Longrun Economic Growth:

Physioeconomics Philip M. Parker, 2000 He presents evidence that long run growth can be attributed to variances in hypothalamic activity BOOK JACKET Understanding Long-Run Economic Growth Dora L. Costa, Naomi R. Lamoreaux, 2011-10 The conditions for sustainable growth and development are among the most debated topics in economics and the consensus is that institutions matter greatly in explaining why some economies are more successful than others over time This book explores the relationship between economic conditions growth and inequality **Long-Run Economic Growth** Steven Durlauf, John F. Helliwell, Baldev Raj, 2012-12-06 One of the most enduring questions in economics involves how a nation could accelerate the pace of its economic development One of the most enduring answers to this question is to promote exports either because doing so directly influences development via encouraging production of goods for export or because export promotion permits accumulation of foreign exchange which permits importation of high quality goods and services which can in turn be used to expand the nation's production possibilities In either case growth is said to be export led the latter case is the so called two gap hypothesis McKinnon 1964 Findlay 1973 The early work on export led growth consisted of static cross country comparisons Michaely 1977 Balassa 1978 Tyler 1981 Kormendi and Meguire 1985 These studies generally concluded that there is strong evidence in favour of export led growth because export growth and income growth are highly correlated However Kravis pointed out in 1970 that the question is an essentially dynamic one as he put it are exports the handmaiden or the engine of growth To make this determination one needs to look at time series to see whether or not exports are driving income This approach has been taken in a number of papers Jung and Marshall 1985 Chow 1987 Serletis 1992 Kunst and Marin 1989 Marin 1992 Afxentiou and Serletis 1991 designed to assess whether or not individual countries exhibit statistically significant evidence of export led growth using Granger causality tests
