Comparative Law in Eastern and Central Europe Aleksander W. Bauknecht, Branisław Sitek, Jakub J. Szczerbowski, 2014-07-24 Comparative law is a research methodology which has been increasingly fashionable in recent decades as comparisons between common law and civil law have dominated the law studies landscape There are many methods of comparative law in use including comparison of legal rules comparison of cases and comparison of legal theories Each of these methods has strong proponents and opponents Dogmatic comparisons of rules are criticized for not giving the whole picture of law in action but praised for being the first and the only truly legal step in comparative research Case based comparisons are praised for enabling us to compare the true understanding of rules by courts yet the critics of this method point out that only the higher courts decisions are subject to comparison and most cases do not reach this stage Finally comparisons of legal theories are praised for enabling us to know the spirit of the laws yet opponents would argue that many countries sharing the same theory would draw opposite conclusions from it This book is a result of the attempted and successful introduction of comparative law into the region of Eastern and Central Europe The subject has induced interest beyond expectations This volume opens with a chapter on the unification of law both from the perspective of institutional unification by such supra state organizations spontaneous and institutionalized unifications between two or more legal systems and the methods of choosing the right rules in the unification process Chapters two and three follow the classical division of private and public law as proposed by the brilliant Roman lawyer Ulpian Overall the chapters in this book offer an interesting and engaging commentary on the current topics discussed by academics in Eastern and Central Europe

The Interaction of Contract Law and Tort and Property Law in Europe Christian von Bar, Ulrich Drobnig, 2009-04-27 Against the background of the creation of an EU wide frame of reference for private law relevant to the Common Market this study which was requested by the EU Commission analyses the dovetailing between contract and tort law on the one hand and between contract and property law on the other The study examines the legal orders of almost all the Member States of the EU illustrates the differences between contractual and non contractual liability and evaluates the different systems of the transfer of property of movable and immovable securities as well as trust law The study comes to the conclusion that the intensive considerations on the creation of a model law in the area of European private law do not allow these thoughts to be limited to contract law Such a limitation to the scope of the regarding of this area would probably cause more problems than it would solve or at any rate not do justice to the needs of the Common Market
