Perspectives on the Ancient Maya of Chetumal Bay Debra S. Walker, 2016-10-04 Brings novel synthetic insight to understanding a region that was a hub of waterborne trade and an important locus of production for some of the Maya's most valued crops Cynthia Robin author of *Everyday Life Matters Maya Farmers at Chan* This one of a kind volume shows us how important this region was to the ancient Maya with detailed and vivid descriptions of sociopolitical and economic organization and their relation to the unique landscape and geography of Chetumal Bay Laura J Kosakowsky author of *Preclassic Maya Pottery at Cuello Belize* Chetumal Bay is central to discussions of ancient Maya politics warfare economy exchange and communication because of its unique location Although the ancient Maya invested prodigious amounts of labor in the construction of road systems called *sacbeob* for communication and trade recent archaeological discoveries around Chetumal Bay in both Belize and Mexico reveal an economic alternative to these roads an extensive network of riverine and maritime waterways Focusing on sites ringing the bay such as Cerro Maya Oxtankah and Santa Rita Corozal the contributors to this volume explore how the bay and its feeder rivers affected all aspects of Maya culture from settlement food production and the production and use of special goods to political relationships and social organization Besides being a nexus for long distance exchange in valuable materials such as jade and obsidian the region was recognized for its high quality agricultural produce including cacao achiote vanilla local fruits honey and salt and for its rich marine environment The Maya living on the fringes of the bay perceived the entire region as a single resource procurement zone Waterborne trade brought the world to them providing a wider horizon than would have been available to inland cities dependent only on Maya roads for news of the world The research reveals that trade relations played a central role in the organization of human social life on Chetumal Bay Contributors James Aimers Timothy Beach Clifford Brown Beverly A Chiarulli Lisa G Duffy Dori Farthing David A Freidel Elizabeth Graham Thomas Guderjan Elizabeth Haussner Linda Howie Samantha Krause Javier Lopez Camacho Sheryl Luzzadder Beach Marc D Marino Lucas R Martindale Johnson Heather McKillop Nathan J Meissner Emiliano Ricardo Melgar T soc Susan Milbrath Satoru Murata Maxine Oland Terry Powis Kathryn Reese Taylor Robin Robertson Luis A Torres D az Araceli Vzquez Villegas Debra S Walker The Value of Things Jennifer P. Adrienne Rich's Later Poetry Alec Marsh, 2024-12-12 Reorienting understandings of Adrienne Rich's later work through her interest in Marx and Marxist politics this book engages with this overlooked part of her oeuvre through considerations of issues such as race nationhood and gender From 1983 onward after she visited revolutionary Nicaragua until the end of her life Rich's political vision can best be described as Marxist Humanist Until recently very little attention has been paid to Rich's interest in Marx there is no in depth treatment of the effect of Marx's humanistic philosophy on Rich's later work or even on her unwavering but altered dedication to Women's Liberation This book fills this gap showing how Rich's discovery of Marx's humanism affected her poetry In doing so it makes a significant intervention into debates about the direction of American poetics and argues powerfully for a greater consciousness of political engagement through poetry

Exploring the Thames Rivers and Streams Richard Mayon-White, Wendy Yorke, 2025-06-12 A guide to exploring and enjoying the river Thames and its tributaries through the 50 best riverside walks The River Thames is a beautifully rich and diverse 215 mile stretch of water that so many of us enjoy walking along for half an hour half a day or days on end courtesy of the wonderful Thames Path Explore further and you discover the Thames tributaries the rivers and streams that flow into the Thames from miles in all directions This natural network has an enormous catchment area right across Southern England into the Thames Estuary From a small source stream in Gloucestershire across varied and historic countryside through London and into the wide estuary entering the North Sea the Thames and its tributaries are a plentiful area for exploration and enjoyment Exploring the Thames Rivers and Streams helps you do just that The book presents the 33 primary rivers that flow from the Thames and within these chapters describes 50 wonderful walks that best explore the beauty these tributaries have to offer The walks vary between 4 and 12 miles long and explore a variety of chalk streams wet woodlands lakes reedbeds flood meadows and canals where you can pause observe the wildlife read about the interesting and historical places featured or enjoy the waterside with a wild swim picnic or paddle Each chapter also features beautiful photography and informative maps

The Rough Guide to Walks in London and Southeast England Judith Bamber, Helena Smith, 2003 This book contains 35 walks all with detailed Ordnance Survey based maps clear route directions and full descriptions of the sights passed en route as well as stimulating background on local history and wildlife The walks range from short strolls in inner London to extended rural hikes throughout southeast England covering areas as far afield as the New forest the South Downs and the fens A number of the routes can be combined into tow day walks if you want to make a weekend of it All the walks are designed to be accessible using public transport and all feature recommended lunch stops

Landscapes and Societies I. Peter Martini, Ward Chesworth, 2010-11-09 This book contains case histories intended to show how societies and landscapes interact The range of interest stretches from the small groups of the earliest Neolithic through Bronze and Iron Age civilizations to modern nation states The coexistence is of its very nature reciprocal resulting in changes in both society and landscape In some instances the adaptations may be judged successful in terms of human needs but failure is common and even the successful cases are ephemeral when judged in the light of history Comparisons and contrasts between the various cases can be made at various scales from global through inter regional to regional and smaller scales At the global scale all societies deal with major problems of climate change sea level rise and with ubiquitous problems such as soil erosion and landscape degradation Inter regional differences bring out significant detail with one region suffering from drought when another suffers from widespread flooding For example desertification in North Africa and the Near East contrasts with the temperate countries of southern Europe where the landscape effects of deforestation are more obvious And China and Japan

offer an interesting comparison from the standpoint of geological hazards to society large unpredictable and massively erosive rivers in the former case volcanoes and accompanying earthquakes in the latter Within the North African region localized climatic changes led to abandonment of some desertified areas with successful adjustments in others with the ultimate evolution into the formative civilization of Egypt the Gift of the Nile At a smaller scale it is instructive to compare the city states of the Medieval and early Renaissance times that developed in the watershed of a single river the Arno in Tuscany and how Pisa Siena and Florence developed and reached their golden periods at different times depending on their location with regard to proximity to the sea to the main trunk of the river or in the adjacent hills Also noteworthy is the role of technology in opening up opportunities for a society Consider the Netherlands and how its history has been formed by the technical problem of a populous society dealing with too much water as an inexorably rising sea threatens their landscape or the case of communities in Colorado trying to deal with too little water for farmers and domestic users by bringing their supply over a mountain chain These and others cases included in the book provide evidence of the successes near misses and outright failures that mark our ongoing relationship with landscape throughout the history of Homo sapiens The hope is that compilations such as this will lead to a better understanding of the issue and provide us with knowledge valuable in planning a sustainable modus vivendi between humanity and landscape for as long as possible Audience The book will interest geomorphologists geologists geographers archaeologists anthropologists ecologists environmentalists historians and others in the academic world Practically planners and managers interested in landscape environmental conditions will find interest in these pages and more generally the increasingly large body of opinion in the general public with concerns about Planet Earth will find much to inform their opinions Extra material The color plate section is available at <http://extras.springer.com>
