Puerto Rican Syndrome:

The Puerto Rican Syndrome Patricia Gherovici, 2010-05-04 Winner of the Gradiva Award in Historical Cultural and Literary Analysis and The 2004 Boyer Prize for Contributions to Psychoanalytic Anthropology During the 1950 s US Army medical officers noted a new and puzzling syndrome that contemporary psychiatry could neither explain nor cure These doctors reported that Puerto Rican soldiers under stress behaved in a very peculiar and dramatic manner exhibiting a theatrical form of pseudo epilepsy Startled physicians observed frightened and disoriented patients foaming at the mouth screaming biting kicking shaking in seizures and fainting The phenomenon seemed to correspond to a serious neurological disease yet as with some forms of hysteria physical examination failed to identify any sign of an organic origin This unusual set of symptoms entered into medical records as a group of striking psychopathological reaction patterns precipitated by minor stress and was designated Puerto Rican Syndrome In this lucid and sophisticated new work Patricia Gherovici thoroughly examines the so called Puerto Rican Syndrome in the contemporary world its social and cultural implications for the growing Hispanic population in the US and therefore for the US as a whole As a mental illness that is allegedly uniquely Puerto Rican this syndrome links nationality and culture to a psychiatric disease whose reappearance recalls the spectacular hysteria that led to the discovery of the unconscious and the birth of psychoanalysis Gherovici beautifully and systematically uses the combined insights of Freud and Lacan to examine the current state of psychoanalysis and the Hispanic community in America Blending these insights with history current events and her own case material Gherovici provides a startling fresh look at Puerto Rican Syndrome as social and cultural phenomenon She sheds new light on the future of American society and argues that psychoanalysis is not only possible but much needed in the ghetto

Methodological Considerations

Underlying the Definition of the Puerto Rican Syndrome David D. Hernández, Pedro A. Vales, 1973 *The Cry of the Senses* Ren Ellis Neyra, 2020-10-26 In *The Cry of the Senses* Ren Ellis Neyra examines the imaginative possibility for sound and poetics to foster new modes of sensorial solidarity in the Caribbean Americas Weaving together the black radical tradition with Caribbean and Latinx performance cinema music and literature Ellis Neyra highlights the ways Latinx and Caribbean sonic practices challenge antiblack colonial post Enlightenment and humanist epistemologies They locate and address the sonic in its myriad manifestations across genres and forms in a legal trial and in the art and writing of Xandra Ibarra the Fania All Stars Beatriz Santiago Muñoz and Eduardo Corral while demonstrating how it operates as a raucous form of diasporic dissent and connectivity Throughout Ellis Neyra emphasizes Caribbean and Latinx sensorial practices while attuning readers to the many forms of blackness and queerness Tracking the sonic through their method of multisensorial poetic listening Ellis Neyra shows how attending to the senses can inspire alternate ethical ways of collective listening and being

Hispanic Mental Health Research Frank Cota-Robles Newton, Esteban L. Olmedo, Amado M. Padilla, 1982-01-01 *Perspectives in Cross-cultural Psychiatry* Anna M. Georgiopoulos, Jerrold F. Rosenbaum, 2005 This

volume presents cutting edge work in cross cultural psychiatry by an international group of clinicians researchers and leaders in mental health policy The book grew out of a recent lecture series at the Massachusetts General Hospital and features contributions from diverse fields including psychiatry psychology anthropology social work social medicine and public policy The first section highlights the implications of biological and cultural diversity for psychiatric diagnosis and treatment Subsequent sections focus on psychotherapy in cross cultural contexts and international mental health policy Chapters examine a variety of patient populations including Asian African and Hispanic Americans and populations in Europe and developing countries **Psychoanalysis in the Barrios** Patricia Gherovici, Christopher Christian, 2018-12-11

