The Public Management and Modernisation in Britain A. Massey, Robert Pyper, 2005-04-07 Chapters include Public management and modernisation theories and debates Economic and financial management Restructuring the state machine and Recurring issues in public management Public Value Management, Governance and Reform in Britain John Connolly, Arno van der Zwet, 2020-11-23 This book examines developments in governance reform in Britain with a particular focus on the period since 2010 We argue that the experiences of the past decade mean that public value based ideas are required to inform governance reform for the coming years This needs to be prioritised due to the twin challenges of managing the aftermath of Brexit and navigating through the recovery phase of the COVID 19 pandemic The volume outlines key themes issues and debates relevant to contemporary public sector reform including modes of state governance evidence based policy making debates the challenges and possibilities of public sector innovation accountability issues and the implications of Brexit The overall conclusion of the book is that the coming decade presents an opportunity for more paradigmatic changes to UK governance but for this to happen political leaders need to prioritise a reinventing government agenda underpinned by public value based thinking and approaches This book will be of particular interest to students of politics and public administration and relevant for those with general research interests in British governance and public policy International Handbook of Public Management Reform Shaun Goldfinch, Joe Wallis, 2009-01-01 This volume presents a compelling package for anyone interested in public sector reform It effectively combines a wide range of well researched reviews of national experiences with state of the art thematic chapters in key reform areas such as IT governance public sector leadership and accountability The result is a robust insightful and sometimes sobering series of accounts of the promises and pitfalls of efforts to reform the institutions and practices of public governance around the world A must read Paul t Hart Australian National University This major Handbook provides a state of the art study of the recent history and future development of international public management reform Through a careful cross country analysis spanning the last three decades this timely volume critically evaluates whether countries are converging towards a single public management model The book goes on to investigate unresolved issues surrounding leadership e government accountability and computer systems failure currently facing reformers Shaun Goldfinch and Joe Wallis have brought together a number of eminent scholars from across Europe Asia North America and Australasia to explore the role of economic ideas human resources and the state of public management reform in twelve countries Providing a broad global overview of public management and facilitating a greater understanding of the difficult issue of reform this book will find widespread appeal amongst academics and postgraduate students of public administration as well as practitioners in the field **Emerging and Potential Trends in Public Management** John Diamond, Joyce Liddle, 2012-08-20 Challenging some of the established practices of public policy and administration which have been called into question by the financial and banking crises of 2008 this title

investigates public sector management and the public managers acting in the interests of civil society to get to the heart of best practice

Britain's Modernised Civil Service June Burnham, Robert Pyper, 2008-02-18 Britain's Modernised Civil Service provides detailed analysis of the structure and operation of the modern civil service along with an historically grounded account of its development. Key events, personalities and scandals help bring the account to life and illuminate and challenge the various theories of what the civil service is or should be. The authors take the evolutionary change of the civil service as a central theme and examine the impact of the major reforms of recent years on the historic Whitehall unitary model. They assess the impact of the New Public Management agenda of the Thatcher and Major years and the role of the Civil Service in the multi-governmental context of devolution and membership of the European Union. Further changes associated with New Labour such as the increased role of think tanks, special advisers and the impact of the Freedom of Information Act further sharpen the picture of today's civil service and lead to a rethinking of theories of its role. This readable book by two leading authorities provides an up-to-date account of Britain's Civil Service that will be essential reading for students of British politics, public policy and management. June Burnham is a researcher and consultant in the area of public services and public policy and formerly Senior Lecturer in European Government at Middlesex University. Robert Pyper is Professor of Government and Public Management and Head of the Division of Public Policy at Glasgow Caledonian University. He is author of *The British Civil Service* for which this is a fully revised replacement volume.

Public Sector Property Asset Management Malawi Ngwira, David Manase, 2016-05-03 In many public sector organisations there has been little or no adoption of a proactive asset management strategy. Where an extensive property portfolio exists, this can result in poor overall utilisation of the portfolio, exemplified by excessive vacant property or properties not being put to best use. In such situations, there is a risk that the building stock deteriorates more rapidly than expected, leading to expensive maintenance and repair charges. Lack of a proactive asset management strategy will impact on the services delivered by such organisations. Public Sector Property Asset Management covers all aspects of asset management in the public sector, including the overall concept, the development of asset management strategies and the implementation of asset management practices. It evaluates asset management strategies, processes and practices to show how effective management of property assets supports business activities or service delivery functions. The reader will understand the importance of improving decision-making through the recognition of all costs of owning and operating those assets throughout their lifecycle, leading to improved business process activities or service delivery functions which greatly assist in meeting the social and economic objectives of such organisations. Written for all practitioners currently involved in

asset management the book will also be useful in the university environment to those teaching researching or learning about asset management in the public sector
