Nonlinear Diffusion Equations

Gabriela Marinoschi

Nonlinear Diffusion Equations:

Nonlinear Diffusion Equations Zhuoqun Wu, 2001 Nonlinear diffusion equations an important class of parabolic equations come from a variety of diffusion phenomena which appear widely in nature They are suggested as mathematical models of physical problems in many fields such as filtration phase transition biochemistry and dynamics of biological groups In many cases the equations possess degeneracy or singularity The appearance of degeneracy or singularity makes the study more involved and challenging Many new ideas and methods have been developed to overcome the special difficulties caused by the degeneracy and singularity which enrich the theory of partial differential equations This book provides a comprehensive presentation of the basic problems main results and typical methods for nonlinear diffusion equations with degeneracy Some results for equations with singularity are touched upon Contents Newtonian Filtration Equations Existence and Uniqueness of Solutions One Dimensional Case Existence and Uniqueness of Solutions Higher Dimensional Case Regularity of Solutions One Dimensional Case Regularity of Solutions Higher Dimensional Case Properties of the Free Boundary One Dimensional Case Properties of the Free Boundary Higher Dimensional Case Initial Trace of Solutions Other Problems Non Newtonian Filtration Equations Existence of Solutions Harnack Inequality and Initial Trace of Solutions Regularity of Solutions Uniqueness of Solutions Properties of the Free Boundary Other Problems General Quasilinear Equations of Second Order Weakly Degenerate Equations in One Dimension Weakly Degenerate Equations in Higher Dimension Strongly Degenerate Equations in One Dimension Degenerate Equations in Higher Dimension without Terms of Lower Order General Strongly Degenerate Equations in Higher Dimension Classes BV and BV x Nonlinear Diffusion Equations of Higher Order Similarity Solutions of a Fourth Order Equation Equations with Double Degeneracy CahnOCohilliard Equation with Constant Mobility CahnOCohilliard Equations with Positive Concentration Dependent Mobility Thin Film Equation CahnOCohilliard Equation with Degenerate Mobility Readership Researchers lecturers and graduate students in the fields of analysis and differential equations mathematical physics and fluid mechanics

Nonlinear Diffusion Equations and Their Equilibrium States, 3 N.G Lloyd, M.G. Ni, L.A. Peletier, J. Serrin, 1991-06-01 Nonlinear diffusion equations have held a prominent place in the theory of partial differential equations both for the challenging and deep mathematical questions posed by such equations and the important role they play in many areas of science and technology Examples of current interest are biological and chemical pattern formation semiconductor design environmental problems such as solute transport in groundwater flow phase transitions and combustion theory Central to the theory is the equation $U_t + \text{div}(\nabla U) = f$ Here $\text{div}(\nabla U)$ denotes the n dimensional Laplacian div and f are given functions and the solution is defined on some domain $\Omega \times [0, T]$ in space time Fundamental questions concern the existence uniqueness and regularity of solutions the existence of interfaces or free boundaries the question as to whether or not the solution can be continued for all time the asymptotic behavior both in time and space and the development of singularities for instance when the solution

ceases to exist after finite time either through extinction or through blow up

Smoothing and Decay Estimates for Nonlinear Diffusion Equations Juan Luis Vázquez, 2006-08-03 This text is concerned with the quantitative aspects of the theory of nonlinear diffusion equations which can be seen as nonlinear variations of the classical heat equation They appear as mathematical models in different branches of Physics Chemistry Biology and Engineering and are also relevant in differential geometry and relativistic physics Much of the modern theory of such equations is based on estimates and functional analysis Concentrating on a class of equations with nonlinearities of power type that lead to degenerate or singular parabolicity equations of porous medium type the aim of this text is to obtain sharp a priori estimates and decay rates for general classes of solutions in terms of estimates of particular problems These estimates are the building blocks in understanding the qualitative theory and the decay rates pave the way to the fine study of asymptotics Many technically relevant questions are presented and analyzed in detail A systematic picture of the most relevant phenomena is obtained for the equations under study including time decay smoothing extinction in finite time and delayed regularity

Nonlinear Diffusion William Edward Fitzgibbon, Homer Franklin Walker, 1977

Nonlinear Diffusion Equations and Their Equilibrium States I W.-M. Ni, L.A. Peletier, James Serrin, 2012-12-06 In recent years considerable interest has been focused on nonlinear diffusion problems the archetypical equation for these being $U_t = D \Delta u + f(u)$ Here D denotes the n dimensional Laplacian the solution $u(x, t)$ is defined over some space time domain of the form $\mathbb{R}^n \times [0, T]$ and $f(u)$ is a given real function whose form is determined by various physical and mathematical applications These applications have become more varied and widespread as problem after problem has been shown to lead to an equation of this type or to its time independent counterpart the elliptic equation of equilibrium $D \Delta u + f(u) = 0$ Particular cases arise for example in population genetics the physics of nuclear stability phase transitions between liquids and gases flows in porous media the Lend Emden equation of astrophysics various simplified combustion models and in determining metrics which realize given scalar or Gaussian curvatures In the latter direction for example the problem of finding conformal metrics with prescribed curvature leads to a ground state problem involving critical exponents Thus not only analysts but geometers as well can find common ground in the present work The corresponding mathematical problem is to determine how the structure of the nonlinear function $f(u)$ influences the behavior of the solution

Degenerate Nonlinear Diffusion Equations Angelo Favini, Gabriela Marinoschi, 2012-05-08 The aim of these notes is to include in a uniform presentation style several topics related to the theory of degenerate nonlinear diffusion equations treated in the mathematical framework of evolution equations with multivalued nonaccretive operators in Hilbert spaces The problems concern nonlinear parabolic equations involving two cases of degeneracy More precisely one case is due to the vanishing of the time derivative coefficient and the other is provided by the vanishing of the diffusion coefficient on subsets of positive measure of the domain From the mathematical point of view the results presented in these notes can be considered as general results in the theory of degenerate nonlinear diffusion equations However this work does not seek

to present an exhaustive study of degenerate diffusion equations but rather to emphasize some rigorous and efficient techniques for approaching various problems involving degenerate nonlinear diffusion equations such as well posedness periodic solutions asymptotic behaviour discretization schemes coefficient identification and to introduce relevant solving methods for each of them

Nonlinear Diffusion Equations and Their Equilibrium States I W.-M. Ni, L.A.

Peletier, James Serrin, 1988-06-24 In recent years considerable interest has been focused on nonlinear diffusion problems the archetypical equation for these being $U_t = D(u)f(u)$ Here D denotes the n dimensional Laplacian the solution $u(x,t)$ is defined over some space time domain of the form $n \times [0, T]$ and $f(u)$ is a given real function whose form is determined by various physical and mathematical applications These applications have become more varied and widespread as problem after problem has been shown to lead to an equation of this type or to its time independent counterpart the elliptic equation of equilibrium $D(u)f(u) = 0$ Particular cases arise for example in population genetics the physics of nuclear stability phase transitions between liquids and gases flows in porous media the Lend Emden equation of astrophysics various simplified combustion models and in determining metrics which realize given scalar or Gaussian curvatures In the latter direction for example the problem of finding conformal metrics with prescribed curvature leads to a ground state problem involving critical exponents Thus not only analysts but geometers as well can find common ground in the present work The corresponding mathematical problem is to determine how the structure of the nonlinear function $f(u)$ influences the behavior of the solution

Semigroup Approach To Nonlinear Diffusion Equations

Viorel Barbu, 2021-09-23 This book is concerned with functional methods nonlinear semigroups of contractions nonlinear non accretive operators and variational techniques in the theory of nonlinear partial differential equations of elliptic and parabolic type In particular applications to the existence theory of nonlinear parabolic equations nonlinear Fokker Planck equations phase transition and free boundary problems are presented in details Emphasis is put on functional methods in partial differential equations PDE and less on specific results

Nonlinear Diffusion Equations and Their Equilibrium States, 3 N. G. Lloyd, 1992-01-01

Nonlinear Diffusion Equations

and Their Equilibrium States II W.-M. Ni, L.A. Peletier, James Serrin, 2012-12-06 In recent years considerable interest has been focused on nonlinear diffusion problems the archetypical equation for these being $U_t = U f(u)$ Here denotes the n dimensional Laplacian the solution $u(x,t)$ is defined over some space time domain of the form $n \times [0, T]$ and $f(u)$ is a given real function whose form is determined by various physical and mathematical applications These applications have become more varied and widespread as problem after problem has been shown to lead to an equation of this type or to its time independent counterpart the elliptic equation of equilibrium $u f(u) = 0$ Particular cases arise for example in population genetics the physics of nuclear stability phase transitions between liquids and gases flows in porous media the Lend Emden equation of astrophysics various simplified combustion models and in determining metrics which realize given scalar or Gaussian curvatures In the latter direction for example the problem of finding conformal metrics with prescribed curvature leads to a

ground state problem involving critical exponents Thus not only analysts but geometers as well can find common ground in the present work The corresponding mathematical problem is to determine how the structure of the nonlinear function $f(u)$ influences the behavior of the solution

The Nonlinear Diffusion Equation J.M. Burgers, 2013-12-11 Since the Introduction to the main text gives an account of the way in which the problems treated in the following pages originated this Preface may be limited to an acknowledgement of the support the work has received It started during the period when I was professor of aero and hydrodynamics at the Technical University in Delft Netherlands and many discussions with colleagues have influenced its development Of their names I mention here only that of H.A. Kramers Papers No 1-13 of the list given at the end of the text were written during that period Several of these were attempts to explore ideas which later had to be abandoned but gradually a line of thought emerged which promised more definite results This line began to come to the foreground in paper No 3 1939 while a preliminary formulation of the results was given in paper No 12 1954 At that time however there still was missing a practical method for manipulating a certain distribution function of central interest A six months stay at the Hydrodynamics Laboratories of the California Institute of Technology Pasadena California 1950-1951 was supported by a Contract with the Department of the Air Force No AF 33 038 17207 A course of lectures was given during this period which were published in typescript under the title On Turbulent Fluid Motion as Report No E 34 1 July 1951 of the Hydrodynamics Laboratory

Solutions of a Family of Nonlinear Diffusion Equations for Semi-infinite Media Ray E. Kidder, 1962

Travelling Waves in Nonlinear Diffusion-Convection Reaction Brian H. Gilding, Robert Kersner, 2004-07-23 This monograph has grown out of research we started in 1987 although the foundations were laid in the 1970s when both of us were working on our doctoral theses trying to generalize the now classic paper of Oleinik-Kalashnikov and Chzhou on nonlinear degenerate diffusion Brian worked under the guidance of Bert Peletier at the University of Sussex in Brighton England and later at Delft University of Technology in the Netherlands on extending the earlier mathematics to include nonlinear convection while Robert worked at Lomonosov State University in Moscow under the supervision of Anatolii Kalashnikov on generalizing the earlier mathematics to include nonlinear absorption We first met at a conference held in Rome in 1985 In 1987 we met again in Madrid at the invitation of Ildefonso Diaz where we were both staying at La Residencia As providence would have it the University Complutense closed down during this visit in response to student demonstrations and we were very much left to our own devices It was natural that we should gravitate to a research topic of common interest This turned out to be the characterization of the phenomenon of finite speed of propagation for nonlinear reaction-convection-diffusion equations Brian had just completed some work on this topic for nonlinear diffusion-convection while Robert had earlier done the same for nonlinear diffusion-absorption There was no question but that we bundle our efforts on the general situation

Nonlinear Diffusion Equations and Curvature Conditions in Metric Measure Spaces Luigi Ambrosio, Andrea Mondino, Giuseppe Savaré, 2019 Aim of this paper is to provide new characterizations of the curvature

dimension condition in the context of metric measure spaces X, d, m . On the geometric side our new approach takes into account suitable weighted action functionals which provide the natural modulus of K convexity when one investigates the convexity properties of N dimensional entropies. On the side of diffusion semigroups and evolution variational inequalities our new approach uses the nonlinear diffusion semigroup induced by the N dimensional entropy in place of the heat flow. Under suitable assumptions most notably the quadraticity of Cheeger's energy relative to the metric measure structure both approaches are shown to be equivalent to the strong CD (K, N) condition of Bacher Sturm.

Nonlinear Diffusion Equations and Their Equilibrium States, 1988 **Dual Variational Approach to Nonlinear Diffusion Equations** Gabriela Marinoschi, 2023-03-28

This monograph explores a dual variational formulation of solutions to nonlinear diffusion equations with general nonlinearities as null minimizers of appropriate energy functionals. The author demonstrates how this method can be utilized as a convenient tool for proving the existence of these solutions when others may fail such as in cases of evolution equations with nonautonomous operators with low regular data or with singular diffusion coefficients. By reducing it to a minimization problem the original problem is transformed into an optimal control problem with a linear state equation. This procedure simplifies the proof of the existence of minimizers and in particular the determination of the first order conditions of optimality. The dual variational formulation is illustrated in the text with specific diffusion equations that have general nonlinearities provided by potentials having various stronger or weaker properties. These equations can represent mathematical models to various real world physical processes. Inverse problems and optimal control problems are also considered as this technique is useful in their treatment as well.

On the Solution of Nonlinear Diffusion Equations M. J. Baines, 1988 **Solutions for Nonlinear Diffusion Equations with Integral Type Boundary Conditions** Kenneth Laurel Deckert, 1963 *Analysis of Nonlinear Diffusion Equations of Second and Fourth Order* Maria Pia Gualdani, 2005

Reduced Basis for Nonlinear Diffusion Equations Mohammad Rasty, 2016

Nonlinear Diffusion Equations Book Review: Unveiling the Power of Words

In a global driven by information and connectivity, the ability of words has are more evident than ever. They have the capability to inspire, provoke, and ignite change. Such could be the essence of the book **Nonlinear Diffusion Equations**, a literary masterpiece that delves deep to the significance of words and their effect on our lives. Compiled by a renowned author, this captivating work takes readers on a transformative journey, unraveling the secrets and potential behind every word. In this review, we will explore the book is key themes, examine its writing style, and analyze its overall affect readers.

Nonlinear Diffusion Equations Introduction

In the digital age, access to information has become easier than ever before. The ability to download Nonlinear Diffusion Equations has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Nonlinear Diffusion Equations has opened up a world of possibilities. Downloading Nonlinear Diffusion Equations provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Nonlinear Diffusion Equations has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Nonlinear Diffusion Equations. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Nonlinear Diffusion Equations. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Nonlinear Diffusion Equations, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Nonlinear Diffusion Equations has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it

offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Nonlinear Diffusion Equations Books

1. Where can I buy Nonlinear Diffusion Equations books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Nonlinear Diffusion Equations book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Nonlinear Diffusion Equations books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Nonlinear Diffusion Equations audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media.

or recommend them to friends.

9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Nonlinear Diffusion Equations books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
