Looks That Work:

Looking for Work The Facilitator's Guide - Item 1243 , *Looking for Work in Post-Socialist China* Feng Xu, 2012-03-15

Unemployment is one of the most politically explosive issues in China and has gained further prominence as a result of the present global financial crisis. The novelty, urgency and complexity of Chinese unemployment have compelled the government to experiment with policy initiatives that originate in the West. This book argues that although China is not a liberal democracy it has turned to neo liberal forms of governance to deal with unemployment which now function alongside pre existing Chinese modes of governance. This book examines the initiatives which represent China's attempt to institutionalize and humanize its approach to governance. These initiatives include training programmes, counselling, a web based national labour market information network, insurance and using community shequ organizations as the base for new mechanisms of governance and informal job generation. Based on extensive original research including semi structured interviews, the book discusses the ways in which the government combines the new techniques with old campaign style policy techniques. The author argues that these multiple modes of governance make the state's power visible in the new Chinese labour market and at the same time run the risk of policy incoherence or even failure.

Companies that want results need to ensure that every task an employee performs adds value to the organization. That requires a close examination of why expectations aren't being met in order to improve processes. It's time to take a head on approach to issues that prevent companies from hitting performance targets. You'll take a fresh look at the most common issues that hurt companies and learn how to properly incorporate planning into the work process, track the costs of defects and repairs when determining project costs, form teams with a clear mission and the authority to complete tasks, work toward a common goal instead of working against each other. Break down complex project methodology into principles that are easy to understand and that actually work. Multiple exercises reinforce principles and best practices that can be applied to diverse situations. Examine the important factors that are hurting results at your organization and start focusing on adding value with *A Fresh Look at Improving Your Work Environment*.
