fully revised second edition of this textbook offers a comprehensive introduction to theories of public policy and policymaking. The policy process is complex; it contains hundreds of people and organisations from various levels and types of government, from agencies, quasi and non governmental organisations, interest groups and the private and voluntary sectors. This book sets out the major concepts and theories that are vital for making sense of the complexity of public policy and explores how to combine their insights when seeking to explain the policy process. While a wide range of topics are covered from multi level governance and punctuated equilibrium theory to Multiple Streams analysis and feminist institutionalism, this engaging text draws out the common themes among the variety of studies considered and tackles three key questions: what is the story of each theory or multiple theories; what does policy theory tell us about issues like evidence based policymaking and how universal are policy theories designed in the Global North? This book is the perfect companion for undergraduate and postgraduate students studying public policy, whether focussed on theory analysis or the policy process, and it is essential reading for all those on MPP or MPM programmes.

New to this Edition: New sections on power, feminist institutionalism, the institutional analysis and development framework, the narrative policy framework, social construction and policy design, A consideration of policy studies in relation to the Global South in an updated concluding chapter, More coverage of policy formulation and tools, the psychology of policymaking and complexity theory, Engaging discussions of punctuated equilibrium, the advocacy coalition framework and multiple streams analysis.

Public Policy Investment Anthony Bertelli, Peter John, 2013-11-28. This book addresses one of the enduring questions of democratic government: why do governments choose some public policies but not others? Political executives focus on a range of policy issues such as the economy, social policy and foreign policy but they shift their priorities over time. Despite an extensive literature, it has proven surprisingly hard to explain policy prioritisation. To remedy this gap, this book offers a new approach called public policy investment: governments enhance their chances of getting re-elected by managing a portfolio of public policies and paying attention to the risks involved. In this way, government is like an investor making choices about risk to yield returns on its investments of political capital. The public provides signals about expected political capital returns for government policies or policy assets that can

be captured through expressed opinion in public polls Governments can anticipate these signals in the choices they make Statecraft is the ability political leaders have to consider risk and return in their policy portfolios and do so amidst uncertainty in the public s policy valuation Such actions represent the public s views conditionally because not every opinion change is a price signal It then outlines a quantitative method for measuring risk and return applying it to the case of Britain between 1971 and 2000 and offers case studies illustrating statecraft by prime ministers such as Edward Heath or Margaret Thatcher The book challenges comparative scholars to apply public policy investment to countries that have separation of powers multiparty government and decentralization Implementing Public Policy Michael Hill, Peter Hupe, 2008-12-22 The Second Edition of this popular textbook introduces students to the major themes in the study of public policy implementation and relates them to contemporary developments in thinking about governance Fully revised and updated the book stresses the continuing importance of a focus on the implementation part of policy processes Michael Hill and Peter L Hupe suggest strategies for future research on implementation and identify modes of managing implementation as operational governance Designed for an international audience this is a core text for upper level undergraduate and graduate students studying or conducting research in public policy social policy public management public administration and governance Michael Hill is Emeritus Professor of Social Policy at the University of Newcastle upon Tyne and Visiting Professor at the Department of Politics Queen Mary University of London UK Peter Hupe teaches Public Administration at Erasmus University Rotterdam The Netherlands He was previously Visiting Professor at the Public Management Institute Katholieke Universiteit Leuven Belgium Praise for the First Edition An excellent and much needed book Hill and Hupe have provided a well written and highly accessible account of the development of implementation studies which will be immensely valuable to everyone concerned with understanding implementation in modern policy making Professor Wayne Parsons University of London
