Two Worlds of Drug Consumption in Late Modern Societies Jacek Moskalewicz, 2017-10-24 Two Worlds of Drug Consumption in Late Modern Societies reports the findings of an empirical study of drug users in London Amsterdam Turin Prague Vienna and Warsaw European cities representative of a wide range of drug problems and public policies The innovative study reconceives the standard distinctions between hard core and recreational drug users in terms of their social position The authors argue that this is closely related to consumption patterns rather than drug choice and reveals that 2 relatively homogenous drug worlds exist within each of the study sites This leads to the development of diverging drug markets a friendly market for the integrated consumer and a highly commercialized one for the marginalized customer where low quality goods are sold at a higher price These findings have significant implications for academics and professionals working in health psychology and urban studies

Peroutka, 2012-12-06 The variety of viewpoints expressed in this book illustrate the many controversies surrounding MDMA 1 On the one hand the proponents of MDMA use believe this agent offers a unique psychoactive effect that may have important clinical applications especially in the field of psychotherapy On the other hand the scientific data concerning the neurotoxic effects of the drug are unequivocal The most striking feature of the human information of MDMA is the paucity of data that has been generated on the drug since it was patented in 1914 As pointed out by Beck Chapter 6 and others a clear need exists for better epidemiological and clinical data on MDMA In the absence of such data arguments both for and against the continued use of MDMA with humans will be difficult to support Unfortunately the currently available data must be used to develop rational policies for potential human users of MDMA At the present time there are no data indicating that recreational doses of MDMA permanently damage the human brain Nonetheless based on a review of the contents of this book as well as on informal discussions with approximately 200 recreational users of MDMA the following personal observations suggest that MDMA is radically different from other recreational drugs
