**Legends in Gandhian Social Activism: Mira Behn and Sarala Behn** Bidisha Mallik,2022-06-15 This book is about Madeleine Slade 1892 1982 and Catherine Mary Heilemann 1901 1982 two English associates of Mohandas K Mahatma Gandhi 1869 1948 known in India as Mira Behn and Sarala Behn The odysseys of these women present a counternarrative to the forces of imperialism colonialism capitalism and globalized development The book examines their extraordinary journey to India to work with Gandhi and their roles in India s independence movement their spiritual strivings their independent work in the Himalayas and most importantly their contribution to the evolution of Gandhian philosophy of socio economic reconstruction and environmental conservation in the present Indian state of Uttarakhand The author shows that these

women developed ideas and practices that drew from an extensive intellectual terrain that cannot be limited to Gandhi's work. She delineates directions in which Gandhian thought and experiments in rural development work and visions of a new society evolved through the lives, activism and written contributions of these two women. Their thought and practice generated a new cultural consciousness on sustainability that had a key influence in environmental debates in India and beyond and were responsible for two of the most important environmental movements of India and the world: the Chipko Movement or the movement against commercial green felling of trees by hugging them and the protest against the Tehri high dam on the Bhagirathi River. To this day their teachings and philosophies constitute a useful and significant contribution to the search for and implementation of global ideas of ecological conservation and human development. **The Greenwood**

This book examines the misuse of history in New Atheism and militant anti-religion. It looks at how episodes such as the Witch hunt, the Inquisition and the Holocaust are mythologized to present religion as inescapably prone to violence and discrimination whilst the darker side of atheist history such as its involvement in Stalinism is denied. At the same time another constructed history that of a perpetual and one-sided conflict between religion and science/rationalism is commonly used by militant atheists to suggest the innate superiority of the non-religious mind. In a number of detailed case studies the book traces how these myths have long been overturned by historians and argues that the New Atheism's cavalier use of history is indicative of a troubling approach to the humanities in general. Nathan Johnstone engages directly with the God debate at an academic level and contributes to the emerging study of non-religion as a culture and an identity. *Cistercian Legends of the Thirteenth Century.
