## **Palmprint Authentication:**

**Palmprint Authentication** 8#, Xingyi Road, Chang Ning District 16/F, Maxdo Center, 2006-04-11 Palmprint Authentication is the first book to provide a comprehensive introduction to palmprint technologies. It reveals automatic biometric techniques for personal identification using palmprint from the approach based on offline palmprint images to the current state of the art algorithm using online palmprint images. Palmprint Authentication provides the reader with a basic concept of Palmprint Authentication. It also includes an in depth discussion of Palmprint Authentication technologies, a detailed description of Palmprint Authentication systems and an up to date coverage of how these issues are developed. This book is suitable for different levels of readers: those who want to learn more about palmprint technology and those who wish to understand, participate and/or develop a palmprint authentication system. Palmprint Authentication is effectively a handbook for biometric research and development. Graduate students and researchers in computer science, electrical engineering, systems science and information technology will all find it uniquely useful, not only as a reference book but also as a text book. Researchers and practitioners in industry and R D laboratories working in the fields of security system design, biometrics, immigration, law enforcement, control and pattern recognition will also benefit from this volume. **Advanced Palmprint Authentication** David Zhang, Dandan Fan, Xu Liang, Bob Zhang, 2025-08-11 This book presents a comprehensive exploration of palmprint recognition synthesizing over a decade of research in contact based, contactless, 3D and multispectral systems. As one of the earliest approaches in biometrics, contact based palmprint systems have evolved significantly, achieving greater portability and accuracy even when handling large scale datasets. In contrast, contactless systems, which allow users to position their palms near the camera without physical contact, offer a hygienic, user friendly alternative that has quickly gained popularity in various applications. Additionally, the advancement of 3D palmprint recognition and the introduction of cutting edge sensors such as line scan and multicamera systems have further enhanced the accuracy and reliability of these systems. This book is structured into 13 chapters divided into three key sections. The first part delves into contact based systems, emphasizing their growing efficiency and performance in both small devices and large scale scenarios. The second part provides in depth coverage of contactless systems, detailing essential processes like palmprint acquisition, ROI localization, feature extraction and matching techniques. The third section examines the latest developments in multiple sensing systems, focusing on 3D and multispectral recognition. Targeted at researchers and engineers in biometrics, particularly those specializing in palmprint recognition, this book offers valuable insights and practical algorithms for enhancing system performance. It is also an excellent resource for readers with a broader interest in biometric technologies, offering a rich understanding of the latest trends and innovations in the field. **Palmprint Authentication** David D. Touchless Palmprint Recognition Systems Angelo Genovese, Vincenzo Piuri, Fabio Scotti, 2014-09-15. This book examines the context, motivation and current status of biometric systems based on the palmprint, with a specific focus on touchless and less constrained systems. It covers new technologies in this rapidly evolving field and is one of the first comprehensive books on palmprint recognition systems. It discusses the research literature and the most relevant industrial applications of palmprint biometrics, including the low cost solutions based on webcams. The steps of biometric recognition are described in detail, including acquisition, setups, algorithms and evaluation procedures. Constraints and limitations of current palmprint recognition systems are analyzed and discussed. The authors also introduce innovative methods for touchless and less constrained palmprint recognition, with the aim to make palmprint biometrics easier to use in practical daily life applications and overcome the typical constraints and limitations described. Touchless Palmprint Recognition Systems targets professionals and researchers working in biometrics, image processing and three dimensional reconstruction. Advanced level students studying biometrics and computer science will also find this material valuable as a secondary text book or reference.

*Advances in Biometric Person Authentication* Stan Z. Li, Jianhuang Lai, Tieniu Tan, Guocan Feng, Yunhong Wang, 2004-11-29. Following the previous four annual conferences, the 5th Chinese Conference on Biometrics Recognition (Sinobiometrics 2004) was held in Guangzhou, China, in December 2004. The conference this year was aimed at promoting the international exchange of ideas and providing an opportunity for keeping abreast of the latest developments in biometric algorithms, systems and applications. The 1st Biometrics Verification Competition (BVC) on face, iris and fingerprint recognition was also conducted in conjunction with the conference. This book is composed of 74 papers presented at Sinobiometrics 2004, contributed by researchers and industrial practitioners from Korea, Japan, Singapore, Hong Kong, France, UK, US, as well as China. Of these 60 papers, 14 were selected from 140 submissions and 14 were invited. The papers not only presented recent technical advances but also addressed issues in biometric system design, standardization and applications. Included among the invited were four feature papers on the ideas and algorithms of the best performing

biometric engines which were either competition winners at the Face Authentication Test FAT 2004 or the Fingerprint Verification Competition FVC 2004 or they were the best performing iris and palmprint recognition algorithms The papers were complemented by five keynote lectures on biometrics and face fingerprint and iris authentication and multimodal fusion by Arun Ross West Virginia University and Anil K Jain Michigan State University Josef Kittler University of Surrey John Daugman University of Cambridge Raffaele Cappelli University of Bologna and Stan Z Li Chinese Academy of Sciences
