None For The Road Understanding Drink Driving:

None for the Road Ronald C. Denney, 1997-01 There is currently much debate about the present UK drink driving limit and whether this should be lowered This book written by one of the country's leading experts on breath testing and alcohol analysis sets out the arguments for doing so supported by empirical statistical and circumstantial evidence It also promotes the idea that breath testing should be applied to cyclists and pedestrians as well as drivers The relationship between alcohol consumption and breath and blood alcohol levels is carefully explained Legal limits for drinking and driving are dealt with in relation to the possibility of being involved in an accident Legislation and international approaches to dealing with drink drive problems are discussed and the scientific aspects of alcohol measurement and analysis are dealt with in a clear unambiguous manner The text is liberally illustrated with photographs graphs and tables

The Psychology of Driving Graham J. Hole, 2014-07-10 Road accidents are the major cause of death and injury among young people in the developing world and the field of psychology can offer great insights into the many factors that are at play when we get behind the wheels of our cars Based on data collected around the world on drivers of all age groups Graham Hole provides an up to date picture of the realities of driving including visual perception issues cell phone distractions fatigue drugs and the effects of aging These insights can help explain why we crash as well as how we achieve the amazing feat of not crashing more often than we do In this jargon free and very accessible book Hole applies psychological methods and insights to this every day experience with two audiences in mind First he speaks to accident investigators who frequently rely on well developed understandings of engineering and forensics and less insight into the psychology of the driver Second of course this book will be of value to anyone interested in the application of cognitive psychology to real world behaviors and to anyone who drives

Lawyers Guide to Forensic Medicine Knight, 1998 This is an updated edition of a successful handbook already popular with barristers solicitors and a number of judges as a readily accessible source of quick reference on a wide range of medico legal topics Written by a legally qualified Professor of Forensic Pathology and former Home Office pathologist it utilises more than 40 years experience to offer a succinct summary of over 200 medico legal topics Though arranged in alphabetical order this is not just a medical dictionary as these contain much that is not relevant to legal practice and fail to provide a sufficiently expansive account of medico legal matters Instead it is a carefully selected compendium dealing with those subjects which are most commonly encountered in case papers conferences and the courts It offers a concise overview of factors of importance in many medico legal problems from alcohol to head injury from traffic deaths to child abuse so that the medical evidence can be quickly evaluated and any deficiencies detected it indicates the limits of reliability of various procedures and commonly held medical opinions and points out those which are frequently over interpreted Liberally provided with clear line diagrams including body maps it provides a graphic exposition of many anatomical and medical terms free from professional jargon

Ending the Scandal of Complacency Great Britain. Parliament. House of Commons. Transport Committee, 2008 Although road accident deaths have halved between 1958 and 2007 whilst the number of licensed motor vehicles and vehicle mileage covered increased by 400 per cent the current rate of 3 000 deaths and 250 000 injuries is still an unacceptably high level Road accidents are the largest single cause of death for people between the ages of 5 and 35 in Britain and road accidents cost our economy some 18 billion each year The number of deaths and injuries on roads far outweighs the deaths and injuries in other transport modes and should be viewed as a major public health problem The Government should establish a British Road Safety Survey to track overall casualty and safety trends and review current methods for recording road traffic injuries The Committee recommends a systems approach to road safety ensuring the vehicle the road infrastructure regulations and driver training are designed to similar safety and performance standards Other recommendations include more 20 mph speed limits a more proactive approach to determining the safety benefits of

new vehicle technologies action on young drivers who represent a disproportionate risk to road users and vulnerable users motorcyclists elderly and child pedestrians and cyclists horse riders a higher priority given to enforcement of drink drive and drug drive offences The Committee recommends the establishment of an independent Road Safety Commission with powers to work across the whole of government ensuring that a high priority and adequate resources are given to road safety and that all government departments and agencies give active support The Government should also establish a road accident investigation branch like those in aviation rail and marine The Food and Drink Police James T.
