Sapp,Rev. Dr. J. Leggott,2013-11-25 Since the awakening of consciousness the very dawn of man they have looked for a way to leave their mark on nature To make something in their own image After acting as Gods they finally accomplished their goal But with every good there is bad and in this case it is the same The survivors of mans ultimate break through are living striving to stay alive with the back lash that has ensued is there a cure And if so where does it lie Perhaps there is my son but if there is not all shall be doomed for the arrogance of man **The Signal and the Noise** Nate Silver,2015-02-03 One of the more momentous books of the decade The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance predicted the 2008 election within a hair s breadth and became a national sensation as a blogger all by the time he was thirty He solidified his standing as the nation s foremost political forecaster with his near perfect prediction of the 2012 election Silver is the founder and editor in chief of the website FiveThirtyEight Drawing on his own groundbreaking work Silver examines the world of prediction investigating how we can distinguish a true signal from a universe of noisy data Most predictions fail often at great cost to society because most of us have a poor understanding of probability and uncertainty Both experts and laypeople mistake more confident predictions for more accurate ones But overconfidence is often the reason for failure If our appreciation of uncertainty improves our predictions can get better too This is the prediction paradox The more humility we have about our ability to make predictions the more successful we can be in planning for the future In

keeping with his own aim to seek truth from data Silver visits the most successful forecasters in a range of areas from hurricanes to baseball to global pandemics from the poker table to the stock market from Capitol Hill to the NBA He explains and evaluates how these forecasters think and what bonds they share What lies behind their success Are they good or just lucky What patterns have they unraveled And are their forecasts really right He explores unanticipated commonalities and exposes unexpected juxtapositions And sometimes it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition In other cases prediction is still a very rudimentary and dangerous science Silver observes that the most accurate forecasters tend to have a superior command of probability and they tend to be both humble and hardworking They distinguish the predictable from the unpredictable and they notice a thousand little details that lead them closer to the truth Because of their appreciation of probability they can distinguish the signal from the noise With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions Nate Silver's insights are an essential read *Pulpsmith*, 1982 **The Crocodile Makes No Sound** N.L.

languages of China have been a fundamental feature in daily life and popular culture while a standardized form of Mandarin has been adopted as the language of the state including education. Suppressed during powerful movements to establish a modern national culture, these local languages or dialects have nevertheless survived and their resurgence in the media and literature has caused tensions to surface. Concerns for education, law and commerce have all promoted a standard national language yet at the same time as local societies have undergone massive transformations, the need to re-imagine communities has repeatedly challenged the adequacy of a single language to represent them. Moreover, local languages have been presented in dramatically different and conflicted roles as symbols of the failure to assimilate to a cultural mainstream which in turn may be parodied as contingent and inadequate or asserting the identity of a community as a site of its own cultural production and not merely as a venue for transmitting a national culture. Acknowledging local language as authentic may also reveal cultural hegemonies within regions and contested versions of communities. This ground-breaking study surveys in detail the sweep of local languages in television, radio, film and print culture of late twentieth-century mainland China, especially Beijing, Shanghai, Chongqing and Chengdu, Hong Kong and Taiwan. Focusing on these regions, the analysis contrasts and compares these distinct communities to each other and to the ways in which they mediate culture as a national institution. It draws on a wide range of critical cultural and media studies and explores how varied genres
