Public Planning Failure And Redirection:

Public Planning: Failure and Redirection Robert A. Levine, 1972 *The National Planning Idea In U.s. Public Policy* David E Wilson, 2019-07-11 This book explores the eventful but largely forgotten history of national planning efforts in the United States first identifying and comparing five alternative approaches to contemporary national planning then using these approaches to assess the events of 1973 1976 a period when crisis pressures brought a vigorous resurgence of national planning activity and debate Dr Wilson concludes that two new approaches to planning learning adaptive and general systems are increasingly being used in lieu of the long established and less flexible rational and incremental approaches and that these might eventually achieve a beneficial new synthesis in both federal policy practice and social science theory He argues that the twin questions of a planned versus a planning society and of who will plan for whom are inexorably emerging as key issues in U S public policy Along with its companion volume *National Planning in the United States An Annotated Bibliography* also published by Westview this book provides extensive new interdisciplinary research material and integrative perspectives on current planning challenges *Hearings, Reports and Prints of the Senate Committee on Government Operations* United States. Congress. Senate. Committee on Government Operations, 1976 **Approaches to Human Services Planning** Project Share, 1976 30 references to documents resulting from demonstration projects on human services planning as well as books and journal articles that deal with more generic issues Citations arranged alphabetically by titles Entry gives bibliographical information availability information and lengthy abstract **Urban and Regional Development Planning** Dennis A. Rondinelli, 2019-06-30 Widely accepted principles and assumptions of American planning theory come under heavy fire in this refreshing and provocative book The author s main contention is that contrary to current supposition development planning is in practice a highly political activity Professor Rondinelli maintains that it is because the dynamics of the policy making process are not properly understood that current planning prescriptions are inadequate when they are applied within organizationally complex urban regions To illustrate his argument he offers a case history of federally aided redevelopment programs for an urban region in northeastern Pennsylvania that experienced three decades of economic decline He further believes that existing programs of planning education do not provide the skills knowledge and experience necessary for effective management of urban change Curricula must be reoriented he says if planners are to have an impact on future urban and regional development Finally he sets forth positive alternatives to current planning processes stressing the need for planning theory and practice that recognize and cope with the characteristics of the complex policy making system *National Planning In The United States* David E. Wilson, 2019-03-13 This annotated bibliography of more than 2 000 entries current through 1977 sheds light on the national planning idea as a substantive issue in past present and future U S public policy presents a bibliographic structure that suggests new emphases relationships and interdisciplinary approaches and makes more easily accessible to students a *Toward a Planned Society* Otis L. Graham Jr., 1976-01-22

Graham here examines the beginnings and development of national growth policies and machinery in the United States from the New Deal to the Nixon administration

The Implementation Perspective Walter Williams, 2023-07-28 After the big decisions are made in legislatures and executive offices what is done by those who implement and operate social service programs will determine their success or failure Yet over and over again the managers of public organization disregard or handle poorly the critical problems involved in starting and developing new programs or in modifying existing ones This book presents a new decision making rationale the implementation perspective as the basic guide to social service program management The cardinal principle is that the central focus of policy must be at the point of service delivery Here is where management must redirect its attention The demand is to concentrate on the hard dirty time consuming work of building the local delivery capacity needed to provide better social services and to implement new program decisions over time The Implementation Perspective is a message for our times Even those who would continue the nation s effort to meet its social obligations are finding that simply calling for big new programs and more spending is no longer satisfying Moreover Proposition 13 the balanced budget movement inflation and compelling demands for new funds in such areas as energy now squeeze social programs New directions may have to come not from new funds but from rethinking and redirection and more to the point the better management of existing programs After the big decisions are made in legislatures and executive offices what is done by those who implement and operate social service programs will determine their success or failure Yet over and over again the managers of public organization disregard
