Celebrating Canada Mathew Hayday, Raymond B. Blake,2017-01-06 Holidays are a key to helping us understand the transformation of national regional community and ethnic identities In *Celebrating Canada* Matthew Hayday and Raymond Blake situate Canada in an international context as they examine the history and evolution of our national and provincial holidays and annual celebrations The contributors to this volume examine such holidays as Dominion Day Victoria Day Quebec's Fête Nationale and Canadian Thanksgiving among many others They also examine how Canadians celebrate the national days of other countries like the Fourth of July and how Dominion Day was observed in the United Kingdom Drawing heavily on primary source research and theories of nationalism identities and invented traditions the essays in this collection deepen our understanding of how these holidays have influenced the evolution of Canadian identities

The European Roots of Canadian Identity Philip Resnick,2005-04-01 What makes Canada a different kind of society from the United States In this book length essay Philip Resnick argues that in more ways than one Canada has been profoundly marked by its European origins This is most apparent where the European historical underpinnings both of English speaking and French speaking Canada are concerned but it is no less true when one examines Canada's multiple national identities robust social programs increasingly secular values and multilateral outlook on international affairs today As the war in Iraq brought home and the

2004 federal election reinforced Canada is a more European type society than is our neighbour to the south This does not come without its own complexities or problems On the contrary there are significant parallels between the ambiguous versions of national identity that one finds in Canada and what one finds on the European continent There are parallels too between the elements of self doubt that characterize Canadians overall when they think about their country and those of Europeans caught up in their own often fractious attempts to forge a more integrated Europe The author argues that Canada needs Europe as an effective counter weight to the influence of the United States He further argues that at a deeper existential level Canadians need relevant European references to better understand what makes them the kind of North Americans that they are *Walter Gordon and the Rise of Canadian Nationalism* Stephen Azzi,1999-05-25

Walter Gordon and the Rise of Canadian Nationalism is an examination of the origins of Walter Gordon s nationalist ideology and its impact on Canada It traces his ideas from his family influences and the intellectual currents present in his early years to his work as a chartered accountant public servant and head of a small conglomerate Drawing on extensive interviews and impressive research Azzi provides not only a biography of an important political figure but a significant study of the political and intellectual controversies that Gordon and his ideas created shedding light on the larger political and economic questions of the postwar era

Food Will Win the War Ian Mosby,2014-05-21 During WWII as Canada struggled to provide its allies with food nutritionists warned that malnutrition could derail the war effort Posters admonished women and children to Eat Right Feel Right because Canada Needs You Strong while cookbooks helped housewives become housoldiers through food rationing menu substitutions and household production Food Will Win the War explores the symbolic and material transformations that food and eating underwent during the war and the profound social political and cultural changes that took place in the 1940s Through official food guides and policies the state took unprecedented steps into the kitchens of the nation transforming the way women cooked what their families ate and how people thought about food Canadians in turn rallied around food and nutrition to articulate new visions of citizenship for their postwar future

Canada , Desiring Canada Patricia Cormack,James Cosgrave,2013-03-18 What do Tim Hortons Hockey Night in Canada and Rick Mercer have in common Each is a popular symbol of Canadian identity seen across the country and beyond on television and in other forms of media But whose definition of Canadian do they represent What does it mean to be Canadian Do we create our own impressions of Canadian identity or are they created for us In Desiring Canada Patricia Cormack and James F Cosgrave delve into these questions exploring the connections between popular culture media and the Canadian state Taking as their examples the popular CBC contests Tim Hortons advertising campaigns NHL hockey violence television comedy and the business of gambling this lively engaging book investigates the relationship between some of our more beloved popular expressions of national identity and the extent to which the interests of the state appeal in various ways through the popular media to the pleasures of citizens thus shaping our understanding of what it means to be Canadian

The Construction of

Canadian Identity from Abroad Christopher Kirkey, Richard Nimijean, 2022-03-20 Migration and the impact that immigrants have on Canada is and always has been central to a robust understanding of Canadian identity. However, despite claims that the world needs more Canada, Canadians, their governments, and scholars pay much less attention to the estimated 3 million Canadian expatriates who live elsewhere. *The Construction of Canadian Identity from Abroad* features Canadian scholars who live and work outside Canada or have recently returned to Canada and who write and think deeply about identity construction. What happens when that Canadian is a scholar whose teaching, research, and scholarship, professional development, and/or community engagement focuses directly on Canada? How does being abroad affect how we interpret Canada? In short, in what ways does externality affect how Canadian expat scholars intellectually approach, construct, and identify with Canada? This engaging volume is ideal for university students, scholars, government officials, and the general public.

Canada Donald J. Savoie, 2023-05-15 Canada's political structure runs contrary to North America's economic geography, and the north-south economic pull. Canada imported political and administrative institutions designed for a unitary state, and its political leaders have struggled to make them work since the country was founded. Because of this, many Canadians, their communities, and their regions view themselves as victims to a greater degree than groups in other Western democracies do. Our federal government has shown a greater willingness to apologize for historical wrongs than other Western countries. Canada also outperforms other nations in helping victims make the transition to full participants in the country's political and economic life. Donald Savoie maintains that Canada continues to thrive despite the many shortcomings in its national political institutions and the tendency of Canadians to see themselves as victims, and that our history and these shortcomings have taught us the art of compromise. Canada's constitution and its political institutions amplify rather than attenuate victimization; however, they have also enabled Canadians to manage the issue better than other countries. Canadians also recognize that the alternative to Canada is worse, and this more than anything else continues to strengthen national unity. Drawing on his extensive experience in academe and as an advisor to governments, Savoie provides new insights into how Canada works for Canadians.
