Taking the Fight to the Enemy Adam L. Fuller, 2012-01-01 Neoconservatism is more of a disposition than a single political theory but it is an attitude that has had a profound impact on the broader conservative effort in the United States since the Fifties It is a unique blend of skepticism and fortitude about a host of wide ranging issues spanning culture economics and national defense This book looks at six neoconservative intellectuals Irving Kristol Gertrude Himmelfarb Norman Podhoretz Midge Decter Daniel Bell and Nathan Glazer and the intellectual influences on their thinking about the defects of communism fascism progressivism the dominant American culture and even capitalism itself This book looks at the gestation of political criticism within the pages of the neoconservatives own writings as well as the books they read and the thinkers they either learned from or came to fear The book looks at the ways in which the neoconservatives adapted Lenin s formula for success to conservative efforts in the United States arguing that neoconservatism is an anti ideology ideology in that it considers a New Class of professional ideologically motivated reformers to be the greatest problem facing the United States because of their increased efforts to technocratize ordinary life their moral relativism their efforts to usurp human nature and supplant it with their own utopian visions their anti Americanism and their unwillingness to face imminent dangers threatening the American way of life The book argues that the neoconservative political strategy is to take the fight to the enemy

Paradoxes of Power David Skidmore, 2015-12-03 This book provides a lively and readable introduction to current debates over U S power and purpose in world affairs The end of the Cold War launched a new era in U S foreign policy The United States entered a period of unprecedented global power but one also characterized by new conflicts challenges and controversies The terrorist attacks of 9 11 and the subsequent U S military operations in Afghanistan and Iraq cast a spotlight on continuing debates over how the United States should best use its considerable international power to secure safety for Americans and stability in the world These debates involve two crucial questions Should U S foreign policy focus on securing vital interests that are narrowly defined or should the United States seek to spread U S institutions and values to other societies Should the United States exercise maximum independence in the exercise of U S power abroad or work principally through multilateral institutions This book brings together many different voices to answer these questions and to add to our understanding of the issues Contributors include Andrew J Bacevich Max Boot Stephen G Brooks Ralph G Carter Robert F Ellsworth Niall Ferguson Francis Fukuyama Philip H Gordon Christopher Hitchens James F

Kolb, 2008-02-05 From the author of *Overworld* *America at Night* reads like a thriller but is the kind of story about which fiction writers can only dream The New York Times When the Department of Homeland Security suspects that two former CIA operatives are at the center of plot involving money laundering and the funding of Al Qaeda and when their supposedly comprehensive database turns up little to no information on either man it takes former covert operative Larry Kolb to crack the case and foil the plan But when Kolb begins to connect the dots he realizes something even more sinister is afoot and that he is on to the biggest possible con with the highest political stakes Kolb shows us how one well informed individual did what all of our security agencies could not trail two brilliant covert political operatives through a labyrinth of disguised identities and dark crimes to expose corruption at the highest levels

**Arguably** Christopher Hitchens, 2011-09-01 All first rate criticism first defines what we are confronting the late great jazz critic Whitney Balliett once wrote By that measure the essays of Christopher Hitchens are in the first tier For nearly four decades Hitchens has been telling us in pitch perfect prose what we confront when we grapple with first principles the principles of reason and tolerance and skepticism that define and inform the foundations of our civilization principles that to endure must be defended anew by every generation A short list of the greatest living conversationalists in English said The Economist would probably have to include Christopher Hitchens Sir Patrick Leigh Fermor and Sir Tom Stoppard Great brilliance fantastic powers of recall and quick wit are clearly valuable in sustaining conversation at these cosmic levels Charm may be helpful too Hitchens who staunchly declines all offers of knighthood hereby invites you to take a seat at a democratic conversation to be engaged and to be reasoned with His knowledge is formidable an encyclopedic treasure and yet one has the feeling reading him of hearing a person thinking out loud following the inexorable logic of his thought wherever it might lead unafraid to expose fraudulence denounce injustice and excoriate hypocrisy Legions of readers admirers and detractors alike have learned to read Hitchens with something approaching awe at his felicity of language the oxygen in every sentence the enviable wit and his readiness even eagerness to fight a foe or mount the ramparts Here he

supplies fresh perceptions of such figures as varied as Charles Dickens Karl Marx Rebecca West George Orwell J G Ballard and Philip Larkin are matched in brilliance by his pungent discussions and intrepid observations gathered from a lifetime of traveling and reporting from such destinations as Iran China and Pakistan Hitchens's directness elegance lightly carried erudition critical and psychological insight humor and sympathy applied as they are here to a dazzling variety of subjects all set a standard for the essayist that has rarely been matched in our time What emerges from this indispensable volume is an intellectual self portrait of a writer with an exemplary steadiness of purpose and a love affair with the delights and seductions of the English language a man anchored in a profound and humane vision of the human longing for reason and justice

**God Is Not Great** Christopher Hitchens,2008-11-19 Christopher Hitchens described in the London Observer as one of the most prolific as well as brilliant journalists of our time takes on his biggest subject yet the increasingly dangerous role of religion in the world In the tradition of Bertrand Russell s Why I Am Not a Christian and Sam Harris s bestseller The End Of Faith Christopher Hitchens makes the ultimate case against religion With a close and erudite reading of the major religious texts he documents the ways in which religion is a man made wish a cause of dangerous sexual repression and a distortion of our origins in the cosmos With eloquent clarity Hitchens frames the argument for a more secular life based on science and reason in which hell is replaced by the Hubble Telescope s awesome view of the universe and Moses and the burning bush give way to the beauty and symmetry of the double helix

[Groundwork for the Practice of the Good Life](#) Omedi Ochieng,2016-10-14 What makes for good societies and good lives in a global world In this landmark work of political and ethical philosophy Omedi Ochieng offers a radical reassessment of a millennia old question He does so by offering a stringent critique of both North Atlantic and African philosophical traditions which he argues unfold visions of the good life that are characterized by idealism moralism and parochialism But rather than simply opposing these flawed visions of the good life with his own set of alternative prescriptions Ochieng argues that it is critically important to step back and understand the stakes of the question Those stakes he suggests are to be found only through a social ontology a comprehensive and in depth account of the political economic and cultural structures that mark the boundaries and limits of life in the twenty first century It is only in light of this social ontology that Ochieng then proffers an alternative normative account of the good society and the good life which he spells out as emergent from ecological embeddedness social entanglement embodied encounter and aesthetic engenderment At once sweeping and rigorous incisive and subtle original and revisionary this book does more than just appeal to intellectuals and scholars across the humanities and social sciences rather it opens up the academic disciplines to a whole new landscape of exploration into the biggest and most pressing questions animating the human experience

**The Cambridge Companion to George Orwell** John Rodden,2007-06-21 Publisher description **Religion and Knowledge** Elisabeth Arweck,2016-04-15 Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth

How can competing claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge
