Public Policy And Private Higher Education Studies In Higher Education Policy:

Private Higher Education and Public Policy in Africa Isaac Nnamdi Obasi, 2008 **A Global Perspective on Private Higher Education** Mahsood Shah, Chenicheri Sid Nair, 2016-03-21 A Global Perspective on Private Higher Education provides a timely review of the significant growth of private higher education in many parts of the world during the last decade. The book is concurrent with significant changes in the external operating environment of private higher education including government policy and its impact on the ongoing growth of the sector. The title brings together the trends relating to the growth and the decline of private higher education providers also including the key contributing factors of the changes from 17 countries. Provides a timely review of the significant growth of private higher education in many parts of the world during the last decade. Presents the significant changes in the external operating environment of private higher education. Brings together the trends relating to the growth and the decline of private higher education providers. *A World of Private Higher Education* Daniel C. Levy, 2024-05-13 A World of Private Higher Education is the definitive treatment of a sector accounting for a third of the world's 200 million higher education enrolment yet remaining largely unknown even to scholars of higher education and widely mischaracterized when it is considered by stakeholders or the general public. Beyond the eye popping numbers several inter related thematic findings regarding the Private and the Public underscore the subject matter's importance. First private public differences are significant it matters that so many students are in a sector that not long ago was only marginal in much of the world. Second private higher education PHE itself is increasingly diverse with significant and private private differences. Third the overlaying of the first two realities yields increasing diversity in private public higher education distinctions. Especially for its pioneering mapping of PHE globally regionally and nationally the book draws on the pioneering dataset of the pioneering scholarly program for research on PHE Program for Research on Private Higher Education. Unprecedented in geographical scope the dataset is unprecedented in longitudinal coverage too dating back to 2000. Empirical methods allow for extensive analysis and theoretical analysis draws on key private public concepts embedded in literatures on privatization nonprofit studies and policy models. For the major challenge of penetrating inside the increasingly diverse private sector of higher education Levy revises his heralded and widely employed PHE typology. Private Higher Education Alma Maldonado-Maldonado, Yingxia Cao, Hong Zhu, Daniel C. Levy, Philip G. Altbach, 2006-08-01 This research project has been supported by the Ford Foundation the Lynch School of Education at Boston College and the Program of Research on Private Higher Education at the University at Albany. Towards the Private Funding of Higher Education David Palfreyman, Ted Tapper, Scott Thomas, 2017-11-08 An almost universal driving force for contemporary change in universities is the shifting view of higher education as more of a private than a public good. Towards the Private Funding of Higher Education presents a contemporary global picture of this move towards the privatisation of higher education and examines how these shifts in ideology and funding priorities have significant policy

implications The resulting developments such as the imposition and escalation of student tuition fees and the emergence of online providers of higher education emerge out of a combination of economic political and ideological pressures further enhanced by technological changes By using multiple international and regional examples to analyse the various pressures for privatisation this book examines the different forms privatisation has taken whilst offering an analytical interpretation of why the privatisation drive emerged why it has been resisted in some instances and what forms it is likely to assume in the future Towards the Private Funding of Higher Education illustrates and challenges the emergence of a new relationship between the university government and society It is an essential read for higher education professors university managers and higher education policy makers across the world *Higher Education, Public Good and Markets* Jandhyala B. G. Tilak, 2017-10-16 This book critically examines some of the major trends in the development of higher education It demonstrates how in the context of liberalisation globalisation and marketisation the crisis in higher education has assumed different dimensions in all advanced and emerging societies The author shows how the state tends to slowly withdraw from the responsibility of higher education including in the arena of policy making or simply adopts a policy of laissez faire of non involvement which helps in the rapid unbridled growth of private sector in higher education The notion of higher education as a public good is under serious contestation in current times The book argues for the need to resurrect the compelling nature of higher education along with its several implications for public policy and planning while providing a broad portrayal of global developments comparative perspectives and key lessons The volume will be of interest to scholars and researchers of education political science public policy and administration governance development studies economics and those working in the higher education sectors think tanks policymakers as well as NGOs *Emerging Dynamics in the Provision of Private Higher Education in Africa* Wondwosen Tamrat, Damtew Teferra, 2024-05-29 This edited book examines the private higher education PHE sector in African countries Reports suggest that private institutions across the continent outnumber their public counterparts yet there has been little scholarly investigation into this emerging phenomenon The book therefore seeks to document map and analyse key trends and contemporary themes in the PHE sector as well as chart historical developments policy and regulatory frameworks As a whole it provides the reader with in depth knowledge rich perspectives and robust analyses from leading authorities in the field Contributions from all sub regions combine thematic issues with shaping discourse on the topic and the discussions are undertaken in the context of global perspectives The book will be of interest to academics researchers postgraduate students policy makers analysts and development partners interested in African higher education and PHE in particular **Higher Education: Handbook of Theory and Research** J.C. Smart, 2012-12-06 **Property Ownership and Private Higher Education in China** Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country's flourishing market economy and its wholesale

pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country s existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes
