Looking Good And Doing Good Corporate Philanthropy And Corporate Power By Himmelstein:

Looking Good and Doing Good Jerome L. Himmelstein, 1997-05-22 Political controversy is a lens through which the author examines corporate philanthropy. He explains why corporate philanthropy has become politicized, how corporations respond to controversy about their donations, and what the conflicts tell us about corporate philanthropy and corporate politics. Himmelstein argues that corporate giving sometimes becomes politicized because it is inherently a complex social and political act. Drawing on in-depth interviews with managers at fifty-five of the largest corporate giving programs in the U.S., Himmelstein shows that corporate giving often finds itself as one manager put it, locked in a struggle between looking good and doing good. The Politics of Partnerships Maria May Seitanidi, 2010-03-22 In the late 1990s, the idea of cross-sector collaborations was relatively new in Europe. The term partnership was employed primarily to refer to partnerships between government and businesses, usually termed PPP (Public-Private Partnerships). On the other hand, strategic alliances was the term employed for business-to-business partnerships. Until then, sponsorship was the most practised associational form between nonprofit organisations (NPOs) and businesses (BUSs), which was included within the broad area of corporate community involvement. The relations between NPOs and BUSs witnessed a gradual intensification over the last 200 years. Gray 1989, Young 1999, Austin 2000, Googins and Rochlin 2000, resulting in increased interactions within both the philanthropic and transnational types of relationships. Seitanidi and Ryan 2007. However, the more recent gradual prominence of the concept of corporate social responsibility (CSR) within all sectors of society elicited an intensification of the debate with regard to the responsibilities of each sector in addressing environmental and social issues. In effect, CSR contributed to the increase of the interactions across the sectors and propelled NPO-BUS Partnerships, a type of social partnership, as a key mechanism for corporations to delve into a process of engaging with NPOs in order to improve their business practices by contributing their resources to address social issues. Heap 1998, Mohiddin 1998, Fowler 2000, Googins and Rochlin 2000, Mancuso Brehm 2001, Drew 2003, Hemphill and Vonortas 2003.

Regulating Multinationals in Developing Countries Edwin Mujih, 2016-04-08 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries with a particular focus on extractive industries The author highlights the need to establish an international legally binding framework to ensure that multinationals operate in a socially responsible manner to protect local communities and the environment Edwin Mujih's analysis reveals that the existing mechanisms for controlling the behaviour of huge multinational entities are of normative force only that these are particularly inadequate and that the notion of corporate social responsibility is only meaningful where behaviour can be legally regulated *Regulating Multinationals in Developing Countries* features a study of the Chad and Cameroon Oil and pipeline project which highlights the problems arising in countries that have neither the capacity nor the will to effectively regulate those operating within their borders The author has evaluated compliance by the parties with their social and environmental obligations He has found that despite controversy surrounding inadequate regulation of this project in its incipient stages the system that was put in place following huge opposition from the affected communities and from NGOs is worthy of attention and could stand as a model for similar projects elsewhere This first title in Gower's Corporate Social Responsibility Series to approach CSR from a legal perspective provides insight not just into the complexity surrounding efforts to regulate multinationals operating in countries with weak regulatory regimes but also into the fundamental nature of multinational corporations and the debate about different notions of CSR itself *Making the Nonprofit Sector in the United States* David C. Megarhetorics of Global Development Rebecca Dingo, J. Blake Scott, 2012-01-29 After World War II an unprecedented age of global development began The formation of the World Bank and the International Monetary Fund allowed war torn and poverty stricken nations to become willing debtors in their desire to entice Western investment and trade New capital it was foretold would pave the way to political and economic stability and the benefits would trickle down to even the poorest citizens The hyperbole of this neocolonialism however has left many of these countries with nothing but compounded debt

and unfulfilled promises The Megarhetorics of Global Development examines rhetorical strategies used by multinational corporations NGOs governments banks and others to further their own economic political or technological agendas These wide ranging case studies employ rhetorical theory globalization scholarship and analysis of cultural and historical dynamics to offer in depth critiques of development practices and their material effects By deconstructing megarhetorics at both the local and global level and following their paths of mobilization and diffusion the concepts of progress and growth can be reevaluated with the end goal of encouraging self sustaining and ethical outcomes *CIVICUS Global Survey of the State of Civil Society* Volkhart Heinrich, Lorenzo Fioramonti, CIVICUS (Association), 2007 The second volume of the CIVICUS Global Survey of the State of Civil Society offers a wide ranging analysis of key issues facing civil society worldwide with contributions from prominent researchers and civil society practitioners Comprising 24 chapters the book draws on the information collected by the CIVICUS Civil Society Index project in more than 45 countries to explore issues such as civil society's accountability its relations to the state and corporate sector and its role in governance and development It also includes regional overviews of the state of civil society in different continents By bringing together a diversity of perspectives and themes this book offers one of the most comprehensive and engaging analyses of civil society worldwide Other Contributors Helmut Anheier Stefanie Bailer Monica Blagescu Thilo Bodenstern David Bonbright L David Brown Jerzy Celichowski Julius Court Wolfgang Dörner Alan Fowler Marc M Howard Mohini Kak Mahi Khallaf Natalia Kyrtytopoulou Petr Kopecky Barry Knight Carmen Malena Jacob Mati Cas Mudde Kumi Naidoo Paul Opoku Mensah Aruna Rao Laurie Regelbrugge Janine Schall Emden Andres Serbin Catherine Shea Carla Suarez Rajesh Tandon zlem T r and Jan van Deth

Taming the Octopus Kyle Edward Williams, 2024-02-20 The untold story of how efforts to hold big business accountable changed American capitalism Recent controversies around environmental social and governance ESG investing and woke capital evoke an old idea the Progressive Era vision of a socially responsible corporation By midcentury the notion that big business should benefit society was a consensus view But as Kyle Edward Williams s brilliant history *Taming the Octopus* shows the tools forged by New Deal liberals to hold business leaders accountable such as the Securities and Exchange Commission narrowly focused on the financial interests of shareholders This inadvertently laid the groundwork for a set of fringe views to become dominant that market forces should rule every facet of society Along the way American capitalism itself was reshaped stripping businesses to their profit making core In this vivid and surprising history we meet activists investors executives and workers who fought over a simple question Is the role of the corporation to deliver profits to shareholders or something more On one side were business statesmen who believed corporate largess could solve social problems On the other were libertarian intellectuals such as Milton Friedman and his oft forgotten contemporary Henry Manne whose theories justified the ruthless tactics of a growing class of corporate raiders But Williams reveals that before the activist investor emerged as a capitalist archetype Civil Rights groups used a similar playbook for different ends buying shares to change a company from within As a rising tide of activists pushed corporations to account for societal harms from napalm to environmental pollution to inequitable hiring a new idea emerged that managers could maximize value for society while still turning a maximal profit This elusive ideal stakeholder capitalism still dominates our headlines today Williams s necessary history equips us to reconsider democracy s tangled relationship with capitalism

The Role of Public Policy in K-12 Science Education George E. DeBoer, 2011-01-01 The goal of this volume of *Research in Science Education* is to examine the relationship between science education policy and practice and the special role that science education researchers play in influencing policy It has been suggested that the science education research community is isolated from the political process pays little attention to policy matters and has little influence on policy But to influence policy it is important to understand how policy is made and how it is implemented This volume sheds light on the intersection between policy and practice through both theoretical discussions and practical examples This book was written primarily about science education policy development in the context of the highly decentralized educational system of the United States But because policy development is fundamentally a social activity involving knowledge values and personal and community interests there are similarities in how education policy gets enacted and implemented around the world This volume is meant to be useful to science education researchers and to practitioners such as teachers and administrators because it provides information about which aspects of the science education enterprise are affected by state local and national policies It also provides helpful information for researchers and practitioners who

wonder how they might influence policy In particular it points out how the values of people who are affected by policy initiatives are critical to the implementation of those policies Occupation: Organizer Clément Petitjean, 2023-04-18 A trenchant history of community organizing and a must read for the next generation of organizers seeking to learn from the successes failures and contradictions of the past The community organizing tradition is long overdue for reexamination In Occupation Organizer scholar and activist Clément Petitjean traces that history from its roots in the Progressive movement to its expansion and diverging paths during the social movements of the 1960s and 70s when Saul Alinsky became the most popular professional radical in the US while groups like Student Nonviolent Coordinating Committee Students for a Democratic Society and the Black Panthers recast organizers as horizontal antihierarchical spadeworkers those who do the work as part of the community rather than standing apart from it But in the years since the professionalization of organizing work has only increased despite the critiques Only by grappling with its limitations and pitfalls Petitjean insists can we learn to build durable effective organizations for change **Social Finance** Alex Nicholls, Rob Paton, Jed Emerson, 2015-11-05 Social Finance is a rapidly advancing area of practice policy and research with a lot of unanswered questions What does it amount to What is it to be social in finance How do you value assets that offer a social as well as a financial return This book provides a collection of authoritative essays on these and related topics The essays embrace the different manifestations of social finance collate existing research set out the controversies offer theoretical insights and advances and draw together the ideas of the leading thinkers in the field Contributors to this volume are leading exponents and practitioners of social finance and leading academics from the main relevant disciplines and fields of study This book is the first serious and comprehensive treatment of social finance and as such will be of interest to academics with research and teaching interests in finance social enterprise entrepreneurship public policy business economics and international development to name a few If you want to understand and join in the academic and policy debates or if you are working in one part of this field and want to understand how the landscape is being rapidly reshaped then this is an essential guidebook
