Leadership, Structures and Accountability in the Public Service Carlos Alverez-Antolinez, 2007 Calls for reform of the public service are routinely heard from politicians private sector interests civil society organisations and public servants themselves Public service reform programmes have become the norm in many countries including Ireland But the overheated rhetoric that usually accompanies the launch of such programmes is often rapidly followed by the disappointment of unfulfilled ambition and apparent failure This book looks

at the realities of public service reform in Ireland today It begins with the conviction that reform is an ongoing process of adaptation to the rapidly changing requirements of society rather than anything that can be captured in a once off programme It recognises the achievements of recent reform efforts and it sets out some key elements that the authors believe should be part of the next phase of reform In particular it identifies specific actions that are needed to improve accountability for performance to adapt organisational structures to contemporary needs and to put in place the vital leadership capability The authors recognise that other actions will also be required in the short term and that the process of adaptation will rapidly move on to other challenges but they insist that the next phase of reform must as a priority address at least these three areas The book draws on management theory international best practice and not least the authors own experience at the frontline of public service delivery Its proposals are practical and immediate but are also well grounded in a vision of a high performance public service that can meet the most demanding expectations of today s citizens BOOK

JACKET Resource Allocation in the Public Sector Colin Fisher,2002-01-04 In the public sector at the moment resources are scarce or at the very least finite and limited how they are allocated is therefore of crucial importance This book analyses this process and examines the competing values that underlie the public service ethic including the role of markets and quasi markets in the delivery of public services Topics discussed include whether people should be denied the public services they need because public bodies are short of money what balance we should strike between markets and public organisations to provide public services whether the use of markets has gone too far and whether we need to return to a public service ethic

Rethinking Local Democracy Desmond S. King,Gerry Stoker,1996-07-10 The transformation of British local government into a new and complex system of local governance raises fundamental theoretical questions as well as empirical ones Rethinking Local Democracy argues that traditional defences of local government are no longer adequate and that the case for local autonomy and local democracy needs to be radically rethought It brings together a set of specially commissioned chapters by leading academics designed to stimulate and contribute to debate on these issues In Place of

How Did Britain Come to

This? Gwyn Bevan, 2023-10-23 If every system is perfectly designed to get the results it gets what is wrong with the design of the systems that govern Britain And how have they resulted in failures in housing privatisation outsourcing education and healthcare In *How Did Britain Come to This* Gwyn Bevan examines a century of varieties of systemic failures in the British state The book begins and ends by showing how systems of governance explain scandals in NHS hospitals and the failures and successes of the UK and Germany in responding to Covid 19 before and after vaccines became available The book compares geographical fault lines and inequalities in Britain with those that have developed in other European countries and argues that the causes of Britain's entrenched inequalities are consequences of shifts in systems of governance over the past century Clement Attlee's postwar government aimed to remedy the failings of the prewar minimal state while Margaret Thatcher's governments in the 1980s in turn sought to remedy the failings of Attlee's planned state by developing the marketised state which morphed into the financialised state we see today This analysis highlights the urgent need for a new political settlement of an enabling state that tackles current systemic weaknesses from market failures and over centralisation This book offers an accessible analytic account of government failures of the past century and is essential reading for anyone who wants to make an informed contribution to what an innovative capable state might look like in a post pandemic world
