

A photograph of a narrow, stone-paved path winding through a dense forest. The path is covered in fallen leaves and is flanked by tall, mossy trees. A wooden signpost with a horizontal arrow pointing left stands on the right side of the path. The scene is misty and atmospheric, with soft light filtering through the trees.

Philosophic Problems An Introduction 2nd Edition:

Basic Issues in Medieval Philosophy - Second Edition Richard N. Bosley, Martin M. Tweedale, 2006-05-09 In this important collection the editors argue that medieval philosophy is best studied as an interactive discussion between thinkers working on very much the same problems despite being often widely separated in time or place Each section opens with at least one selection from a classical philosopher and there are many points at which the readings chosen refer to other works that the reader will also find in this collection There is a considerable amount of material from central figures such as Augustine Abelard Duns Scotus and William of Ockham as well as extensive texts from thinkers in the medieval Islamic world Each selection is prefaced by a brief introduction by the editors providing a philosophical and religious background to help make the material more accessible to the reader This edition updated throughout contains a substantial new chapter on medieval psychology and philosophy of mind with texts from authors not previously represented such as John Buridan and Peter John Olivi

First Philosophy: Concise - Second Edition Andrew Bailey, 2012-01-30 Andrew Bailey's highly regarded introductory anthology has been revised and updated in this new concise edition Mindful of the intrinsic difficulty of the material the editors provide comprehensive introductions both to each topic and to each individual selection By presenting a detailed discussion of the historical and intellectual background to each piece the editors enable readers to approach the material without unnecessary barriers to understanding Helpful explanatory footnotes are provided throughout and new sections on philosophical puzzles and paradoxes and philosophical terminology have been added

Philosophical Foundation Surrendra Gangadean, 2008 Philosophical Foundation argues for clarity over and against meaninglessness which is implicit in various forms of skepticism and fideism Throughout the book critical analysis is applied to unexamined assumption in the areas of metaphysics and ethics in order to address long standing disputes The basic beliefs of western naturalism eastern idealism Greek dualism post modern anti realism and classical theism are incisively analyzed by reason for their coherence of meaning Those who have questions about knowledge and certainty faith and reason the existence of God and the problem of evil will find critical insight throughout this study in its use of presuppositional thinking Book jacket

Ethics: The Basics, 2nd Edition John Mizzoni, 2017-03-27 Updated and revised Ethics The Basics Second Edition introduces students to fundamental ethical concepts principles theories and traditions while providing them with the conceptual tools necessary to think critically about ethical issues Introduces students to core philosophical problems in ethics in a uniquely reader friendly manner Lays out clearly and simply a rich collection of ethical concepts principles theories and traditions that are prevalent in today's society Considers western and non western viewpoints and religious interpretations of ethical principles Offers a framework for students to think about and navigate through an array of philosophical questions about ethics

The Oxford Handbook of Philosophical Methodology Herman Cappelen, Tamar Gendler, John P. Hawthorne, 2016 This is the most comprehensive book ever published on philosophical methodology A team of thirty eight of the world's leading philosophers

present original essays on various aspects of how philosophy should be and is done The first part is devoted to broad traditions and approaches to philosophical methodology including logical empiricism phenomenology and ordinary language philosophy The entries in the second part address topics in philosophical methodology such as intuitions conceptual analysis and transcendental arguments The third part of the book is devoted to essays about the interconnections between philosophy and neighbouring fields including those of mathematics psychology literature and film and neuroscience

The Affordable Care Act Decision Fritz Allhoff, Mark Hall, 2014-02-18 Interest in NFIB v Sebelius has been extraordinarily high from as soon as the legislation was passed through lower court rulings the Supreme Court's grant of certiorari and the decision itself both for its substantive holdings and the purported behind the scene dynamics Legal blogs exploded with analysis bioethicists opined on our collective responsibilities and philosophers tackled concepts like coercion and the activity inactivity distinction This volume aims to bring together scholars from disparate fields to analyze various features of the decision It comprises over twenty essays from a range of academic disciplines namely law philosophy and political science Essays are divided into five units context and history analyzing the opinions individual liberty Medicaid and future implications

Essays in Philosophy Thomas Vernor Smith, William Kelley Wright, 1929 Foundations of Space-Time Theories John Earman, Clark N. Glymour, John J. Stachel, 1977-11-25 Foundations of Space Time Theories was first published in 1977 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions The essays in this volume are based on the papers given at a conference on the philosophical aspects of the space time theory held under the auspices of the Minnesota Center for Philosophy of Science

Contemporary African Metaphysical Thought Ada Agada, Emmanuel Ofuasia, Bruno Yammeluan Ikuli, 2024-12-22 African metaphysics question a variety of issues ranging from the nature of fundamental reality to the meaning of human existence African philosophers have introduced groundbreaking metaphysical theories in response to these metaphysical issues and questions These theories provide uniquely African perspectives that challenge philosophers to look inwards and produce globally competitive ideas instead of exoticising traditional African worldviews for the intellectual entertainment of a non African audience This volume advances the field of African metaphysics by critically engaging with key metaphysical ideas and concepts developed by African metaphysical thinkers The chapters contributed in this volume by established researchers and promising young scholars challenge and modify existing metaphysical theories while proposing novel theories that shape debates in the field

Philosophy and Technology II Carl Mitcham, Alois Huning, 2012-12-06 Until recently the philosophy and history of science proceeded in a separate way from the philosophy and history of technology and indeed with respect to both science and technology philosophical and historical inquiries were also following their separate ways Now we see in the past quarter century how the philosophy of science has been profoundly influenced by historical studies of the sciences and no longer concerned so single mindedly with the analysis of theory and

explanation with the relation between hypotheses and experimental observation Now also we see the traditional historical studies of technology supplemented by philosophical questions and no longer so plainly focussed upon contexts of application on invention and practical engineering and on the mutually stimulating relations between technology and society Further alas the neat division of intellectual labor those clearly drawn distinctions between science and technology between the theoretical and the applied between discovery and justification between internalist and externalist approaches all have become muddled Partly this is due to internal revolutions within the philosophy and history of science the first result being recognition of their mutual relevance Partly however this state of muddle is due to external factors science at the least in the last half century has become so intimately connected with technology and technological developments have created so many new fields of scientific and philosophical inquiry that any critical reflection on scientific and technological endeavors must henceforth take their interaction into account