Psychoanalysis in the Barrios Race Class and the Unconscious demonstrates that psychoanalytic principles can be applied successfully in disenfranchised Latino populations refuting the misguided idea that psychoanalysis is an expensive luxury only for the wealthy As opposed to most Latin American countries where psychoanalysis is seen as a practice tied to the promotion of social justice in the United States psychoanalysis has been viewed as reserved for the well to do assuming that poor people lack the sophistication that psychoanalysis requires thus heeding invisible but no less rigid class boundaries Challenging such discrimination the authors testify to the efficacy of psychoanalysis in the barrios upending the unfounded widespread belief that poor people are so consumed with the pressures of everyday survival that they only benefit from symptom focused interventions Sharing vivid vignettes of psychoanalytic treatments this collection sheds light on the psychological complexities of life in the barrio that is often marked by poverty migration marginalization and barriers of language class and race This interdisciplinary collection features essays by distinguished international scholars and clinicians It represents a unique crossover that will appeal to readers in clinical practice social work counselling anthropology psychology cultural and Latino studies queer studies urban studies and sociology **Meaningless Suffering** David Goodman, M. Mookie C. Manalili, 2024-03-25 Does suffering have meaning The leading scholars and practitioners in Meaningless Suffering engage with this haunting human question through the lenses of psychoanalytic phenomenological and ethical discourse all the while holding contemporary social concerns in full view The authors seek to find ways of speaking about the lived realities and historical moments that make up our social narratives from the murder of George Floyd to the bird watching incident in Central Park in order to render visible the entangled forms of the effects of embodiment ideology race social practice and intersectionality Meaningless Suffering is bookended by powerful pieces by Mari Ruti and Homi K Bhabha and in the intervening chapters the reader traverses the ideas of Augustine Judith Butler Fanon Foucault Freud Gendlin Heidegger Lacan Levinas and Wittgenstein to pass through the realms of classical thought affect theory phenomenology linguistic studies relational psychoanalysis somatic studies intersubjectivity theory gender studies critical theory and philosophical hermeneutics This book is essential reading for postgraduate students scholars and practitioners working at the intersection of psychoanalysis race politics and culture as well as students of cultural studies the

The Puerto Rico Journal of Public Health and Tropical Medicine , 1928 **Gender, Culture, and Ethnicity** Letitia Anne Peplau, 1999 Comprises 25 essays which explore the joint effects of gender culture and ethnicity in people s lives Discusses ways in which the lives of men and women differ from one culture to another and examines issues of race and class stereotypes and roles Covers a range of cultural and ethnic populations and addresses issues affecting both women and men Includes papers on gender and health on a kibbutz in Israel feminist therapy among Puerto Rican women rarity of intergroup violence in a community in Papua New Guinea and the compatibility of hunting and mothering in the Philippines **Women and Migration** Jacqueline Knörr, Barbara Meier, 2000 All contributions to this book to this volume describe women as social actors within specific migration processes and point out women s creativity in shaping migrant settings This perspective counter balances common descriptions of women as more or less invisible and dependent of male migration At the same time the anthropological approach ensures the careful consideration and analysis of the culturally specific contexts within which the different processes of migration are taking place Regional and cultural diversity of the data presented renders possible intercultural comparison of the investigated phenomena **The American Journal of Psychiatry** , 1999-04 *Z. Angl. Am* , 1999 *Latino Mental Health* Amado M. Padilla, Paul Aranda, 1974 Using DSM-IV Anthony L. Labruzzo, Jose M. Mendez-Villarrubia, 1997-06 In Using DSM IV Dr Anthony LaBruzza and Jose Mendez Villarrubia offer the needed supplement to DSM IV Their book a veritable road map for DSM IV explains the technical language and hierarchical classifications of DSM IV while it demonstrates how the system can be adapted to a clinical approach In cogent prose replete with examples the authors show how to use DSM IV to arrive at accurate diagnoses that include rather than forsake dynamic conceptualizations of clients psychological functioning The authors review each DSM IV diagnostic category helping the reader to see what clients with a specific pathology look like what is actually needed to qualify for the disorder and what similar disorders to rule out Because theirs is a fundamentally humane and clinical approach to mental illness LaBruzza and Mendez Villarrubia suggest that any interview even a mental status exam should be a helpful experience for the client They show how to embed a diagnostic interview in an ongoing clinical process and thus relate to and understand each client as

unique even while finding the right diagnostic category for him or her This attunement to individuals also enables LaBruzza and Mendez Villarrubia to consider issues of cultural diversity Both authors have extensive experience working with Hispanic populations and have included an in depth chapter on assessing Hispanic clients In this new era of managed health care the demand for uniform accurate diagnoses has never been higher Facility with the DSM IV system is imperative But so too is a thoughtful understanding of clients Using DSM IV is the one resource that can help clinicians combine descriptive and dynamic orientations to clients to produce a truly comprehensive diagnosis As an explanatory and inclusive manual of DSM IV this is the essential book *Psychological Interventions and Research with Latino Populations* Jorge G. García, María Cecilia Zea, 1997 Describes concepts of Latino psychology interventions and research with Latino groups living in the USA This text incorporates a wide range of psychological interventions which address current challenges in the mental health health psychology and rehabilitation psychology of Latinos **Hispanic Journal of Behavioral Sciences** ,1999
