La Follette's Weekly Magazine, 1909 *Why is Social Justice Possible?* Zhongmin Wu, 2024-09-25 This is an open access book. This OA book contains extensive research on social justice during China's transition period. Rather than taking a macro historical approach or looking at social justice from a philosophical perspective, the book focuses on relevant theories and justice at a meso level. It looks at the basis for social justice and details the basic values and the basic standpoints when it comes to social justice. It differentiates between the concepts of justice, righteousness, fairness, and equality. It then lays out three social justice rules related to equal opportunities, distribution, and social adjustment, and discusses the ideas of intergenerational justice and procedural justice. The book looks from a sociological point of view at social justice during China's period of transition. It focuses on how certain rules affect the social strata and how they lead to discrimination, inequalities, liberty, equality, universal justice, and/or differential justice. This book assesses improper pursuits of social justice in China. It also looks at how the ideas of liberty and equality have evolved and some of the key problems over the last 70 years. This book also explains some of the more popular social topics that foster empirical discussions. Since the reform and opening up era, China has made great achievements when it comes to social development. The country has made notable progress with social justice. There are more equal opportunities than ever before. Nevertheless, there remain worrying problems when it comes to the idea of justice. To some extent, these problems offset the achievements. In some form, the development processes have been somewhat misguided, and these have had a negative impact on Chinese society and how it functions and develops. Therefore, this book is of theoretical and practical significance when it comes to social justice research.

Responding to the Threat of Violent Extremism Paul Thomas, 2012-09-13 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. How should we understand home-grown terrorism like the 7/7 London bombings? This is a classic monograph focusing on recent British

attempts to prevent violent extremism their problems and limitations and what lessons this can offer for more effective policy approaches in future Paul Thomas s extensive research suggests that the Prevent policy approaches and the wider CONTEST counter terrorism strategy have been misguided and ineffective further alienating British Muslim communities instead of supporting longer term integration He argues that new cohesion based approaches encouraging greater trust and integration across all communities represent the best defence against terrorism

Sexual Orientation Equality in Schools Matthew Holt,2021-02-09 This book explores how to help teachers become better advocates for sexual orientation equality in secondary schools Examining this issue through the lens of qualitative emancipatory action research a group of Australian teachers embarked on a journey of teacher advocacy Critical theory has long highlighted teachers as key players in either challenging dominant social narratives or else perpetuating oppressive systems of power through traditional forms of education Despite this important role the life stories of teachers which contributed to the development of their beliefs and behaviours about sexual orientation are rarely considered in the development of anti discriminatory policy designing the curriculum and most importantly in teacher training This book suggests and frames a model for advocacy whereby teachers engage with their personal beliefs about sexual orientation with their role as a teacher and commit to advocacy through action by promoting student safety challenging heteronormative narratives and role modelling compassionate behaviours in their school environments
