Interpreting Historical Keyboard Music Andrew Woolley, John Kitchen, 2016-05-23 Research in the field of keyboard studies especially when intimately connected with issues of performance is often concerned with the immediate working environments and practices of musicians of the past An important pedagogical tool the keyboard has served as the workbench of countless musicians over the centuries In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges In recent decades interest has turned towards a contextualized understanding of creative processes in music and keyboard studies appears well placed to contribute to the exploration of this wider concern The nineteen essays collected here encompass the range of research in the field bringing together contributions from performers organologists and music historians Questions relevant to issues of creative practice in various historical contexts and of interpretative issues faced today form a guiding thread Its scope is wide ranging with contributions covering the mid sixteenth to early twentieth century It is also inclusive encompassing the diverse range of approaches to the field of contemporary keyboard studies Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period

The Ashgate Research Companion to Henry Purcell Rebecca Herissone, 2016-04-01 The Ashgate Research Companion to Henry Purcell provides a comprehensive and authoritative review of current research into Purcell and the environment of Restoration music with contributions from leading experts in the field Seen from the perspective of modern interdisciplinary approaches to scholarship the companion allows the reader to develop a rounded view of the environment in which Purcell lived the people with whom he worked the social conditions that influenced his activities and the ways in which the modern perception of him has been affected by reception of his music after his death In this sense the contributions do not privilege the individual over the environment rather they use the modern reader s familiarity with Purcell s music as a gateway into the broader

Interpreting Historical Keyboard Music Dr Andrew Woolley, Dr John Kitchen, 2013-12-28 Research in the field of keyboard studies especially when intimately connected with issues of performance is often concerned with the immediate working environments and practices of musicians of the past An important pedagogical tool the keyboard has served as the workbench of countless musicians over the centuries In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges In recent decades interest has turned towards a contextualized understanding of creative processes in music and keyboard studies appears well placed to contribute to the exploration of this wider concern The nineteen essays collected here encompass the range of research in the field bringing together contributions from performers organologists and music historians Questions relevant to issues of creative practice in various historical contexts and of interpretative issues faced today form a guiding thread Its scope is wide ranging with contributions covering the mid sixteenth to early twentieth century It is also inclusive encompassing the diverse range of approaches to the field of contemporary keyboard studies Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period

Musical Creativity in Restoration England Rebecca Herissone, 2013-10-10 Musical Creativity in Restoration England is the first comprehensive investigation of approaches to creating music in late seventeenth century England Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition such as concepts of originality inspiration and genius were not yet fully developed In adopting a new methodology that takes into account the historical contexts in which sources were produced Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation performance improvisation and musical memory She uncovers a creative culture that was predominantly communal and reveals several distinct approaches to composition determined not by individuals but by the practical function of the music Herissone's new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation
