**Secession and Self-Determination** Stephen Macedo, Allen Buchanan, 2003-12 The many questions that surround movements for secession and self-determination are both practically urgent and theoretically perplexing The United States settled its secession crisis in the 1860s But the trauma and unfinished business of those events are still with us Around the world secession and self-determination are the key issues that cause strife and instability This volume provides an unusually comprehensive consideration of the many

challenges of law and political philosophy that accompany them and offers theoretical insights that provide guidance for policy Among the questions considered are should the international community recognize a right to secede and if so what conditions must be satisfied before the right can be asserted Should secession and its conditions be recognized within domestic constitutions Secession is the most extreme form of political separation and there are modes of self determination short of it including indigenous peoples self government and minority language rights To what degree can these intrastate autonomy arrangements help ameliorate the injustices faced by indigenous groups **Marakwet** Samuel K.

Elolia,2024-04-15 This book attempts to provide an ethnography of the Marakwet and its encounter with colonizers and missionaries The core of the book concerns the formation of the Marakwet person through the rites of passage Indeed cultural education is critical in establishing a socially mature identity By virtue of repetition humans connect to the past and create a continuum Also through rituals the world is no longer an opaque mass of objects arbitrarily thrown together but a living cosmos that can be intelligible and significant It explains why things exist and to what ends At the same time through rituals new ideas are given new interpretations The missionary colonizing project unsuccessfully tried to dislodge such traditions The African tradition is the context from which most Christians come and to which many still practice to some degree It is therefore necessary for both Marakwet and Christian tradition to interact The book highlights the concept of inculturation as a viable resource in helping Christianity engage the culture with minimal disruptions **Ritual** Catherine Bell, From handshakes and toasts to chant and genuflection ritual pervades our social interactions and religious practices Still few of us could identify all of our daily and festal ritual behaviors much less explain them to an outsider Similarly because of the variety of activities that qualify as ritual and their many contradictory yet in many ways equally legitimate interpretations ritual seems to elude any systematic historical and comparative scrutiny In this book Catherine Bell offers a practical introduction to ritual practice and its study she surveys the most influential theories of religion and ritual the major categories of ritual activity and the key debates that have shaped our understanding of ritualism Bell refuses to nail down ritual with any one definition or understanding Instead her purpose is to reveal how definitions emerge and evolve and to help us become more familiar with the interplay of tradition exigency and self expression that goes into constructing this complex social medium *Ritual* Catherine M. Bell,1997 Catherine Bell provides a practical introduction to ritual and its study with comprehensive overviews of the most influential theories of religion and ritual The book examines the major categories of ritual activity Masks and Masking Gary Edson,2015-07-11 For at least 20 000 years masking has been a mark of cultural evolution and an indication of magical religious sophistication in society This book provides a comprehensive understanding of the mask as a powerful cultural phenomenon a means by which human groupings attempted to communicate their dignity and sense of purpose as well as establish a continuum between the natural and supernatural worlds It addresses the distinctive environments within which masks flourished and analyzes the mask as a manifestation of

art ethnology and anthropology      **How We Became Human** Pierpaolo Antonello, Paul Gifford, 2015-10-01 From his groundbreaking *Violence and the Sacred* and *Things Hidden since the Foundation of the World* René Girard's mimetic theory is presented as elucidating the origins of culture. He posits that archaic religion or the sacred particularly in its dynamics of sacrifice and ritual is a neglected and major key to unlocking the enigma of how we became human. French philosopher of science Michel Serres states that Girard's theory provides a Darwinian theory of culture because it proposes a dynamic shows an evolution and gives a universal explanation. This major claim has however remained underscrutinized by scholars working on Girard's theory and it is mostly overlooked within the natural and social sciences. Joining disciplinary worlds this book aims to explore this ambitious claim invoking viewpoints as diverse as evolutionary culture theory, cultural anthropology, archaeology, cognitive psychology, ethology and philosophy. The contributors provide major evidence in favor of Girard's hypothesis. Equally Girard's theory is presented as having the potential to become for the human and social sciences something akin to the integrating framework that present day biological science owes to Darwin, something compatible with it and complementary to it in accounting for the still remarkably little understood phenomenon of human emergence.
