Apache Heritage Richard J. Perry, 2014-04-21 A reconstruction of Apachean history and culture that sheds much light on the origins, dispersions and relationships of Apache groups. Mention Apaches and many Anglo Americans picture the marauding savages of western movies or impoverished reservations beset by a host of social problems. But like most stereotypes, these images distort the complex history and rich cultural heritage of the Apachean peoples who include the Navajo as well as the Western Chiricahua, Mescalero, Jicarilla, Lipan and Kiowa Apaches. In this pioneering study, Richard Perry synthesizes the findings of anthropology, ethnology, linguistics, archaeology and ethnohistory to reconstruct the Apachean past and offer a fuller understanding of the forces that have shaped modern Apache culture. While scholars generally agree that the Apacheans are part of a larger group of Athapaskan speaking peoples who originated in the western Subarctic, there are few archaeological remains to prove when, where and why those northern cold dwellers migrated to the hot deserts of the American Southwest. Using an innovative method of ethnographic reconstruction, however, Perry hypothesizes that these nomadic hunters were highly adaptable and used to exploiting the resources of a wide range of mountainous habitats. When changes in their surroundings forced the ancient Apacheans to expand their food quest, it was natural for them to migrate down the mountain corridor formed by the Rocky Mountain chain. Perry is the first researcher to attempt such an extensive reconstruction, and his study is the first to deal with the full range of Athapaskan speaking peoples. His method will be instructive to students of other cultures who face a similar lack of historical and archaeological data.
