One Parent One Language:

Language Strategies for Bilingual Families Suzanne Barron-Hauwaert, 2004-01-01 This book looks at how families can support and increase bilingualism through planned strategies One such strategy is the one person one language approach where each parent speaks his or her language Over a hundred families from around the world were questioned and thirty families were interviewed in depth about how they pass on their language in bilingual or trilingual families *One Parent One Language* Susanne Döpke, 1992-11-13 This volume examines the relationship between young children's degrees of bilingualism and features of the verbal input which these children receive from their parents In particular it seeks to explore the following question to what extent are families who follow the one parent one language principle and whose children become active bilinguals this way different from families who take the same approach but whose children never develop an active command of the minority language Case studies of six first born children growing up with German and English were done during the children's third year of life The input the children received was examined for parents consistency of language choice parents insistence that the children use the appropriate language parents sensitivity towards the children's interactional and attentional needs and parents orientation towards the teaching of formal aspects of the linguistic system The findings support the notion that raising one's children bilingually according to the one parent one language principle involves great efforts on the side of the minority language speaking parent Importantly they indicate that these efforts must be invested in the child's education turn by turn *One Parent, One Language* Susanne Döpke, 1992-01-01 This volume examines the relationship between young children's degrees of bilingualism and features of the verbal input which these children receive from their parents In particular it seeks to explore the following question to what extent are families who follow the one parent one language principle and whose children become active bilinguals this way different from families who take the same approach but whose children never develop an active command of the minority language Case studies of six first born children growing up with German and English were done during the children's third year of life The input the children received was examined for parents consistency of language choice parents insistence that the children use the appropriate language parents sensitivity towards the children's interactional and attentional needs and parents orientation towards the teaching of formal aspects of the linguistic system The findings support the notion that raising one's children bilingually according to the one parent one language principle involves great efforts on the side of the minority language speaking parent Importantly they indicate that these efforts must be invested in the child's education turn by turn

Raising Children Bilingually Through the 'one Parent-one Language' Approach Masae Takeuchi, 2006 Parents who come from different language backgrounds often hope that their children will be able to speak the languages of both their parents In families where this is the goal the one parent one language approach Ronjat 1913 is widely used The one parent one language approach is relatively effective in promoting active bilingualism among young children in a society

where there is little support for the minority language. However, there is a general perception that maintenance of the minority language into middle childhood and beyond is difficult as during this period children's contacts with the outside world expand and the input in the majority language increases. This book examines the sociolinguistic environment and the nature of parental input for children from Japanese Australian families who have been exposed to Japanese and English through the one parent one language approach in Australia. The research on which the book is based identifies factors which account for successful and unsuccessful cases of Japanese language maintenance of children from those families. The major part of this study involves discourse analysis of the conversations between four Japanese mothers and their primary school aged children based on audio recordings over a period of 21 months. This qualitative approach is complemented by a quantitative study interviewing 25 Japanese mothers about their children's language experience.

Language Use in Interlingual Families Masayo Yamamoto, 2001. This book introduces the way languages are used in Japanese English interlingual families in Japan and explains what factors influence their language choice with the aim of arriving at a predictive model of language use. It also proposes a taxonomy of interlingual family types and a typological model of language use.

Language Processing in Bilingual Children Ellen Bialystok, 1991-05-09. A collection of papers that explore bilingual children coping with two language systems.

Bilingual Siblings Suzanne Barron-Hauwaert, 2011-01-13. How do bilingual brothers and sisters talk to each other? Sibling language use is an uncharted area in studies of bilingualism. From a perspective of independent researcher and parent of three bilingual children, Suzanne Barron-Hauwaert discusses the issues of a growing bilingual or multilingual family. What happens when there are two or more children at different stages of language development? Do all the siblings speak the same languages? Which languages do the siblings prefer to speak together? Could one child refuse to speak one language while another child is fluently bilingual? How do the factors of birth order, personality or family size interact in language production? With data from over 100 international families, this book investigates the reality of family life with two or more children and languages.

Foundations of Bilingual Education and Bilingualism Colin Baker, 2006-01-01. Written as an introductory text from a crossdisciplinary perspective, this book covers individual and societal concepts in minority and majority languages.

Language Mixing in Infant Bilingualism Elizabeth Lanza, 2004. This book addresses the issue of language contact in the context of child language acquisition. Elizabeth Lanza examines in detail the simultaneous acquisition of Norwegian and English by two first born children in families living in Norway in which the mother is American and the father Norwegian. She connects psycholinguistic arguments with sociolinguistic evidence, adding a much needed dimension of real language use in context to the psycholinguistic studies which have dominated the field. She draws upon evidence from other studies to support her claims concerning language dominance and the child's differentiation between the two languages in relation to the situation, interlocutor and the communicative demands of the context. She also addresses the question of whether or not the language

mixing of infant bilingualism is conceptually different from the codeswitching of older bilinguals thus helping to bridge the gap between these two fields of study **Language Maintenance and Shift** Anne Pauwels, 2016-08-04 What motivates some linguistic minorities to maintain their language Why do others shift away from it rather quickly Are there specific conditions environmental or personal influencing these dynamics What can families and communities do to pass on their threatened language to the next generation These and related questions are investigated in detail in *Language Maintenance and Shift* In this fascinating book Anne Pauwels analyses the patterns of language use exhibited by individuals and groups living in multilingual societies and explores their efforts to maintain their heritage or minority language She explores the various methods used to analyse language maintenance from linguistic demography to linguistic biography and offers guidance on how to research the language patterns and practices of linguistic minorities around the world
