to show that conversions occur most frequently at the age of greatest physical growth when the individual is face to face with the new environment of maturity to which he has to adjust himself and they thus support the author's general position This analysis of public worship enables us to understand present day conditions By science and invention man has been able to cope so successfully with his environment that the need of religious worship is not urgent and so there is a very general tendency to return to the early Jewish conception of a Recreative Sabbath Psychological Review Volume 8 **Public**
