Structuring Notation John Spriggs,2012-01-05 Goal Structuring Notation GSN is becoming increasingly popular practitioners use it in the railway air traffic management and nuclear industries amongst others Originally developed to present safety assurance arguments GSN need not be restricted to safety assurances only in principle you can use it to present and test any argument Anyone wishing to support or refute a claim can use GSN Written by an experienced practitioner The Goal Structuring Notation is both for those who wish to prepare and present compelling arguments using the notation and for those who wish to review such arguments critically and effectively To emphasise the versatility of this approach The Goal Structuring Notation presents examples and questions based on diverse subject areas including Business Management Drama Engineering Politics and Astrobiology Simple examples introduce each symbol of the notation before introducing more complex structures which illustrate how the symbols work together in practical scenarios To aid learning questions and problems augment the text so that the reader may reflect upon and try out the new concepts and principles presented As a comprehensive instruction in the basics of GSN and its application The Goal Structuring Notation also serves as a reference or manual for the practitioner to dip into as problems are encountered or as a key resource for engineers working in those industries which require a clear description of the notation covering the initial principles and showing why each piece of the notation is necessary Originally developed to present safety assurance arguments GSN need not be so restricted GSN The Goal Structuring Notation presents examples from diverse subject areas including business management drama engineering politics and astrobiology
