Pulltrouser Swamp Ancient Maya Habitat Agriculture Settlement In Northern Belize:

Pulltrouser Swamp B. L. Turner, Peter D. Harrison, 1983-11-01 Among Mesoamericanists the agricultural basis of the ancient Maya civilization of the Yucatan Peninsula has been an important topic of research and controversy Interest in the agricultural system of the Maya greatly increased as new discoveries showed that the lowland Maya were not limited to slash and burn technology as had been previously believed but used a variety of more sophisticated agricultural techniques and practices including terracing raised fields and perhaps irrigation Because of the nature of the data and because this form of agricultural technology had been key to explanations of state formation elsewhere in Mesoamerica raised field agriculture became a particular focus of investigation Pulltrouser Swamp conclusively demonstrates the existence of hydraulic raised field agriculture in the Maya lowlands between 150 B C and A D 850 It presents the findings of the University of Oklahoma s Pulltrouser Swamp Project an NSF supported interdisciplinary study that combined the talents of archaeologists anthropologists geographers paleobotanists biologists and zoologists to investigate the remains of the Maya agricultural system in the swampy region of northern Belize By examining soils fossil pollen and other plant remains gastropods relic settlements ceramics lithics and other important evidence the Pulltrouser Swamp team has clearly demonstrated that the features under investigation are relics of Maya made raised and channelized fields and associated canals Other data suggest the nature of the swamps in which the fields were constructed the tools used for construction and cultivation the possible crops cultivated and at least one type of settlement near the fields with its chronology This verification of raised fields provides dramatic evidence of a large and probably organized workforce engaged in sophisticated and complex agricultural technology As record of this evidence Pulltrouser Swamp is a work of seminal importance for all students and scholars of New World prehistory PULLTROUSER SWAMP. B. L. Turner, 1983 ANCIENT MAYA HABITAT AGRICULTURE AND SETTLEMENT IN NORTHERN BELIZE **Ancient Maya Cities of the Eastern Lowlands** Brett A. Houk, 2016-10-05 Brings together for the first time all the major sites of this part of the Maya world and helps us understand how the ancient Maya planned and built their beautiful cities It will become both a handbook and a source of ideas for other archaeologists for years to come George J Bey III coeditor of Pottery Economics in Mesoamerica Skillfully integrates the social histories of urban development Vernon L Scarborough author of The Flow of Power Ancient Water Systems and Landscapes Any scholar interested in urban planning and the built environment will find this book engaging and useful Lisa J Lucero author of Water and Ritual For more than a century researchers have studied Maya ruins and sites like Tikal Palenque Cop n and Chich n Itz have shaped our understanding of the Maya Yet cities of the eastern lowlands of Belize an area that was home to a rich urban tradition that persisted and evolved for almost 2 000 years are treated as peripheral to these great Classic period sites The hot and humid climate and dense forests are inhospitable and make preservation of the ruins difficult but this oft ignored area reveals much about Maya urbanism and culture Using data collected from different sites throughout the lowlands

including the Vaca Plateau and the Belize River Valley Brett Houk presents the first synthesis of these unique ruins and discusses methods for mapping and excavating them Considering the sites through the analytical lenses of the built environment and ancient urban planning Houk vividly reconstructs their political history considers how they fit into the larger political landscape of the Classic Maya and examines what they tell us about Maya city building *Ancient Maya* Arthur Demarest,2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression
