Managing Creative Scientists And Engineers:

Managing Creative Scientists and Engineers Eugene Raudsepp, 1963

Managing Creativity in Science and Hi-Tech

Ronald Kay, 2012-05-30 Addressing the issues unique to managers of creative technical staff this guide reflects not only Ronald Kay's long experience observing and teaching successful management techniques but also treats the expanding challenges due to increasingly globally based projects and staff. As before, Kay's guide helps readers to prepare themselves, graduate students and others to understand and improve their managerial skills and covers such practical yet sometimes overlooked steps such as individual and team behavior of creative technical staff, managing their own and others' hiring, evaluating and compensating technical staff, and presentations, meetings and organizational culture. New to this edition are a chapter on the global impact of high tech enterprises and sections on the roles of foundations and government funding and task force participation. Also tackled are the basics of starting financing and staffing venture capital funded enterprises. What's more, this book also serves to increase the awareness and knowledge base of anyone who needs to meet the challenge of managing people with the creative energies that drive technologically based economic growth. **Management**, 1968

Managing Technology Innovation Yunus Dauda, 2009 Technology in the world today has contributed to promote organisational competitiveness and national development. But most developing countries have not substantially benefited from science and technology, hence their underdevelopment and poverty. They could not harness and manage their scientific and technological innovations and use their human and material resources to meet basic needs of their people, reduce socio-economic inequalities, create employment opportunities and improve national security. The achievement of these is considered in this book to be dependent on provisions of conducive environments for effective human resource management for scientific and technological innovations. Human resource management concepts and practices were used to evolve frameworks and processes for the generation, acquisition, adoption and transfer of technology depending on the objectives of different countries and organisations. **Scientific and Engineering Manpower Management** United States Civil Service Commission. Library, 1974 Annotated bibliography of material received in the USA civil service commission library relating to personnel management in respect of scientists and technicians covers recruitment, training, unemployment, reassignment, motivation, performance recording and evaluation, wage policy etc. **Proceedings of the Ninth International**
