Publishing The Future:

The Future of Scholarly Publishing Peter Weingart, Niels Taubert, 2017-10-10 The formal scientific communication system is currently undergoing significant change This is due to four developments the digitisation of formal science communication the economisation of academic publishing as profit drives many academic publishers and other providers of information an increase in the self observation of science by means of publication citation and utility based indicators and the medialisation of science as its observation by the mass media intensifies Previously these developments have only been dealt with individually in the literature and by science policy actors The Future of Scholarly Publishing documents the materials and results of an interdisciplinary working group commissioned by the Berlin Brandenburg Academy of Sciences and Humanities BBAW to analyse the future of scholarly publishing and to make recommendations on how to respond to the challenges posed by these developments As per the working groups intention the focus was mainly on the sciences and humanities in Germany However in the course of the work it became clear that the issues discussed by the group are equally relevant for academic publishing in other countries As such this book will contribute to the transfer of ideas and perspectives and allow for mutual learning about the current and future state of scientific publishing in different settings

Shaping the Future of African American Film Monica White Ndounou, 2014-04-29 In Hollywood we hear it s all about the money It s a ready explanation for why so few black films get made no crossover appeal no promise of a big payoff But what if the money itself is color coded What if the economics that governs film production is so skewed that no film by about or for people of color will ever look like a worthy investment unless it follows specific racial or gender patterns This Monica Ndounou shows us is precisely the case In a work as revealing about the culture of filmmaking as it is about the distorted economics of African American film Ndounou clearly traces the insidious connections between history content and cash in black films How does history come into it Hollywood s reliance on past performance as a measure of potential success virtually guarantees that historically underrepresented underfunded and undersold African American films devalue the future prospects of black films So the cycle continues as it has for nearly a century Behind the scenes the numbers are far from neutral Analyzing the onscreen narratives and off screen circumstances behind nearly two thousand films featuring African Americans in leading and supporting roles including such recent productions as Bamboozled Beloved and Tyler Perry s Diary of a Mad Black Woman Ndounou exposes the cultural and racial constraints that limit not just the production but also the expression and creative freedom of black films Her wide ranging analysis reaches into questions of literature language speech and dialect film images and narrative acting theater and film business practices production history and financing and organizational history By uncovering the ideology behind profit driven industry practices that reshape narratives by about and for people of color this provocative
