,Jay Parini,2024-03-05 Celebrate Robert Frost s 150th birthday with a deluxe keepsake edition featuring 16 of his greatest poems with brilliant essays highlighting his special genius and the power of memorization to unlock the magic of his language During a public reading Robert Frost was once asked why he so frequently recited his poems from memory With typical wit he replied If they won t stick to me I won t stick to them Remarkably among the modern poets his poems stick to the reader Mending Wall with its famous invocation of the rural maxim Good fences make good neighbors The Road Not Taken about the beguiling possibilities of life Birches which reminds us that One could do worse than be a swinger of birches Stopping by Woods on a Snowy Evening with its unforgettable final line And miles to go before I sleep Here poet and Frost biographer Jay Parini presents these and 12 other Frost poems to learn by heart In short accompanying commentaries Parini illuminates the stylistic and imaginative features of each of the poems drawing in biographical material from Frost s life to provide further context The goal of this little book is to encourage readers to slow down to listen to Frost s words and phrases to locate their deepest rhythms and hear the tune of each poem as it unfolds Memorizing a poem can teach us much about a poem s structure and argument and about the resonance of particular words And best of all memorization makes a poem part of our inner lives Once committed to memory a poem is available to us for recall at any time and the occasions for remembering it will make themselves known to us It isn t something we have to work at Anyone who has read and loved Frost s poetry will want to own and treasure this little gift

Krupa, 2013 Robinson Forest in eastern Kentucky is one of our most important natural landscapes and one of the most threatened Covering fourteen thousand acres of some of the most diverse forest region in temperate North America it is a haven of biological richness within an ever expanding desert created by mountaintop removal mining Written by two people with deep knowledge of Robinson Forest The Embattled Wilderness engagingly portrays this singular place as it persuasively appeals for its protection The land comprising Robinson Forest was given to the University of Kentucky in 1923 after it had been clear cut of old growth timber Over decades the forest has regrown and its remarkable ecosystem has supported both teaching and research But in the recent past as tuition has risen and state

support has faltered the university has considered selling logging and mining rights to parcels of the forest leading to a student led protest movement and a variety of other responses In *The Embattled Wilderness* Erik Reece an environmental writer and James J Krupa a naturalist and evolutionary biologist alternate chapters on the cultural and natural history of the place While Reece outlines the threats to the forest and leads us to new ways of thinking about its value Krupa assembles an engaging record of the woodrats and darters lichens and maples centipedes and salamanders that make up the forest s ecosystem It is a readable yet rigorous passionate yet reasoned summation of what can be found or lost in Robinson Forest and other irreplaceable places

The Nature of Suffering and the Goals of Medicine Eric J. Cassell,1991-10-03 *The Nature of Suffering* underscores the change that is taking place in

medicine from a basic concern with disease to a greater focus on the sick person Cassell centers his discussion on the problem of suffering because he says its recognition and relief are a test of the adequacy of any system of medicine He describes what suffering is and its relationship to the sick person bodies do not suffer people do An exclusive concern with scientific knowledge of the body and disease therefore impedes an understanding of suffering and diminishes the care of the suffering patient The growing criticism that medicine is not sufficiently humanistic does not go deep enough to provide a basis for a new understanding of medicine New concepts in medicine must have their basis in its history and in the development of ideas about disease and treatment Cassell uses many stories about patients to demonstrate that despite the current dominance of science and technology there can be no diagnosis search for the cause of the patient s disease prognostication or treatment without consideration of the individual sick person Recent trends in medicine and society Cassell believes show that it is time for the sick person to be not merely an important concern for physicians but the central focus of medicine He addresses the exciting problems involved in such a shift In this new medicine doctors would have to know the person as well as they know the disease What are persons however and how are doctors to comprehend them The kinds of knowledge involved are varied including values and aesthetics as well as science In the process of knowing the experience of patient and doctor move to center stage He believes that the exploration of the person will engage medicine in the 21st century just as understanding the body has occupied the last hundred years
