Making Of The Soviet System The:

The Making of the Soviet System Moshe Lewin, 1985 Moshe Lewin traces the transformation of Russian society and the Russian political system in the period between the two world wars a transformation that was to lead to Stalinism in the 1930s Lewin focuses on the changes stemming from war revolution civil war and industrialization and he discusses such topics as rural society and religion in the twentieth century the background of Soviet collectivization Soviet prewar policies of agricultural procurement the kolkhoz and the muzhik Leninism and Bolshevism industrial relations during the five year plans of 1928 1941 and the social background of Stalinism In his introduction Lewin examines the political ideological and cultural developments that accompanied or in some cases resulted from these changes Through this comprehensive approach to understanding the origins and problems of Stalinism Lewin makes a significant contribution to the study of Russia s social history before the revolution as well as in the Soviet period Jacket **Soviet System, The** Fischer, George, The Totalitarian Experiment in Twentieth Century Europe David Roberts, 2006-04-27 By developing a long term supranational perspective this ambitious multi faceted work provides a new understanding of totalitarianism the troubling common element linking Soviet communism Italian fascism and German Nazism The book s original analysis of antecedent ideas on the subject sheds light on the common origins and practices of the regimes Through this fresh appreciation of their initial frame of mind Roberts demonstrates how the three political experiments yielded unprecedented collective mobilization but also a characteristic combination of radicalization myth making and failure Providing deep historical analysis the book proves that totalitarianism best characterizes the common features in the originating aspirations the mode of action and even the outcomes of Soviet communism Italian fascism and German Nazism By enhancing our knowledge of what totalitarianism was and where it came from Roberts affords important lessons about the ongoing challenges possibilities and dangers of the modern political experiment The Totalitarian Experiment in Twentieth-century Europe David D. Roberts, 2006 By assessing totalitarianism in a more deeply historical way this study suggests how we might learn further lessons from this troubling phase of modern political development Jacket Stalinism Nicholas Lampert, Gábor Tamás Rittersporn, 1992 A collection of essays with contributors from Britain continental Europe and USA dealing with the character and aftermath of Stalinism in the USSR concentrating on the inter war years **The Making and Breaking of the Soviet System** Christopher Read, 2001 Drawing on a wide range of post Soviet materials Christopher Read examines the reasons for the successes and failures of the Soviet system He argues that the underlying reasons for the system s collapse can be found in the contradictions of the revolution which gave birth to it The consequences are traced from Stalin to Gorbachev s doomed attempt to transform the Soviet system Particular attention is given to the divergence between the aspirations of the leadership and the social evolution of ordinary Russians *Debates on Stalinism* Mark Edele, 2020-06-11 *Debates on Stalinism* introduces major debates about Stalinism during and after the Cold War Did Stalinism form a system in its own

right or was it a mere stage in the overall development of Soviet society Was it an aberration from Leninism or the logical conclusion of Marxism Was its violence the revenge of the Russian past or the result of a revolutionary mindset Was Stalinism the work of a madman or the product of social forces beyond his control The book shows the complexities of historiographical debates where evidence politics personality and biography are strongly entangled Debates on Stalinism allows readers to better understand not only the history of history writing but also contemporary controversies and conflicts in the successor states of the Soviet Union in particular Russia and Ukraine

Patronage and Politics in the USSR John P. Willerton, 1992 How do Soviet politicians rise to power How are national and regional regimes formed How are conflicting political interests brought together as policies are developed in the Soviet Union In *Patronage and Politics in the USSR* first published in 1991 Professor John Willerton offers major insights into the patronage networks that have dominated elite mobility regime formation and governance in the Soviet Union during the past twenty five years Using the biographical and career details of over two thousand national leaders and regional officials in Azerbaijan and Lithuania John Willerton traces the patron client relations underlying recruitment mobility and policymaking He explores the strategies of power consolidation and coalition building used by Soviet chief executives since 1964 as well as the institutional links and policy outcomes that have resulted from network politics The author also assesses the manner and extent to which leaders in politically stable and less stable settings spanning different national cultural contexts have relied upon patronage networks to consolidate power and to govern Finally Professor Willerton explores how in a period of dramatic change patron client networks may have given way to institutionalised interest groups and political parties

Weapons Under Fire Lauren Holland, 2013-11-26 First Published in 1997 In an effort to find the validity of middle ground this book offers a comprehensive analysis that looks further than the House Committee on National Security's actions on the B 2 bomber President Clinton's campaign promise to support the Seawolf submarine and the Pentagon's use of a concurrent and risky management strategy for the 71.6 billion F 22 fighter aircraft program It provides a dissection of the decision making process for a representative sample of major weapons systems to invalidate the claims that pork and malfeasance are both pervasive and determinate

Blood and Soil Ben Kiernan, 2008 For thirty years Benedict Kiernan has been deeply involved in the study of genocide and crimes against humanity He has played a key role in unearthing confidential documentation of the atrocities committed by the Khmer Rouge His writings have transformed our understanding not only of twentieth century Cambodia but also of the historical phenomenon of genocide This new book— the first global history of genocide and extermination from ancient times— is among his most important achievements Kiernan examines outbreaks of mass violence from the classical era to the present focusing on worldwide colonial exterminations and twentieth century case studies including the Armenian genocide the Nazi Holocaust

Stalin's mass murders and the Cambodian and Rwandan genocides. He identifies connections, patterns and features that in nearly every case gave early warning of the catastrophe to come: racism or religious prejudice, territorial expansionism and cults of antiquity and agrarianism. The ideologies that have motivated perpetrators of mass killings in the past persist in our new century, says Kiernan. He urges that we heed the rich historical evidence with its telltale signs for predicting and preventing future genocides.

