John Joseph Cleary, Gary M. Gurtler

Purely Physical:

Understanding Physicalism Gregor M. Hörzer, 2020-08-10 Physicalism is a metaphysical thesis easily presented in slogan form there is nothing over and above the physical but notoriously difficult to formulate precisely Understanding physicalism combines insights from contemporary philosophy of mind and metaphysics to present a new account of physical properties and metaphysical dependence and on this foundation develop a more rigorous and illuminating formulation of the thesis of physicalism

The Undivided Self David Charles, 2021 Aristotle initiated the systematic investigation of perception the emotions memory desire and action David Charles argues that Aristotle's account of these phenomena is a philosophically live alternative to conventional modern thinking about the mind it offers a way to dissolve rather than solve the mind body problem we have inherited

Idealism Tyron Goldschmidt, Kenneth L. Pearce, 2017 Idealism is a family of metaphysical views each of which gives priority to the mental The best known forms of idealism in Western philosophy are Berkeleyan idealism which gives ontological priority to the mental minds and ideas over the physical bodies and Kantian idealism which gives a kind of explanatory priority to the mental the structure of the understanding over the physical the structure of the empirical world Although idealism was once a dominant view in Western philosophy it has suffered almost total neglect over the last several decades This book rectifies this situation by bringing together seventeen essays by leading philosophers on the topic of metaphysical idealism The various essays explain attack or defend a variety of idealistic theories including not only Berkeleyan and Kantian idealisms but also those developed in traditions less familiar to analytic philosophers including Buddhism and Hassidic Judaism Although a number of the articles draw on historical sources all will be of interest to philosophers working in contemporary metaphysics This volume aims to spark a revival of serious philosophical interest in metaphysical idealism

Unity and Time in Metaphysics Ludger Honnefelder, Edmund Runggaldier SJ, Benedikt Schick, 2009-08-17 The contributions to this collection deal with the fundamental problem of unity which plays a decisive role in many contemporary debates even when this role is not acknowledged Questions like whether there can be unities that persist through time e.g. persons who remain the same throughout their lives are discussed from various perspectives Is such an idea possible at all and if so what role do concepts like force capacity and disposition play in this context

Nondualism Jon Paul Sydnor, Anthony J. Watson, 2023-09-05 The time has come for nondualism As a fundamentally unifying concept nondualism may seem out of place in an age of rising nationalism and bitter deglobalization but our current debates over tribalism and universalism all grant nondualism an informative relevance Nondualism rejects both separation and identity thereby encouraging unity in difference Yet nondualism as a word occupies a large semantic field Nondual theists advocate the unity of humankind and God while nondual atheists advocate the inseparability of all persons without reference to a divinity Ecological nondualism asserts that we are in nature and nature is in us while monistic nondualists assert that only God exists and all difference is illusion Edited by Jon Paul Sydnor and Anthony Watson and

guided by scholars from different religions and specializations Nondualism An Interreligious Exploration explores the semantic field that nondualism occupies The collection elicits the expansive potential of the concept clarifies agreement and disagreement and considers current applications In every case nondualism is universal in its relevance yet always distinctive in its contribution *Proceedings of the Boston Area Colloquium in Ancient Philosophy: Volume XXIV (2008)* John Joseph Cleary, Gary M. Gurtler, 2009 This volume contains papers and commentaries presented to the Boston Area Colloquium in Ancient Philosophy during the academic year 2007-8 The papers discuss a wide range of topics related to Plato and Aristotle On Plato topics include false pleasures in the *Philebus* the tripartite soul in the *Republic* and rhetoric in the *Phaedrus* and on Aristotle the relation of the physical and psychological in *De Anima* of virtue and happiness in the *Ethics* of body and nature in the *Physics* and the role of *pros hen* in the *Metaphysics* One other paper argues for the Aristotelian origin of Stoic determinism Consciousness and Physicalism Andreas Elpidorou, Guy Dove, 2018-04-19 Consciousness and Physicalism A Defense of a Research Program explores the nature of consciousness and its place in the world offering a revisionist account of what it means to say that consciousness is nothing over and above the physical By synthesizing work in the philosophy of mind metaphysics and philosophy of science from the last twenty years and forging a dialogue with contemporary research in the empirical sciences of the mind Andreas Elpidorou and Guy Dove advance and defend a novel formulation of physicalism Although physicalism has been traditionally understood to be a metaphysical thesis Elpidorou and Dove argue that there is an alternative and indeed preferable understanding of physicalism that both renders physicalism a scientifically informed explanatory project and allows us to make important progress in addressing the ontological problem of consciousness Physicalism Elpidorou and Dove hold is best viewed not as a thesis metaphysical or otherwise but as an interdisciplinary research program that aims to compositionally explain all natural phenomena that are central to our understanding of our place in nature Consciousness and Physicalism is replete with philosophical arguments and informed through and through by findings in many areas of scientific research It advances the debate regarding the ontological status of consciousness It will interest students and scholars in philosophy of mind metaphysics philosophy of cognitive science and philosophy of science And it will challenge both foes and friends of physicalism *The ^AQuest for Reality* Barry Stroud, 2002-03-14 We say the grass is green or lemons are yellow to state what everyone knows But are the things we see around us really colored or do they only look that way because of the effects of light rays on our eyes and brains Is color somehow unreal or subjective and dependent on our human perceptions and the conditions under which we see things Distinguished scholar Barry Stroud investigates these and related questions in *The Quest for Reality* In this long awaited book he examines what a person would have to do and believe in order to reach the conclusion that everyone's perceptions and beliefs about the color of things are illusions and do not accurately represent the way things are in the world as it is independently of us Arguing that no such conclusion could be consistently reached Stroud finds that the conditions of a successful unmasking of color cannot all be

fulfilled The discussion extends beyond color to present a serious challenge to many other philosophical attempts to discover the way things really are A model of subtle elegant and rigorous philosophical writing this study will attract a wide audience from all areas of philosophy The Central Nervous System and Behavior National Institutes of Health (U.S.),1960 *Faith Examined* Clark R. Bates,2023-10-13 This book serves two purposes to honor the apologist and author Dr Frank Turek and in the spirit of his ministry present reasoned responses to challenges currently facing the church Every year for more than one decade Dr Turek has hosted the Cross Examined Instructors Academy CIA through his Cross Examined Ministries wherein he leads a group of professors and apologists as they teach and train others in the field of apologetics Several rising stars within the apologetics community began their ministries because of Dr Turek and the CIA The authors of this book were chosen from this ever widening pool of CIA attendees past and present most of whom have gone on to academic instruction or their own successful apologetics ministries Their contributions broadly address challenges from philosophy and science challenges against Jesus and the Bible and even challenges facing parents and the church Many topics offer new approaches while others reestablish existing responses but all seek to provide answers to a skeptical world for the hope that rests within all Christians
