

## Chapter 36 Patients with Special Challenges

### Introduction

Some examples of patients with special challenges include:

- Children who were born prematurely and who have associated respiratory problems
- Infants or small children with congenital heart disease
- Patients with neurologic disease
- Patients with congenital or acquired diseases resulting in altered body function that requires medical assistance for breathing, urination, eating, or bowel function
- Patients with sensory deficits such as hearing or visual impairments
- Geriatric patients with chronic diseases requiring visitation from a home health care service

### Intellectual Disability

**Developmental disability:** insufficient development of the brain, resulting in some level of dysfunction or impairment

An intellectual disability may be caused by genetic factors, congenital infections, complications at birth, malnutrition, or environmental factors.

**Autism spectrum disorder (ASD):** a general term used to describe a group of complex disorders of brain development that vary greatly in signs and symptoms

- **Autism:** a pervasive developmental disorder characterized by impairment of social interaction

**Down syndrome:** characterized by a genetic chromosomal defect resulting in mild to severe intellectual impairment

- The normal human somatic cell contains 23 pairs of chromosomes. In most cases, down syndrome (trisomy 21) occurs when the two 21<sup>st</sup> chromosomes fail to separate, so that the ovum or sperm contains 24 chromosomes.

### Brain Injury

Take the time to talk with the patient and family to understand what is normal for the patient. Talk in a calm, soothing tone, and watch the patient closely for signs of anxiety or aggression.

### Sensory Disabilities

Always talk and walk a visually impaired patient through the steps of what is going to happen.

The two most common forms of hearing loss are sensorineural deafness and conductive hearing loss.

- **Sensorineural deafness:** a permanent lack of hearing caused by a lesion or damage of the inner ear