Getting to the Top in the USSR: Cyclical Patterns in the Leadership Succession Process R. Judson Mitchell, 1990 *Building Socialism* Yiannis Kokosalakis, 2023-05-25 Provides the first detailed examination of rank and file communist party activism as an element of governance in the Soviet system, offering an empirical account of the bottom level of the apparatus of the Soviet Communist Party in its formative years.

Soviet Power and the Countryside N. Melvin, 2003-11-04 Drawing upon extensive archival and other original sources, *Soviet Power and the Countryside* offers a new approach to understanding the political dynamics that led to the collapse of the Soviet order. A detailed analysis of the design, implementation and collapse of Soviet policy toward the countryside is used to explore the implications of a broadening of participation in the policy process from the 1960s. Neil J. Melvin argues that the new knowledge about rural society created as a result of this process provided the basis for a fundamental change in the nature of power relations in the Soviet order, leading to the decay and eventual collapse of policy-making institutions.

Centre-Local Relations in the Stalinist State, 1928-1941 E. A. Rees, 2002-10-22 This book analyzes the development of the Stalinist state of the 1930s from the perspective of the changing nature of centre-local relations. It examines the trend toward greater central state control over the formation and implementation of economic policy and the shift towards increased state repression through a series of archive-based case studies of the centre's interactions with its republican and regional bodies. The book provides the basis for a new conceptualization of the Stalinist state.

Politics and the Soviet System Thomas F. Remington, 1989-06-18 This collection of essays focuses on topics pertaining to Soviet propaganda and policy making. Among the essays, there is a study of the view of international relations presented by Soviet TV news, a survey of development in comparative communist studies and an analysis of recent changes.

The Dynamics of Soviet Politics Paul Cocks, Robert Vincent Daniels, Nancy Whittier Heer, 1976 *The Dynamics of Soviet Politics* is the result of reflective and thorough research into the centers of a system whose inner debates are not open to public discussion and review, a system which tolerates no public opposition parties, no prying congressional committees and no investigative journalists to ferret out secrets. The expert authors offer an inside view of the workings of this closed system, a view rarely found elsewhere in discussions of Soviet affairs. Their work, building as it does on the achievements of Soviet studies over the last thirty years, is firmly rooted in established knowledge and covers sufficient new ground to enable future studies of Soviet politics and social practices to move ahead unencumbered by stereotypes, sensationalism or mystification. Among the subjects included are attitudes toward leadership and a general discussion of the uses of political history, the dramatic cycles of officially permitted dissent, the

legitimacy of leadership within a system that has no constitutional provision for succession the gradual adoption of Western inspired administrative procedures and systems management a study of group competition and bureaucratic bargaining Khrushchev's virgin lands experiment and its subsequent retrenchment the apolitical values of adolescents the problems of integrating Central Asia into the Soviet system a history of peaceful coexistence and its current importance in Soviet foreign policy priorities and finally an overview of Soviet government as an extension of prerevolutionary oligarchy with an emphasis on adaptation to political change

Cuba's Forgotten Decade Anna Clayfield, Emily J. Kirk, Isabel Story, 2018-08-24 The 1970s have largely been overlooked in scholarly studies of the Cuban Revolution or at the very least dismissed simply as a period of Sovietization characterized by widespread bureaucratization institutionalization and adherence to Soviet orthodoxy Consequently scant research exists that examines the major changes that took place across the decade and their role in determining the course of the Revolution This book provides for the first time a comprehensive assessment of the 1970s which challenges prevailing interpretations Drawing from multidisciplinary perspectives and exploring a range of areas including politics international relations culture education and healthcare its contributing authors demonstrate that the decade was a time of intense transformation which proved pivotal to the development of the Revolution Indeed many of the ideas approaches policies and legislation developed and tested during the 1970s maintain a very visible legacy in contemporary Cuba In highlighting the complexity of the 1970s this volume ultimately aims to contribute to a greater understanding of the Cuban Revolution and how it chooses to face the challenges of the twenty first century

The Other Side of Arms Control Alan B. Sherr, 2020-11-19 How does the Soviet Union view the costs and benefits of nuclear arms control What factors motivate Soviet negotiations with the Western world on this crucial issue And what precisely does the Soviet Union hope to accomplish through nuclear arms control Originally published in 1988 *The Other Side of Arms Control* provides an in depth examination of this too infrequently discussed aspect of the arms race and the ongoing negotiations to halt it In *The Other Side of Arms Control* Alan B Sherr argues that the time is now right for significant substantive progress to be made on nuclear arms control the Soviet leadership under Mikhail Gorbachev has demonstrated greater flexibility and

willingness to compromise on a number of difficult issues including verification But more important circumstances within and outside the Soviet Union now make progress on arms control crucial to Soviet political and economic goals as well as foreign policy objectives Written in accessible nontechnical language The Other Side of Arms Control will be of historical interest to students teachers policymakers and others concerned with the future of nuclear arms control
