Primitive Classification Hardcover By Durkheim Emile Mauss Marcel:

Primitive Classification Émile David Durkheim, Marcel Mauss, 1963 Primitive Classification, by Émile Durkheim and Marcel Mauss. Translated from the French and Edited with an Introd. by Rodney Needham Émile Durkheim, Marcel Mauss, 1963 **Primitive Classification** Émile Durkheim, Marcel Mauss, 1978 Primitive Classification (Routledge Revivals) Emile Durkheim, Marcel Mauss, 2009-12-15 In this influential work first published in English in 1963 Durkheim and Mauss claim that the individual mind is capable of classification and they seek the origin of the classificatory function in society On the basis of an intensive examination of forms and principles of symbolic classification reported from the Australian aborigines the Zu i and traditional China they try to establish a formal correspondence between social and symbolic classification From this they argue that the mode of classification is determined by the form of society and that the notions of space time hierarchy number class and other such cognitive categories are products of society Dr Needham s introduction assesses the validity of Durkheim and Mauss s argument traces its continued influence in various disciplines and indicates its analytical value for future researches in social anthropology Confronting the Sacred: Durkheim vindicated through philosophical analysis, ethnography, archaeology, long-range linguistics, and comparative mythology Wim van Binsbergen, 2018-05-06 With *Elementary Forms of Religious Life* 1912 the sociologist Émile Durkheim formulated the most influential social science theory of religion to date Pivotal are the paired concepts sacred profane the notion of collective representations and the hypothesis that through such religious symbols society compels its members to venerate herself i e to submit to the social as an irreducible instance in its own right Having grappled with this Durkheimian inheritance for half a century the anthropologist of religion and intercultural philosopher Wim van Binsbergen in this book traces his own steps in confronting Durkheim s sacred through theoretical criticism through ethnographic application to popular Islam in the segmentary social organisation of the highlands of Northwestern Tunisia and by state of the art long range methods of linguistic and comparative mythological analysis Thus much to his surprise he demonstrates the continued validity of Durkheim s insights in religion Sociology and Philosophy Émile Durkheim, 1974 *Wrapping Culture* Joy Hendry, 1993 *Wrapping Culture* is concerned with problems of intercultural communication and the possibilities for misinterpretation of the familiar in an unfamiliar context Starting with an examination of gift wrapping Joy Hendry demonstrates how our expectations are often influenced by cultural factors which may blind us to an appreciation of underlying intent She then extends this approach to the study of polite language as the wrapping of thoughts and intentions garments as body wrappings constructions and gardens as wrapping of space and even to the ways in which people may be wrapped in seating arrangements or meetings and drinking customs may be constrained by temporal versions of wrapping Throughout the book Dr Hendry considers ways in which groups of people use such symbolic forms to impress and manipulate one another and points out a Western tendency to underestimate such non verbal communication or reject it as mere decoration The ideas she

presents should be valid in any intercultural encounter and demonstrate that Japanese culture so often thought of as a special case can supply a model through which we can formulate general theories about human behaviour **Debating**

Organization Robert Westwood, Stewart Clegg, 2009-02-04 This volume introduces readers to the central debates of organization studies through a series of point and counterpoint debates by major figures in the field Introduces readers to the central tensions and debates of organization studies Celebrates the productive heterogeneity of the field by placing competing perspectives side by side Includes contributions from major figures in the field Structured in an innovative point and counterpoint format **General Catalogue of Printed Books** British Museum. selling beer on street corners scientific institutes closed down amid rusting carcasses of industrial plants these images became common at the turn of the 21st century in many once modern civilized countries In quite a few of them long time neighbours came to kill each other apparently motivated by the newly discovered differences of religion language or origin Civil nationalism gave way to tribal ethnic and confessional conflict Rational arguments of geopolitical nature have been replaced by claims of self righteousness and moral superiority These snapshots are not random They are manifestations of a phenomenon called demodernization that can be observed from the banks of the Neva to the banks of the Euphrates from the deserts of Central Asia to the English countryside and all the way to the city of Detroit Demodernization is a growing trend today but it also has a history Seventeen scholars including historians philosophers sociologists and archaeologists offer their well substantiated views of demodernization The book is divided into three parts dedicated to conceptual debates as well as historical and contemporary cases It book provides a wealth of empirical materials and conceptual insights that provide a multi faceted approach to demodernization **National Union Catalog** , 1956 Includes entries for maps and atlases

Primitive Classification (Routledge Revivals) Émile Durkheim, Marcel Mauss, 2010-08-17 In this influential work first published in English in 1963 Durkheim and Mauss claim that the individual mind is capable of classification and they seek the origin of the classificatory function in society On the basis of an intensive examination of forms and principles of symbolic classification reported from the Australian aborigines the Zu i and traditional China they try to establish a formal correspondence between social and symbolic classification From this they argue that the mode of classification is determined by the form of society and that the notions of space time hierarchy number class and other such cognitive categories are

products of society Dr Needham's introduction assesses the validity of Durkheim and Mauss's argument traces its continued influence in various disciplines and indicates its analytical value for future researches in social anthropology

The Fluid Pantheon Bernard Faure, 2015-12-31 Written by one of the leading scholars of Japanese religion *The Fluid Pantheon* is the first installment of a multivolume project that promises to be a milestone in our understanding of the mythico-ritual system of esoteric Buddhism specifically the nature and roles of deities in the religious world of medieval Japan and beyond Bernard Faure introduces readers to medieval Japanese religiosity and shows the centrality of the gods in religious discourse and ritual in doing so he moves away from the usual textual historical and sociological approaches that constitute the method of current religious studies The approach considers the gods including buddhas and demons as meaningful and powerful interlocutors and not merely as cyphers for social groups or projections of the human mind Throughout he engages insights drawn from structuralism post structuralism and Actor network theory to retrieve the implicit pantheon as opposed to the explicit orthodox pantheon of esoteric Japanese Buddhism Mikkyō Through a number of case studies Faure describes and analyzes the impressive mythological and ritual efflorescence that marked the medieval period not only in the religious domain but also in the political artistic and literary spheres He displays vast knowledge of his subject and presents his research much of it in largely unstudied material with theoretical sophistication His arguments and analyses assume the centrality of the iconographic record and so he has brought together in this volume a rich and rare collection of more than 180 color and black and white images This emphasis on iconography and the ways in which it complements supplements or deconstructs textual orthodoxy is critical to a fuller comprehension of a set of medieval Japanese beliefs and practices It also offers a corrective to the traditional division of the field into religious studies which typically ignores the images and art history which oftentimes overlooks their ritual and religious meaning *The Fluid Pantheon* and its companion volumes should persuade readers that the gods constituted a central part of medieval Japanese religion and that the latter cannot be reduced to a simplistic confrontation parallelism or complementarity between some monolithic teachings known as Buddhism and Shinto Once these reductionist labels and categories are discarded a new and fascinating religious landscape begins to unfold
