To meet examination and other curriculum requirements, senior students need to make connections beyond the text to themselves, other texts and the wider world. This series aims to guide them to make those connections in a purposeful and meaningful way. Through Arts-Based Educational Research Hala Mreiwed, Mindy R. Carter, Sara Hashem, Candace H.

Blake-Amarante, 2023-02-18 This book explores the connections made in and through arts-based educational research through four themes: socially engaged connections, cultural connections, personal and pedagogical connections, and making connections during the COVID-19 pandemic. It emerges from the 3rd bi-annual 2020 Artful Inquiry Research Group symposium on the theme of connections. The symposium brought together artists, community members, teachers, students and researchers through a virtual platform to examine the ways in which the arts can help connect people, ideas and spaces in a pandemic reality. Art plays a predominant role in each chapter as authors weave their research and art-based understandings together. This book is a valuable teaching resource for undergraduate and postgraduate courses in teaching anthropology, digital ethnography, autoethnography, cultural studies and communications. It is of interest to higher education students, academic researchers and teachers exploring arts-based methodologies in the fields of creative practice and creativity studies, communications, critical studies, sociology, sciences, teacher education and the arts. **Making**

Kathleen Kopp, 2011 Writing is a valuable learning tool that can quite effectively and easily help students learn and understand science content. Teaching it, however, can be challenging for content area teachers now under pressure from the Common Core Standards' refocused attention on reading and writing. With step-by-step directions, rubrics, student examples, templates, technology tips and ideas for differentiation, Kopp goes beyond journals or reports to show how science teachers can use writing to develop critical thinking skills, improve understanding of scientific concepts, assess students' progress and hone skills in content area writing. Her writing strategies support the Common Core Standards and because the focus is on applying writing skills and not teaching writing as an end in itself, science teachers can easily incorporate these strategies in

any unit of study This comprehensive resource makes it easy to incorporate writing in your science class today and every day
