Writing in InDesign David Bergsland, 2011-07-08 Get control of your book This book is for authors wanting to guide the editorial focus into realizing the vision of their book This is writing and book design as a creative experience where the writer is totally immersed in the book directing the content to communicate the conceptual basis of the book clearly with the readers Harness your writing skills to the most powerful page layout program on the planet in the context of on demand publishing where multiple formats print and ebook are at your fingertips Publish your book for free if necessary No matter what the control you need for good stewardship is built into the process of publishing and release to the general public Within a few days of completion you can have your book available on Amazon Barnes Noble the iBookstore NookBooks and Kindle You control the price You control the royalties It's your book As the result of an email conversation I had with a new friend who is working on her book it became obvious that what I am doing which is unique is working creatively within InDesign to produce completed books almost as a fine art exercise One of the wonderful things about the new publishing paradigm is the control we get as artists authors and designers over the entire package A modern book is released in multiple sizes versions and formats The content and design remain fluid as we shape the book while we learn and grow We can easily adjust content layout and presentation of our books after they are released in response to emails Facebook friends twitter posts and the whole host of contemporary social networking online One of the trials of the new paradigm is the incredible amount of knowledge and the various skills necessary to do all of this I have been uniquely positioned to take advantage of the new workflow I began as a fine artist in the 1960s and early 1970s I learned typesetting and graphic design at the hands of a masterful art director in the late 1970s

I spent a decade as an art director myself in the largest commercial printer in Albuquerque I began teaching these materials in 1991 Within a couple of years a large traditional publisher was asking me to convert my handouts to a book on the new digital printing I used that opportunity to develop the first all digital printing and design curriculum in the country as far as I can tell I wrote a book a year for them on typography FreeHand Illustrator Photoshop and finally InDesign Publishing with InDesign was one of the first books on the new software that would eventually take over the industry While all of this was going on in 1996 I took all my coursework online I became involved intensively with the distance learning initiative at my community college I continued to write new instructional materials I was supplying them to my students off the class Website as downloadable PDFs Then I found Lulu With Lulu then CreateSpace then Scribd then Zazzle then Kindle and then ePUBs my world changed Writing books became a real joy to me as InDesign kept getting better and better More and more I was doing everything in InDesign except the photos
